

Innovative Solution Inc.
Beijing+20 Regional Review meeting
6 – 7 November 2014

We have to denounce all governments that practice repressions against LGBTI communities and demand to end discrimination on the basis of SOGI.

We request regional recognition: Central Asia and Eastern Europe should be more explicitly mentioned across all recommendations.

Our demand is: Reinforce wording on greater accountability around investments and prioritization of sexual and reproductive health and rights within gender equality and the empowerment of girls and women.

Poverty and Harm practices make terrible the lives of many Central Asian women despite the advanced progressive legislation, because the governments are not able to ensure the implementation of laws and by laws.

It is crucial to consolidate our efforts in achieving a better world for women in terms of increasing the accountability of financing for gender equality, especially in developing low income countries.
