

Key elements for success

- National level
 - Management issues
 - User needs – tailored response for each type
 - Resources
 - New initiatives / sources
 - Modernisation of statistical production
 - Responsibility for data protection

Key elements for success

- International level

- International cooperation:

- OECD expert group on international collaboration on microdata
- European research projects - e.g. Data without Boundaries)
- modernisation (HLG)
- Standards (quality / metadata)
- sharing good practices and working together on practical steps to advance trans-border access

Proposals for follow up actions

- Sharing experiences of working with users
- A “check list” for systematic development of a micro-data access system
- Update the section on good practices in the 2007 Principles and Guidelines
- Best practice on transparency of processes
- Risk analysis / assessment framework
- Terminology – a common glossary?
- Quality / metadata recommendations
- HLG as vehicle to share innovative solutions
