**HANDBOOK ON RURAL HOUSEHOLD, LIVELIHOOD AND WELL-BEING:
STATISTICS ON RURAL DEVELOPMENT AND AGRICULTURE
HOUSEHOLD INCOME**

Table of content*

* This paper is to be included as Table of content in the Handbook on Rural Household, Livelihood and Well-Being: Statistics on Rural Development and Agriculture Household Income. The Task Force is comprised of experts from the following national agencies, universities and international organizations: Statistics Canada, Hungarian Central Statistical Office, National Statistical Institute of Italy (ISTAT), Swedish Board of Agriculture, Dept. for Environment, Food and Rural Affairs (United Kingdom), Economic Research Service (United States), Imperial College (United Kingdom), University of Verona (Italy), University of Pescara (Italy), Food and Agriculture Organization of United Nations (FAO), World Bank, Statistical Office of the European Communities (Eurostat), Organization for Economic Co-operation and Development (OECD) and the United Nations Economic Commission for Europe (UNECE).

PREFACE

I. INTRODUCTION

- I.1 Background to the manual
 - I.1.1 Why is the manual being produced?
 - I.1.2 Who is the manual intended for?
- I.2 What is rural development and why is it a policy area?
- I.3 Why particular focus on agriculture household income and wealth?
- I.4 Rural development policies from national and international perspectives
 - I.4.1 Examples of how national rural development policies are formulated
 - I.4.2 Rural development from a sectoral based approach – agriculture
 - (i) The agriculture perspective
 - (ii) Trends in agriculture in the last 50 years – plummeting employment and skyrocketing productivity
 - (iii) The current situation for agriculture
 - (iv) Other characteristics of agriculture
 - (v) Perspectives on Agricultural Policy Reform and the Rural Economy
 - (vi) The farm policy dilemma
 - I.4.3 Rural development from a territorial based approach
 - (i) Employment – the driving force of rural development
 - (ii) Trends for rural regions
 - (iii) Entrepreneurship and job creation in rural areas
 - (iv) Is manufacturing and services now the pillars of rural development?
 - (v) Merging industry sectors
 - (vi) Industrial structures and characteristics of rural and urban economies
 - (vii) Sectoral mix and territorial dynamics
 - (viii) Education and employment in rural regions
 - (ix) The role of tourism
 - (x) The importance of communications
 - (xi) Rural services standards
 - (xii) Objectives and instruments for rural policies
 - (xiii) New issues in rural policy-making
 - (xiv) The role of information and communication technology for rural development
 - (xv) The risks of specialization
 - (xvi) Rural policies
 - (xvii) Conclusions

- I.5 Agriculture households and their role in agriculture policies
- I.6 The need for statistics and indicators for monitoring rural development
- I.7 The need for statistics and indicators for monitoring agriculture household income and wealth vis-à-vis other rural households and urban households

PART I RURAL DEVELOPMENT STATISTICS

II. CONCEPTUAL FRAMEWORK

- II.1 Definitions of rural (national, OECD, Eurostat, World Bank, etc.)
 - II.1.1 Introduction
 - II.1.2 OECD
 - II.1.3 European Union
 - II.1.4 The World Bank
 - II.1.5 FAO
- II.2 Typologies
 - II.2.1 OECD
 - II.2.2 European Union
- II.3 Requirements on indicators and their assessment
 - II.3.1 Introduction
 - II.3.2 OECD
 - II.3.3 European Union
- II.4 Themes and set of indicators
 - II.4.1 OECD
 - II.4.2 European Union
 - II.4.3 The World Bank
 - II.4.4 FAO

III. INVENTORY OF NATIONAL APPROACHES TO RURAL DEVELOPMENT STATISTICS

- III.1 Introduction
- III.2 Inventory of national rural development statistics
- III.3 The definition of rural
- III.4 Current availability of rural development and related statistics
- III.5 Rural development policy
- III.6 Next steps

III.7 Case study: Canada

III.7.1 Introduction

III.7.2 Definitions and typologies

III.7.3 Results

III.7.4 Concluding remarks

IV. INVENTORY OF RURAL INDICATORS COLLECTED OR PROPOSED BY INTERNATIONAL ORGANIZATIONS

IV.1 Introduction

IV.2 OECD

(i) Introduction

(ii) Population and Migration

(iii) Economic Structure and Performance

(iv) Social Well-being and Equity

(v) Environment and sustainability

IV.3 European Union

IV.3.1 Indicators suggested in the PAIS report

(i) Population and Migration - Demographic Structure and Evolution

(ii) Social Well-being - Quality of Life

(iii) Economic Structure and Performance

IV.3.2 Indicators suggested in the Hay's report

IV.3.3 Common indicators for monitoring rural development programming – mid term review

IV.4 The World Bank

V. MEASUREMENT ISSUES, DATA SOURCES AND METHODOLOGIES

V.1 Introduction

V.2 Data sources

V.2.1 Population and housing censuses

V.2.2 Household budget surveys

V.2.3 Labour force surveys

V.2.4 Other survey sources

V.2.5 Administrative registers

V.2.6 Non-official statistics, e.g. from trade associations

V.2.7 GIS and geo-referenced data

- V.3 Indicators – use and misuse
- V.4 Conclusions and recommendations

VI. RECOMMENDED CORE SET OF INDICATORS AND EXTENDED SETS

VII. ANALYTICAL FRAMEWORK AND USAGE

REFERENCES

**PART II
AGRICULTURE HOUSEHOLD INCOME AND WEALTH**

VIII. CONCEPTUAL FRAMEWORK - INTRODUCTION

VIII.1 Matching indicators to policy needs in countries at different levels of economic development

VIII.1.1 Types of income and wealth statistics needed

VIII.2 Households as economic, social and cultural units and as agents for environmental change and conservation – controllers of resources and users of services

VIII.3 Concepts of income and wealth and related indicators

VIII.4 Households and other forms of institutional units within accounting and statistical systems

VIII.4.1 Accounting frameworks

VIII.4.2 Activity accounts – agriculture as an activity

VIII.4.3 Accounts for institutional units – accounts for farm household-firms

VIII.5 Where we are in the provision of income indicators taken from institution-based accounts for household-firms

IX. THE AGRICULTURAL HOUSEHOLD – CONCEPTS AND DEFINITIONS

IX.1 Definition of the household appropriate to studies of consumption and production

IX.2 Households of different sizes and compositions

IX.3 The rural and urban household enterprise

IX.4 Definition of the agricultural household-firm (enterprise) and those belonging to other socio-professional groups

- IX.4.1 Selecting from the “broad” definition of an agricultural household
- IX.4.2 Some practicalities of classification
- IX.4.3 Choice of other socio-professional groups with which to compare agricultural households

- IX.5 Households containing hired labour working in agriculture
- IX.6 Relevance for the Less and More Developed Countries and those with large-scale agricultural enterprises with separate legal status
- IX.7 Typologies of farm-households

X. DEFINITIONS OF INCOME

- X.1 Income as factor rewards and as source of consumption spending
- X.2 Relationship between income and expenditure
 - X.2.1 Urban versus rural consumption/well-being
- X.3 Individual versus Household Incomes
- X.4 Shadow Income and the non-observed economy
- X.5 Various income concepts and relationships between them –
 - X.5.1 Extended and Full Incomes,
 - X.5.2 Lifetime income and permanent income hypothesis,
 - X.5.3 Incomes within accounting systems – total resources, total income, disposable income etc.
 - X.5.4 Importance of time
- X.6 Subsidies, preferential tax treatment and income measurement
 - X.6.1 Concept of a subsidy
 - X.6.2 Subsidies within agricultural income measurement systems
 - X.6.3 Which other subsidies might be considered?
 - X.6.4 Capital taxation on transfer of property
- X.7 Income and technology (biotechnology, organic farming, machinery, computers, informatization, etc.)
- X.8 Links between income and savings (bank deposits, bonds, funds, shares) and balance sheets
- X.9 Definitions in use

XI. INCOME DISTRIBUTION AND POVERTY

- XI.1 The assessment of poverty
- XI.2 Ways of measuring the incidence of poverty among households

- XI.2.1 Low-income rate (Cumulative proportions below percentiles of the median)
- XI.2.2 The low income gap
- XI.2.3 Relative income level by percentile
- XI.2.4 Cumulative decile shares – Lorenz curve
- XI.2.5 Gini coefficient
- XI.2.6 Sen index
- XI.2.7 Warning in the interpretation of coefficients

XI.3 Poverty lines and inequality measures in practice in agriculture

XII. WEALTH

- XII.1 Introduction
- XII.2 Selected uses of farm and household wealth measures
- XII.3 Differences in wealth measurement for farms and farm operator households
- XII.4 Connection between farms and households in wealth measurement
- XII.5 Data to support estimates of household net worth
- XII.6 Extending analysis of household economic status and well-being
- XII.7 Conclusions

XIII. INVENTORY OF AGRICULTURAL INCOME STATISTICS

- XIII.1 Data sources for agricultural income statistics – generic sources
 - XIII.1 Types of data sources
- XIII.2 Survey of definitions and measurement issues in selected countries
 - XIII.2.1 Predominately developed countries (UNECE and OECD countries)
 - XIII.2.2 Selected developing countries
- XIII.3 Income statistics for selected countries and case studies of best practice in applied methodologies
 - XIII.3.1 United States
 - XIII.3.1.1 The Agricultural Resources Management Survey (ARMS)
 - XIII.3.1.2 Household income and wealth statistics
 - XIII.3.2 Italy
 - XIII.3.2.1 The ISMEA survey
 - XIII.3.2.2 Household income and wealth statistics

- XIII.3.3 Denmark – register based agricultural income statistics
- XIII.3.4 Sweden
- XIII.3.5 Canada
- XIII.3.6 European Union – IAHS
- XIII.3.7 Other countries

XIV. RECOMMENDED SET OF MINIMUM INDICATORS

- XIV.1 Recommendations for basic data to generate these indicators

XV. ANALYTICAL FRAMEWORK AND USAGE

- XV.1 Matching of indicators to stated and implied policy requirements
- XV.2 Use of indicators where information is less than perfect – warnings about the possibility of miss-use
