GGP Generations & Gender Programme

Statement of affiliation, confidentiality and acceptable use for GGS data sets

I, *[name]*

of *[institutional affiliation]*

supervised by *(if a current student): [name and position of supervisor]*,

(a) undertake to maintain the confidentiality of the respondents in the Generations and Gender Survey (GGS) data sets; I will not make any effort to identify individual survey respondents or other household members; if I inadvertently identify such individuals or discover a means of doing so, I will notify the United Nations Economic Commission for Europe (UNECE) immediately;

(b) will only use the data for genuine non-commercial, non-proprietary scientific and policy research purposes; I will not attempt to make any financial gain from the data or from my research based on the data;

(c) will not give access to the micro-data to any person who has not registered their details at http://www.ggp-i.org/data/data-access.html and completed and returned this pledge; if I am working with collaborators, all of them must return this pledge; if I am a current student, I will provide details of my supervisor above, if I am a teacher, I will not share the data with students who have not signed the pledge *[Those wishing to use GGP data for teaching purposes should refer to the link above for a specific application procedure and data set]*;

(d) understand that attempts to disseminate unauthorized copies of the data, in whole or in part, or to identify individual respondents may be subject to prosecution under the applicable laws;

(e) will send details of any research papers, dissertations or conference presentations based on the Generations and Gender Survey micro-data or aggregate tabulations to the Population Unit of UNECE, for inclusion in the Generations and Gender Programme publications archive;

(f) in any work emanating from this research, I will acknowledge that these data were obtained from the Generations and Gender Programme Data Archive and were created by the organizations and individuals listed under each respective country name at http://www.ggp-i.org/online-data-analysis.html, and will refer to the publication that contains the model survey instruments: **United Nations Economic Commission for Europe (2005) Generations & Gender Programme: Survey Instruments. New York and Geneva: United Nations;**

(g) agree to receive notifications of new data releases, amendments etc. by email;

(h) will inform UNECE of any changes to the details given in my application, including institutional affiliation.

The Population unit of the United Nations Economic Commission for Europe (UNECE), Palais des Nations, CH-1211 Geneva 10, Switzerland, represented by Vitalija Gaucaite Wittich, Chief of unit, henceforth referred to as the Co-ordination Centre

and

[institution]

represented by [name and title of the signing representative of the institution]

henceforth referred to as the Research Organization,

enter into the following

Cooperation Agreement

regarding the use of the micro-data collected in Generations and Gender Surveys for comparative research.

Article 1: Definitions

1.1. The Generations and Gender Surveys (GGS) are the main element in the Generations and Gender Programme (GGP), an international project developed and steered by a Consortium of twelve organizations and coordinated in part by the Population unit of UNECE. The main substantive goal of the Programme is to improve understanding of demographic and social developments and of the factors that influence these developments, with particular attention given to relationships between children and parents (generations) and those between partners (gender).

1.2. For the purposes of this agreement:

1.2.1. "data" shall identify a micro-data set that contains the individual records of responses to a survey interview;

1.2.2. "depersonalized data" shall mean micro-data devoid of any information that may allow identification of the persons to whom the data pertain;

1.2.3. "*bona fide* researcher (researcher)" shall identify an individual who can provide proof of affiliation with the Research Organization and who intends to use the data for scientific purposes;

1.2.4. "Directive" shall mean Directive 95/46/EC of the European Parliament and of the Council from 24 October 1995 on the protection of individuals with regard to the processing of personal data and on the free movement of such data.

Article 2: Data Distribution

2.1. The Co-ordination Centre shall distribute the requested data of the Generations and Gender Surveys (GGS) to the Research Organization for use in research activities. The submitted data are in an electronic format and shall be provided on an appropriate electronic medium.

2.2. Together with the data, the Co-ordination Centre will provide appropriate documentation necessary for processing and scientific use of the data.

Pledge of Confidentiality

I_____, undertake to maintain the confidentiality of the respondents in the Generations and Gender Survey datasets made available for my research. I will not use these data for purposes other than the research approved by the Generations and Gender Programme (GGP) Co-ordination Centre. I will not let any person who has not signed the Pledge of Confidentiality have access to these micro-data. I understand that attempts to disseminate copies of the data, in whole or in part, or to identify individual respondents may be subject to prosecution under the applicable laws.

I will send details of any research papers based on the Generations and Gender Survey micro-data or aggregate tabulations to the Population unit of the United Nations Economic Commission for Europe, for inclusion in the GGP publications archive.

In any work emanating from this research, I will acknowledge that these data were obtained from the Generations and Gender Programme Data Archive and were created by the organizations and individuals listed under each respective country name at http://www.ggp-i.org/online-data-analysis.html, and will refer to the publication that contains the model survey instruments:

Generations and Gender Programme discussed at International Population Conference in Busan

More than 20 scientific studies based on data from the Generations and Gender Programme (GGP) will be presented at the XXVII International Population Conference, a major conference in the field of population studies. Held every four years by the International Union for the Scientific Study of Population (IUSSP), this year's conference takes place on 26 - 31 August 2013 in Busan, Republic of Korea. The number of papers that will be presented illustrates the growing importance of the GGP as a knowledge base for policy-relevant research in the field of population.

Expected consequences of union formation across Europe
GGP data on non-partnered individuals aged 22-35 from eight European countries was used in a study to investigate expected consequences of moving in with a partner within the next three years. Results showed that Swedes were most likely to expect improvements in their financial situation after such a move. Across all countries, women were significantly more likely than men to expect an improved financial situation after moving in with a partner. This gender gap was biggest in Bulgaria, Romania and Russia and smallest in Sweden, France and Belgium. In addition, Romanians and Swedes were more prone to expect less personal freedom, whereas Hungarian and French respondents were most inclined to expect increasing life satisfaction. Respondents from Belgium, France, and Russia were least likely to anticipate decreasing career opportunities. In Austria, men were more likely to expect an increased life satisfaction than women.

Childbearing in cohabitation linked to trend of increasing individual autonomy
An innovative study on Contextual Conditions and Childbearing in Cohabitation across
