SNA 2008: an essential tool for economic policy and monitoring

Session organized by the IMF and the UNECE for policy-makers, representatives of missions, international organizations, NGOs, and academia

30 April 2012
from 14:30 to 16:30
Geneva, Palais des Nations, Room XI

Highlights:

- Using macro-economic indicators to monitor strengths and weaknesses of a country’s economy.
- GDP, National Income, Saving, Net Worth – key indicators of the 2008 SNA.
- Improving data quality and comparability of national accounts.
- The changes in the 2008 SNA and their impact on key economic statistics.
- Satellite accounts and other extensions of the SNA.
- Global Financial Crisis and SNA – financial interconnectedness.

The 2008 System of National Accounts (SNA) replaces the version from 1993 to better reflect statistics in modern societies. It helps decision-makers to:

- get information on the structure and evolution of a country’s economy.
- access main macroeconomic indicators to monitor an economy’s overall performance.
- analyze the current situation, identify major problems and make economic forecasts for development.
