

## Country Presentation: Germany

7<sup>th</sup> Meeting of the GGP International Working Group  
Marrakech, 27 September 2009

Lenore Sauer  
Federal Institute for Population Research

### GGG Wave 2

- Fieldwork has been completed (data collection from September 2008 to March 2009).
- Of n= 10,000 individuals in wave 1 6,400 respondents agreed to be re-contacted for wave 2. Finally approx. 3,200 interviews have been realized.
- CAPI-questionnaire adapted to German specificities (education, occupation) and additional questions concerning migration history.
- Minor deviations between wave 1 and 2: over-representation of females and higher educated population.
- Data cleaning is planned to be completed in December 2009.
- Pre-harmonized dataset will be presumably provided until February 2010.

### **Additional sample of Turkish migrants, GGS wave 1+2**

- In addition to the nationally representative sample a survey of Turkish citizens living in Germany have been conducted.
- Wave 1 was carried out in 2006 on 4,000 interviews with Turkish citizens.
- Pre-harmonized dataset has been provided in September 2009.
- 3,200 Turkish respondents agreed to be re-contacted for wave 2. The expected sample is thus between  $n=1,200$  and  $n=1,600$  interviews.
- Fieldwork is currently being carried out and is expected to be completed in March 2010.

### **Contextual database – still work in progress...**

- About 50% of the numerical variables and 20% of the text data are currently available.
- It is planned to deliver the German contextual database by the end of the year 2010.
