

**Special session for transition economies/
Meeting of the Group of Experts on National Accounts,
Geneva, May 1-4, 2012**

Mongolia:
***National implementation plan,
current works and main
challenges***

**Director of Macro-Economic Statistics Department
B.Badamtsetseg**

OUTLINE OF PRESENTATION

- I. The 2008 SNA Implementation Plan
- II. The current works
- III. Main challenges

I. The 2008 SNA implementation plan

The 2008 SNA implementation plan is the integral part of the NSDS

NSDS (2011-2015)

approved by Parliament

Implementation plan (2011-2015)

to be approved by Statistical consul

Action plan (yearly basis)

approved by NSO chairman

I. The 2008 SNA Implementation Plan:

NSDS consists of 6 sessions, *including statistical infrastructure, economic statistics and national accounts in broad*

The National implementation plan:
6 sub-sessions

Sub-session 2: “Implementation of System
of National Accounts”

I. The 2008 SNA Implementation Plan:

I.1 Sub-session 2: *“Implementation of System of National accounts”* consists 6 parts (19)

- 1. To prepare for implementation SNA 2008(7)**
2. To compile Supply and Use table for 2010(3)
3. To improve estimation on GDP, GNI(2)
4. To compile the sequence of accounts(2)
5. Start to compile environmental economic accounts(3)
6. To elaborate price statistics(5)

I. The 2008 SNA Implementation Plan:

I.1 Sub-session 2: *“Implementation of System of National accounts”*

1. To prepare for implementation SNA 2008 (7)

- 1.1 To study methodological changes from the SNA 1993 to SNA 2008
- 1.2 To determine the sequence/order of the implementation SNA 2008.
- 1.3 To improve current SNA methodologies systematically.(SUT and GDP estimation methodologies)
- 1.4 To revise asset classification (ISIC4, CPC2, COPNI introduced in 2011)

I. The 2008 SNA Implementation Plan:

I.1 Sub-session 2: *“Implementation of System of National accounts”*

1. To prepare for implementation SNA 2008 (7)

1.5 To determine the data sources, which are used in National accounts framework, step by step and to use internationally accepted software (SDMAX, ERETES etc.) in the macroeconomic estimations;

1.6 On the basis of data sources, begin to do some initial estimations according to SNA 2008 recommendation;

1.7 To renew administrative data source and flow, improve the cooperation with Central bank, Ministry of Finance and other related organizations;

I. The 2008 SNA Implementation Plan:

I.2 Other sub-sessions in the IP related to 2008 SNA implementation

2.1 To elaborate economic statistics sub-session:

- To introduce necessary data source step by step for SNA 2008 implementation
- To be conduct informal sector survey and compile its result
- To create nationwide database

2.2 To strengthening statistical system sub-session:

- To transfer from GDDS to SDDS
- To increase number of staff and train them

2.3 To strengthening statistical infrastructure (BR...)

II. Current works: *What are we doing now?*

II.1 We have organized several discussion/forum on the topic “The changes from SNA 1993 and how to introduce those changes in the current methodologies”.

II.2 We have produced and introduced BPM6 methodology with Central bank.

II. Current works: *What are we doing now?*

II. Discussion/forum :

Objective:

1. To study the changes from SNA 1993 systematically;
2. To prepare basic changes to current SNA methodologies, which was developed by NSO Mongolia;
3. To define the issues, which are collaborate with central economic organizations;
4. To determine the topics, which are work with international experts in 2012 and future;

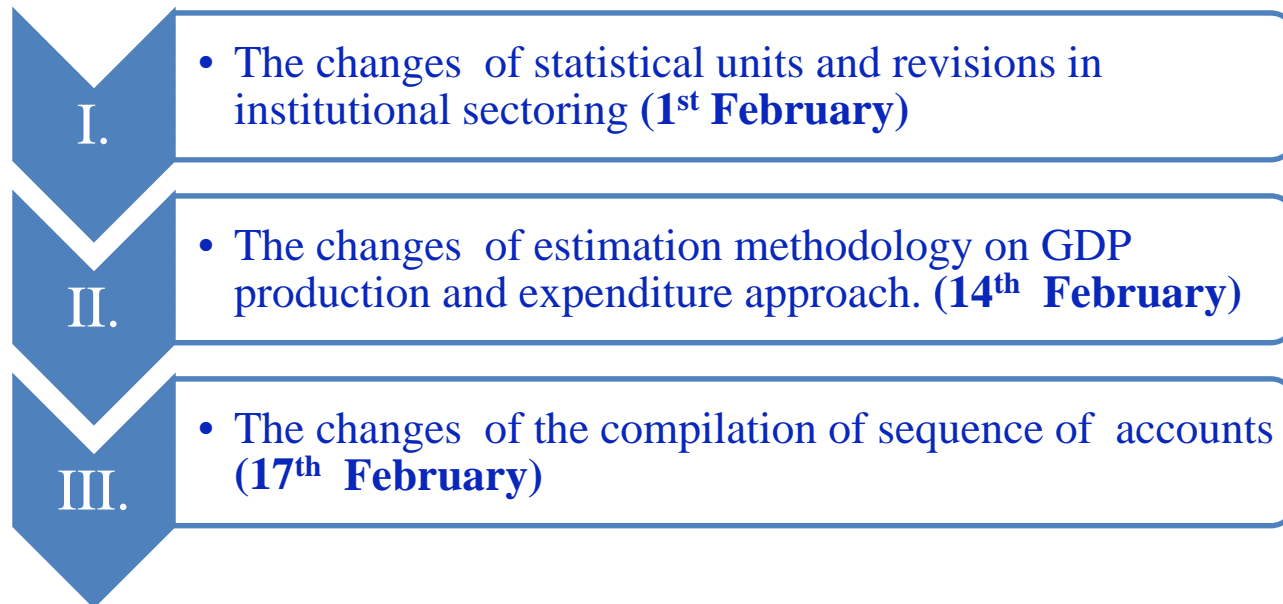

II. Current works: *What are we doing now?*

II.1 Discussion/forum :

Steps and period

Period: 1st February 2012 – 12th March 2012

Steps:

II. Current works: *What are we doing now?*

II.1 Forum:

Steps and period

Steps/continuations/

IV.

- The changes of the treatment and definition of financial instruments and assets; transactions concerning government and public sectors (**5th March**)

V.

- The changes of the compilation of SUT and IOT (**12th March**)

II. Current works: *Expected results in 2012*

- To prepare comments on changes of current methodologies.
- To finalize the cooperation memorandum with Central bank, MoF, NSO.

-
- To be compiled SUT for 2010 (data are collected in 2011-2012)
 - To be conducted Agriculture census
 - To be conducted Informal sector survey

III. Main challenges:

- We have done transferred estimation from ISIC 3.1 to ISIC 4.0. Here occurred some difficulties, especially for GDP dynamics.
- According to the methodological changes, we need to train users and public. Especially, when we change the base year, the growth rate has changed compared to the previous publications.
- For quarterly GDP expenditure estimation, there are some difficulties, such as to allocate GFCF by quarter. In our case, we don't have sufficient data source.

III. Main challenges:

- We are compiling the sequence of account until **capital accounts**. From 2013, we are planning to compile financial accounts, other changes in assets accounts. For accumulation accounts, there is lack of data source and insufficient knowledge. (we need good practice, training and international expert on accumulation accounts)

THANK YOU FOR YOUR ATTENTION
