Three waves were conducted at intervals of 3 years:

- **Wave (W) 1 in 2005** (September – December); 10,079 respondents,
- **W2 in 2008** (October – December); 6,534 respondents,
- **W3 in 2011** (September – November); 5,781 respondents of which 348 non-respondents at W2).

Between W1 and W3 the attrition was equal to 43%.

The surveys were executed by INED (Arnaud Régnier-Loilier and the Surveys Department), with the collaboration of INSEE.
Data Availability and Publications

• W1 and W2: harmonized and available.
• W3: objective fixed for 2015.

• Publications on longitudinal analyses expected for 2015:
  ✓ An article about under-reporting the no. of children across waves.
  ✓ Collective works both in French and in English.
