Country Progress Report on Japanese GGP
(at Corvinus University of Budapest, Budapest, Hungary)

International Comparative Survey on Marriage
and the Family
(Japanese Generations & Gender Survey)

Nobutaka Fukuda
School of Social Informatics
Aoyama Gakuin University
Tokyo, JAPAN
Since the last meeting

✧ The Japanese GGS data has been uploaded.
✧ A small, but important step to a comparative research in micro-data.
✧ The Japanese contextual data has been uploaded.
✧ Yet, it includes only quantitative data.
Welcome to the GGP

The GGP is a Longitudinal Survey of 18-79 year olds in 19 countries that aims to improve our understanding of the various factors - including public policy and programme interventions - which affect the relationships between parents and children (generations) and between partners (gender). A broad array of topics including fertility, partnership, the transition to adulthood, economic activity, care duties and attitudes are covered by the survey. The accompanying contextual database (CDB) holds data on: legal norms and regulations, social norms, measures of welfare state policies and institutions as well as general economic and cultural indicators. You can also access the data via our Online Analysis tool.

Future Tasks

- The JGGS-4 data has been checked and cleaned.
- The JGGS-2 & JGGS-3 data have been cleared and modified to a common format (we are still suffering from a chronic shortage of manpower).
- Necessary to secure a research fund for JGGS-5 (we have not yet obtained a sufficient funding for it).
- Qualitative contextual data has been collected and translated into English.
