Waste Governance – ENPI East

Working Paper 10

Instruction On Recording And Submission Of Waste And Waste Management Data And Information

November 2010
Waste Governance – ENPI East

Working Paper 10:

Instruction On Recording And Submission Of Waste And Waste Management Data And Information - Draft
What is ENPI?

The European Neighbourhood Policy (ENP) was developed in 2004, with the objective of avoiding the emergence of new dividing lines between the enlarged EU and its neighbours, and instead strengthening the prosperity, stability, and security of all concerned. The ENP goes beyond existing relationships to offer a deeper political relationship and economic integration. The level of ambition of the relationship will depend on the extent to which these values are shared. The ENP remains distinct from the process of enlargement although it does not prejudge, for European neighbours, how their relationship with the EU may develop in future, in accordance with Treaty provisions.

Until 31 December 2006, EC assistance to the countries of the European Neighbourhood Policy was provided under various geographical programmes, including Tacis - for the EU’s eastern neighbours and Russia – and MEDA for the EU’s southern neighbours. From 1 January 2007 onwards, as part of the reform of EC assistance instruments, MEDA and TACIS have been replaced by a single instrument – the European Neighbourhood and Partnership Instrument (ENPI). This is a much more flexible, policy-driven instrument. It is designed to target sustainable development and approximation to EU policies and standards - supporting the agreed priorities within the Partner Countries. For 2007-2013, approximately €12 billion in EC funding is available to support these partners' reforms.

LIST OF ANNEXES

Annex I  Forms for Waste Generation and Waste Management Records
Annex: II  List Of Waste Including Listed Hazardous Waste
Annex: III Properties of Waste which Render it Hazardous
Executive Summary

This document has been prepared following the assessment of waste classification systems in each of the ENPI-East countries. Based on this assessment, it is clear that:

- Countries wish to upgrade their waste classification systems in accordance with international practice.
- Countries begin from different places and have different priorities in what they consider as necessary or as priority for enhancing their waste classification systems.
- The way in which waste classification systems can best be enhanced in the ENPI East countries varies between countries.

Accordingly, this document sets out a “model instruction” that countries may adopt in whole or in part to enhance their waste classification system in accordance with international norms and, specifically, in ways that are consistent with waste classification in the EU. The “model instruction” has been developed in the format of a legal instrument that can be adapted by countries to fit their requirements and the formats of their legal documents.

The “model instruction” addresses:

- General provisions
- Responsibilities of holders of waste for preparing and submitting waste and waste management data and information
- Classification of waste
- Management of waste and waste management data
- Public access to waste and waste management information
- Monitoring, compliance and enforcement
- Sanctions
- Miscellaneous provisions.
1. Introduction

This document has been prepared to assist countries in the ENPI-East region to respond to the project requirement that, as a consequence of the project, there should be in the ENPI region:

“An adopted common waste classification approach in the region that accords with international standards, is compatible with EU standards, and supplements the existing waste classification systems”.

The document takes the form of a “Model Instruction” that sets out a model legal framework for the classification and reporting of waste that accords with international standards, and is compatible with EU standards. The “Model Instruction” can be adapted in whole or in part to the requirements of each ENPI-East country, as appropriate to the needs of the country.

The preparation of the document has benefited from discussion and consultation with project staff in each ENPI East country.

The following is noted with respect to this document:

1. For the purpose of the “model instruction”, it is assumed that the entity responsible for implementing waste classification requirements will be the national entity responsible for ensuring acceptable environmental quality in the country. The “model instruction” refers to this entity as the “Ministry of the Environment”. Adaptation of this “model instruction” to the requirements of individual countries will need to include proper identification of the appropriate implementing entity.

2. The number of forms that need to be completed by those who must report waste has been kept to a minimum. However, a proper implementation of this Instruction – supported by the capacity of the Ministry of the Environment to manage the data – will result in an effective reporting of waste and waste management, and this will support the environmental protection goals of each country, and will facilitate policy decisions and decisions regarding investment requirements for waste management.

3. Modifications that may be made to one component of the Instruction may require adjustments to other components in order to ensure that the modified Instruction is coherent. Careful review of all modifications is therefore required.

4. The two forms that appear in Annex I have been formatted to fit onto 1 page in the English language. It is very important that the forms fit onto one page in the local language. Forms that take more than one page will cause confusion and will not be completed properly. Time and effort may be required to ensure the proper formatting.

5. The sanctions set out in Part VII of the instruction approximate sanctions in eastern EU member states and respond to the EU principle that sanctions are a necessary component of proper waste management regulation and that they should be “effective, proportionate and dissuasive”.

6. The sanctions that are identified in this document are expressed in Euro and provide the Minister with discretion over when the sanctions will be used. In addition, the sanctions are modest as units (i.e. the amounts of 50 and 500 Euro are not large), but the Instruction
provides that the longer that a holder of waste does not comply with the Instruction, the
greater the amount of the sanction. In accordance with EU policy that sanctions should be
“effective, proportionate and dissuasive”, the sanctions identified in the “model instruction”
are “effective” because the Minister can act promptly, “proportionate” because the amount
of the sanction increases the longer an entity fails to comply, and “dissuasive” because an
entity will understand that it is subject to larger sanctions the longer it remains out of
compliance and will therefore want to ensure compliance.
2. Model Instruction On Recording And Submission Of Waste And Waste Management Data And Information

Part I. General Provisions

Art. 1. This Instruction sets out: (i) the responsibility of holders of waste for preparing and submitting waste and waste management data and information; (ii) the procedures for submitting waste and waste management data and information; (iii) the entities who have authority to receive waste and waste management data and information; (iv) how waste and waste management data and information will be managed; (v) public access to waste and waste management data and information; (vi) monitoring and enforcement of compliance with waste and waste management data and information; and (vii) sanctions for failure of entities to supply waste and waste management data and information in accordance with this Instructions.

Part II. Responsibilities of Holders of Waste for Preparing and Submitting Waste and Waste Management Data and Information

Art 2. Holders of waste shall:
(i) Prepare a record of each type of waste they generate or receive and the management of the waste for which they are the holder in accordance using Form 1 or Form 2 in Annex I.
(ii) Submit the record of each type of waste they generate and its management on or before the last day of January, April, July, and October for the 3 months preceding the first day of each of these months.

Art. 3 Individuals and households are exempt from the requirements of Article 2.

Art. 4 Small commercial, institutional or other entities whose waste is collected by local public administrative entities are exempt from the requirements of Article 2.

Art. 5 Local public administrative entities that are responsible for waste management are deemed to be the holders of waste for the purposes of:
(i) Preparing waste and waste management records of household waste and waste from commercial and institutional entities from which they collect waste or from which entities under contract to the local public administrative entity collect waste.
(ii) Submission of waste and waste management data and information in accordance with Article 2.

Art. 6 Entities responsible for preparing records of waste and waste management will retain each record for 1 year for non-hazardous wastes and 3 years for hazardous wastes and will promptly make such records available to the Ministry of the Environment upon request.
Art. 7 Holders of waste responsible for submitting waste and waste management data will use Form 1 and Form 2 in Annex I to submit the required data and information to the local office of the Ministry of the Environment.

Art. 8 Holders of waste may submit Form 1 and Form 2 on paper or electronically, according to the requirements of the Ministry of the Environment.

Part III Classification of Waste

Art. 9 Holders of waste responsible for preparing records of waste and waste management will classify their waste in accordance with the List of Waste identified in Annex II. Holders of waste will report their waste using the 6 digit classification number for their waste that is identified in the List of Waste in Annex II.

Art. 10 Holders of waste responsible for preparing records of waste and waste management will classify each type of waste as either “hazardous” or “non-hazardous”. Waste is “hazardous” if it:

(i) Is identified as “hazardous” in Annex II; or
(ii) Meets one or more of the criteria for hazardous waste set out in Annex III

Art. 11 Holders of waste will test their wastes as necessary to determine the correct type of waste and whether a waste is hazardous in accordance with the criteria of Annex III. Where holders of waste test their waste in accordance with this Article, they will the appropriate methodology identified in EU Regulation EC 1907/2006 and the technical standards of the European Committee for Standardization.

Art. 12 Holders of waste who test their waste in accordance with Article 10 will use laboratories with the technical and human capacities and accreditations to properly perform the tests.

Art. 13 Waste that is classified in accordance with the List of Waste in Annex II or the hazardous waste characteristics identified in Annex III will not be reclassified unless the holder of the waste can demonstrate that the Ministry of the Environment has agreed in writing that the waste should be reclassified because of an error in the previous classification, or because the waste either:

(i) Is a different type of waste according to the List of Waste Annex II; or
(ii) No longer has the characteristics that initially caused the waste to be classified as hazardous waste according to the criteria in Annex III; or
(iii) A change in the definition of “hazardous waste” results in the waste no longer meeting the criteria for management as hazardous waste.

Art. 14 A holder of waste who submits a report that includes a change in the classification of a waste will include a written justification for the change in the classification with the first report containing the change in waste classification that they submit to the Ministry of the Environment.
Part IV Management of Waste and Waste Management Data

Art. 15 The local office of the Ministry of the Environment will forward waste and waste management data and information they receive from holders of waste to the central office of the Ministry of the Environment.

Art. 16 The central office of the Ministry of the Environment will review waste and waste management data and information and will:

(i) Identify deficiencies in the data and information that has been submitted.
(ii) Use the data and information that has been submitted for monitoring the performance of waste management or other environmental initiatives, developing policy, planning new initiatives and for other initiatives to protect the environment that may be deemed appropriate by the Minister.

Art. 17 The central office of the Ministry of the Environment will forward the waste and waste management data and information to the national agency responsible for statistics for inclusion into the reporting of aggregated statistics.

Art 18 Data and information on waste and waste management will be published from time to time by the Ministry of the Environment and the national agency responsible for statistics.

Part V Public Access to Waste and Waste Management Information

Art 19 The central office of the Ministry of the Environment will provide data and information on waste and waste management to the public in response to a written request.

Art. 20. A holder of waste may request that information about specific wastes not be released to the public if the release of the information would provide information concerning a process that is proprietary to it and for which it holds a patent.

Part VI Monitoring, Compliance and Enforcement

Art. 21 The inspection authorities of the Ministry of the Environment may enter a premises at any time for the purpose of inspecting records of waste and waste management. Where such entry is made to a premises, the entry will be made without prior notice to the holder of waste or the staff of the holder of waste.

Art. 22 The central office of the Ministry of the Environment will advise the inspection authorities of the Ministry of the Environment regarding deficiencies in the data and information that has been received from waste holders, and will request those authorities to take the steps necessary in accordance with this Instruction to ensure the submission of proper data.

Art. 23 The inspection authorities of the Ministry of the Environment will request in writing that holders of waste correct deficiencies in their waste records or in the waste or waste management data or information that they have submitted and will at the same
time send a copy of the written request to the central and appropriate local office of
the Ministry of the Environment.

Art. 24  Holders of waste who are asked to address deficiencies in the waste or waste
management data or information they have submitted will address the identified
deficiencies within 14 calendar days of receipt of the written notice referred to in
Article 23.

Part VII Sanctions

Art. 25  For any holder of waste who fails to make or retain a record of waste and waste
management data and information in accordance with this Instruction, or who makes
a false or erroneous record, or who fails to make a record of waste or waste
management available to the appropriate representative of the Ministry of the
Environment, the minister may:

(i) Issue a ticket of 1.000 lei (one thousand lei) for every week or part week that
the holder of waste has failed to keep or to retain a correct record of a waste or
management data and information for a waste, except that this amount may be
10.000 lei (ten thousand lei) where a waste that has not been recorded or for
which management data and information has not been retained is hazardous
waste; and

(ii) Suspend the operating license of the holder of waste.

Art 26  For any holder of waste that who fails to respond within 14 days to a request made in
accordance with Article 23, the Minister may:

(i) Issue a ticket for 1.000 lei (one thousand lei) for each waste for which a holder
of a waste who has failed to comply with a request within 14 days in
accordance with Article 23 and an additional 1.000 lei (one thousand lei) for
each waste for each additional 14 day period or part thereof that a holder of
waste fails to comply with a request made pursuant to Article 24, except that
these amounts may be 10.000 lei (ten thousand lei) in each case where a waste
is hazardous waste; and

(ii) Suspend the operating license of the holder of waste.

Art. 27  Tickets issued by the Minister in accordance with Article 25 or Article 26 must be
paid in full within 30 days of the date of issuance. Unpaid tickets will accrue
interest at a rate of 1.5 percent per month or part thereof until the ticket has been
paid.

Art.28  (i) Holders of waste may appeal a ticket issued in accordance with Art. 25 or
Article 26. Interest will not be charged on an unpaid ticket provided that:

(a) The ticket has been appealed to a court of competent jurisdiction within
30 days of the issuance of the ticket; and

(b) The court upholds the appeal.

(ii) Holders of waste who appeal a ticket issued in accordance with Art. 24 or
Article 25 and whose appeal is not upheld will be charged the interest rate
identified in Article 27 up to the date of the rejection of the appeal and interest will continue to accrue until the ticket is paid.

Part VI Miscellaneous

Art. 29 The Minister of the Environment may amend this Instruction from time to time.
Annex I

Forms for Waste Generation and Waste Management Records
Instruction on How to Use Form 1 and Form 2

Form 1 and/or Form 2 should be completed by as follows by every holder of waste, as set out in Instruction On Recording And Submission Of Waste And Waste Management Data And Information.

For Holders of Waste Who Generate Waste:

Holders of waste who are deemed to generate waste must report the waste they are responsible for reporting using Form 1. Holders of waste that must use Form 1 include: (i) entities that produce waste themselves; and (ii) entities that are responsible for reporting waste generated by others in accordance with this Instruction (e.g. local public administrative entities are responsible for reporting in aggregate waste generation by households and by the commercial, institutional and other entities from whom they collect waste, and the management of these wastes).

Form 1 should be completed as follows:

1. Provide the information requested by the 8 questions in the grey-shaded area at the top of the form.

2. Use a separate copy of Form 1 for: (i) each type of waste as defined by the 6 digit code in Annex 2; (ii) the same waste generated by the same “holder of waste” in different local public administrative areas.

3. Identify in Column 3 the quantity of generated waste for which you are deemed the “holder of waste”.

Example 1: My organization is an enterprise that generates waste. Does my organization need to report the waste it generates.
Yes. Every enterprise that generates waste must report the waste they generate in Column 3 of Form 1. A separate copy of Form 1 must be used to report each individual waste from each locality (i.e. city, town or village), as these wastes are classified in Annex 2 of the Instruction On Recording And Submission Of Waste And Waste Management Data And Information.

Example 2: My organization is a local public administrative entity that is responsible for collection and management of household waste and waste generated by small commercial entities. Does my organization need to report waste?
Yes. Local public administrative entities must report all the waste they collect, or which is collected by a third party under contract to the local public administrative entity.

Example 3: I must report waste generation for which my organization is deemed to be the waste holder and this waste is disposed of in a waste disposal site that is owned by my organization.
An entity that disposes of waste in a waste disposal site that it owns (e.g. a local administrative entity or enterprise) is the “holder of waste” when the waste is in the waste disposal site. The entity must therefore report the quantity of a waste it generates each month in a locality (Column 3) and the quantity of that waste which it disposes in the waste disposal site that it owns (Column 7). If all the reported waste generation is disposed of in the same site that is owned by the entity, the quantities entered in Column 3 and Column 7 will be the same.
5. For the waste that you report in Column 3, identify in Column 8 the quantity of that waste that is “transferred to another holder of waste” for treatment, storage or disposal. This includes the amount of waste from Column 3 that is transported by another entity.

Example 4: I must report waste generation for which my organization is deemed to be the waste holder and some or all of this waste is treated or stored in facilities that are owned by my organization, and there is a waste residue from the treatment that is disposed of in waste disposal facilities that are owned by my organization.

An entity that treats or stores a quantity of its own waste in a waste treatment or storage facility that it owns (e.g. a local administrative entity or an enterprise) is the holder of waste that is treated or stored. The entity must therefore report the quantity of a waste that it generates each month in a locality (Column 3) and the quantity of that waste that is treated or stored (Column 4, 5 or 6 as appropriate). In addition, if the treatment of waste generates a waste that is disposed of in a waste disposal site that is also owned by the entity, this amount of waste should be included in the amount of waste that is reported in Column 7.

Example 5: My enterprise reports waste in Column 3 as the holder of waste that we generate, but another entity transports the waste for treatment or for storage or for disposal. How do I report this?

Complete Column 3 as the “holder of waste” that you are responsible for reporting. If all the waste in Column 3 is transported by another entity for treatment, storage or disposal, enter the full amount from Column 3 into Column 8. This shows that all the waste you are responsible for reporting is transported by another entity who is the “holder of waste” when they take possession of it.

Example 6: My enterprise is a local public administrative entity with responsibility for waste collection and waste management in the territory that is administered by us. We have a contract with a company to collect waste and take it to a disposal site, or a treatment or a storage site. Who is responsible for reporting waste?

Local public administrative entities must report the waste that is collected in Column 3. If the waste is taken to a waste disposal site or a waste treatment or storage facility by their waste collection contractor, the local public administrative entity must enter to amount of waste that is taken to these facilities in the appropriate column (i.e. Column 4, 5, 6 or 7). In this case, no data is required to be entered into Column 8.

However, if the local public administrative body or its waste collection contractor delivers waste to a facility (e.g. a waste transfer station) from which another entity transports the waste to a waste treatment, storage or disposal facility, the amount of waste that is transported to the transfer station (and which will therefore be transported in a new transportation operation from the transfer station) must be entered into Column 8.

Example 7: My organization collects waste from others entities and transports it for treatment or disposal. Does my organization need to complete Form 2?

Yes. For the purpose of Form 2, when you collect waste from another entity you “receive” the waste from that entity. When you receive the waste from that entity, you become the “holder of waste” and you are responsible for ensuring that it is properly managed while you are the holder of waste.

You must complete a separate Form 2 for: (i) each type of waste you receive; (ii) each locality in which you receive a type of waste, even if you receive the same type of waste in more than one locality. The amount of waste you receive must be entered into Column 3 for each type of waste and each locality from which you receive waste. For transporters, “locality” in Column 3 refers to the locality in which the waste was received.

FOR HOLDERS OF WASTE WHO RECEIVE WASTE

Entities that own waste treatment, storage or disposal facilities, or which transport waste, receive waste from others. These entities must report the waste they receive and how it is managed.

6. Entities that receive waste must report the amount of each waste they receive using Form 2. A separate copy of Form 2 must be used for each waste they receive.
7. Entities that both generate waste and who receive waste must use both Form 1 and Form 2 respectively – Form 1 for the waste they generate and Form 2 for the waste they receive.

Example 8: My organization treats or stores or disposes of waste. Does my organization need to complete Form 2.
Yes. You must enter the amount of waste you receive for treatment or for storage or for disposal in Column 3. For organizations that receive waste for treatment, storage or disposal, the “locality” in Column 3 refers to the locality of the facility that has received the waste (and not the locality from which the waste originated).

Example 9: My organization is a local public administrative entity with responsibility for waste collection and waste management within the territory of our administrative responsibility. Do we need to complete both Form 1 and Form 2.
Yes, if you own either waste treatment, or waste storage or waste disposal facilities. You must complete Form 1 for the waste that you collect within your community, or which is collected for you by a contractor, and you must report on that form where the waste is managed (e.g., at your disposal site) You must also complete Form 2 for the waste you receive at your waste disposal site (or treatment or storage facility). In some cases, the amount of waste that is received at a disposal site (and reported on Form 2) will be equal to the amount of waste that is collected from the community and which is reported as going to the waste disposal site on Form 1. If others also use the waste disposal site, the amount reported in Form 2 will be higher than the amount that is collected from the community and taken to the waste disposal site and which is reported on Form 1.

Example 10: I have completed Column 3 of Form 2– but how do I complete the rest of Form 2.
The information you have provided in Column 3 identifies the total amount of a waste that has been received in a month in the locality you identify. Now you must report how that waste is managed and you do this by filling in, as appropriate, Column 4, 5, 6 or 7. In some cases, the amount you enter into these column will be the same as the amount you received and reported in Column 3. However, if you have treated the waste you will probably have a waste residue from the treatment – so the amount that you identify in Column 4 or Column 5 should be the amount that was treated minus the amount that is waste.

Waste that has been treated AND SOLD OR WHOLLY REUTILIZED does not require any further reporting. However: (i) after a treatment process, all materials that require management as waste will need to be reported on Form 1; and (ii) all waste materials remaining from a treatment process or from a storage facility that are transported by another entity (i.e., an entity that becomes another holder of waste when they receive the waste) to a disposal facility or to another treatment or storage facility must be reported on Form 2 in Column 8.
### Form 1: Record of Waste Generation and Waste Management

1. Name of Waste Holder:  
2. Year of Reporting Period:  
3. Address of Waste Holder:  
4. Type of Waste Reported on the Form:  
5. Code for Waste Reported on this Form (6 digits, according to code in Annex 2):  
6. Is Waste Hazardous? (check the appropriate box)  
   - Yes  
   - No  
7. Unit of Measure (check the appropriate box below to identify the unit of measure the waste quantities are reported in)  
   - Kilograms  
   - Tonnes  
   - Litres  
   - Cubic metres  
8. Physical State (solid or liquid – check the appropriate box)  
   - Solid  
   - Liquid

**Notes**  
This form records the generation and management of waste while it is in the possession of the holder of waste as defined in Art. 2, Art. 3, Art. 4 and Art. 5.  
A separate form is to be used for each type of waste as these are set out in Annex II.  
A separate form to be used for waste generated by the same holder of waste in each commune or municipality where waste is generated  
For the purpose of this Instruction, a waste transfer station is not a treatment facility, or a storage facility or a disposal facility.

Notes
This form records the generation and management of waste while it is in the possession of the holder of waste as defined in Art. 2, Art. 3, Art. 4 and Art. 5. A separate form is to be used for each type of waste as these are set out in Annex II. A separate form to be used for waste generated by the same holder of waste in each commune or municipality where waste is generated. For the purpose of this Instruction, a waste transfer station is not a treatment facility, or a storage facility or a disposal facility.
Annex: II

List Of Waste Including Listed Hazardous Waste
List of Waste Including Hazardous Waste

Instruction on How to Use the List of Waste

1. The inclusion of a material in the List of Waste does not mean that the material is a waste in all circumstances. Materials are considered to be waste only when they meet the definition of waste in the Law on Waste.
2. This implies that the following steps should be taken to identify a waste in the list:

   Step 1: Identify the source generating the waste in Chapters 01 to 12 or 17 to 20 and identify the appropriate six-digit code of the waste (excluding codes ending with 99 of these chapters). Note that a specific production unit may need to classify its activities in several chapters. For instance, a manufacturer may find its wastes listed in Chapters 12 (wastes from shaping and surface treatment of metals), 11 (inorganic wastes containing metals from metal treatment and the coating of metals) and 08 (wastes from the use of coatings), depending on the different process steps.

   Step 2: If no appropriate waste code can be found in Chapters 01 to 12 or 17 to 20 the Chapters 13, 14 and 15 must be examined to identify the waste.

   Step 3: If none of these waste codes apply, the waste must be identified according to Chapter 16.

   Step 4: If the waste is not in Chapter 16 either, the 99 code (wastes not otherwise specified) must be used in the section of the list corresponding to the activity identified in step one.

3. Any waste marked with an asterisk (*) is deemed to be a hazardous waste.

4. In addition to any waste identified in this Annex marked by an asterisk (*), a waste is deemed to be hazardous if it meets one or more of the criteria for hazardous waste set out in the Law on Waste Management, Annex III.
List of Waste

Waste categories

01 Wastes resulting from exploration, mining, dressing and further treatment of minerals and quarry
  01 Wastes from mineral excavation
    01 01 Waste from mineral metalliferous excavation
    01 02 Waste from mineral non-metalliferous excavation
  01 Wastes from mineral dressing
    01 01 Wastes from the dressing of metalliferous minerals
    01 02 Wastes from the dressing on non-metalliferous minerals
  01 Wastes from further physical and chemical processing of metalliferous minerals
    01 01 Tailings
    01 02 Dusty and powdery waste
    01 03 Red mud from alumina production
    01 03 99 Wastes not otherwise specified
  01 Wastes from further physical and chemical processing on non-metalliferous minerals
    01 01 Waste gravel and crushed rocks
    01 02 Waste sand and clays
    01 03 Dusty and powdery waste
    01 04 Waste from potash and rock-salt processing
    01 05 Waste from washing and cleaning of minerals
    01 06 Waste from stone cutting and sawing
    01 07 Waste not otherwise specified
  01 Drilling muds and other drilling wastes
    01 01 Oil-containing drilling muds and wastes
    01 02 Barite-containing drilling muds and wastes
    01 03 Chloride-containing drilling muds and wastes
    01 04 Fresh-water drilling muds and wastes
    01 05 Wastes not otherwise specified

02 Wastes from agricultural, horticultural, hunting, fishing and aquacultural primary production, food preparation and processing

02 Wastes from agricultural, horticultural, hunting, fishing and aquacultural primary production, food preparation and processing
  02 Primary production wastes
    02 01 Sludges from washing and cleaning
02 01 02 Animal tissue waste
02 01 03 Plant tissue waste
02 01 04 Waste plastics (except packaging)
02 01 05* Agrochemical wastes
02 01 06 Animal faeces, urine and manure (including spoiled straw), effluent, collected separately and treated off-site
02 01 07 Waste from forestry exploitation
02 01 99 Waste not otherwise specified
02 02 Wastes from the preparation and processing of meat, fish and other foods of animal origin
02 02 01 Sludges from washing and cleaning
02 02 02 Animal tissue waste
02 02 03 Material unsuitable for consumption or processing
02 02 04 Sludges from on-site effluent treatment
02 02 99 Waste not otherwise specified
02 03 Wastes from fruit, vegetables, cereals, edible oils, cocoa, coffee and tobacco preparation and processing; tobacco processing; conserve production
02 03 01 Sludges from washing, cleaning, peeling, centrifuging and separation
02 03 02 Waste from preserving agents
02 03 03 Sludges from on-site effluent treatment
02 03 99 Wastes not otherwise specified
02 04 Wastes from sugar processing
02 04 01 Soil from cleaning and washing beet
02 04 02 Off-specification calcium carbonate
02 04 03 Sludges from on-site effluent treatment
02 04 99 Wastes not otherwise specified
02 05 Wastes from the dairy products industry
02 05 01 Materials unsuitable for consumption or processing
02 05 02 Sludges from on-site effluent treatment
02 05 99 Wastes not otherwise specified
02 06 Wastes from the baking and confectionery industry
02 06 01 Materials unsuitable for consumption or processing
02 06 02 Wastes from preserving agents
02 06 03 Sludges from on-site effluent treatment
02 06 99 Wastes not otherwise specified
02 07 Wastes from the production of alcoholic and non-alcoholic beverages (except coffee, tea and cocoa)
02 07 01 Waste from washing, cleaning and mechanical reduction of raw materials
02 07 02 Waste from spirits distillation
02 07 03 Waste from chemical treatment
02 07 04 Materials unsuitable for consumption or processing
02 07 05 Sludges from on-site effluent treatment
02 07 99 Wastes not otherwise specified

03 WASTES FROM WOOD PROCESSING AND THE PRODUCTION OF PAPER, CARDBOARD, PULP, PANELS AND FURNITURE

03 01 Wastes from wood processing and the production of panels and furniture
03 01 01 Waste bark and cork
03 01 02 Sawdust
03 01 03 Shaving, cuttings, spoiled timber/particle board/veneer
03 01 99 Wastes not otherwise specified
03 02 Wood preservation wastes
03 02 01* Non-halogenated organic wood preservatives
03 02 02* Organochlorinated wood preservatives
03 02 03* Organometallic wood preservatives
03 02 04* Inorganic wood preservatives
03 03 Wastes from pulp, paper and cardboard production and processing
03 03 01 Bark
03 03 02 Dregs and green liquor sludges (from black liquor treatment)
03 03 03 Bleaching sludges from hypochlorite and chlorine processes
03 03 04 Bleaching sludges from other bleaching processes
03 03 05 De-inking sludges from paper recycling
03 03 06 Fibre and paper sludge
03 03 07 Rejects from paper and cardboard recycling
03 03 99 Wastes not otherwise specified

04 WASTES FROM THE LEATHER, FUR AND TEXTILE INDUSTRIES

04 01 Wastes from the leather and fur industry
04 01 01 Fleshings and lime split waste
04 01 02 Liming waste
04 01 03* Degreasing waste containing solvents without a liquid phase
04 01 04 Tanning liquor containing chromium
04 01 05 Tanning liquor free of chromium
04 01 06 Sludges, in particular from on-site effluent treatment containing chromium
04 01 07 Sludges, in particular from on-site effluent treatment free of chromium
04 01 08 Waste tanned leather (blue sheetings, shavings, cuttings, buffing dust) containing chromium
04 01 09 Waste from dressing and finishing
04 01 99 Waste not otherwise specified

04 02 Wastes from the textile industry
04 02 01 Waste from unprocessed textile fibres and other natural fibrous substances mainly of vegetable origin
04 02 02 Waste from unprocessed textile fibres mainly of animal origin
04 02 03 Waste from unprocessed textile fibres mainly of artificial or synthetic origin
04 02 04 Waste from unprocessed mixed textile fibres before spinning and weaving
04 02 05 Waste from processed textile fibres mainly of vegetable origin
04 02 06 Waste from processed textile fibres mainly of animal origin
04 02 07 Waste from processed fibres mainly of artificial or synthetic origin
04 02 08 Waste from processed mixed textile fibres
04 02 09 Waste from composite materials (impregnated textile, elastomer, plastomer)
04 02 10 Organic matter from natural products (e.g. grease, wax)
04 02 14* Waste from finishing containing organic solvents
04 02 15 Waste from finishing other than mentioned in 04 02 14
04 02 16* Dyestuffs and pigments containing dangerous substances
04 02 17 Dyestuffs and pigments other than those mentioned in 04 02 16
04 02 19* Sludges from on-site effluent treatment containing dangerous substances
04 02 20 Sludges from on-site effluent treatment other than mentioned in 04 02 19
04 02 99 Wastes not otherwise specified

05 WASTES FROM PETROLEUM REFINING, NATURAL GAS PURIFICATION AND PYROLYTIC TREATMENT OF COAL

05 01 Oily sludges and solid wastes
05 01 02 Desalter sludges
05 01 03* Tank bottom sludges
05 01 04* Acid alkyl sludges
05 01 05* Oil spills
05 01 06 Sludges from plant, equipment and maintenance operations
05 01 07* Acid tars
05 01 08* Other tars
05 01 09* Sludges from on-site effluent treatment containing dangerous substances
05 01 10 Sludges from on-site effluent treatment other than those mentioned in 05 01 09
05 01 99 Wastes not otherwise specified
05 02 Non oily sludges and solid wastes
05 02 01 Boiler feedwater sludges
05 02 02 Waste from cooling columns
05 02 99 Wastes not otherwise specified

05 04 Spent filter clays
05 04 01* Spent filter clays
05 05 Oil desulphurisation wastes
05 05 01 Waste containing sulphur
05 05 99 Wastes not otherwise specified
05 06 Wastes from the pyrolytic treatment of coal
05 06 01* Acid tars
05 06 02 Asphalt
05 06 03* Other tars
05 06 04 Waste from cooling columns
05 06 99 Wastes not otherwise specified
05 07 Wastes from natural gas purification
05 07 01* Sludges containing mercury
05 07 02 Waste containing sulphur
05 07 99 Wastes not otherwise specified
05 08 Wastes from oil regeneration
05 08 01* Spent filter clays
05 08 02* Acid tars
05 08 03* Other tars
05 08 04* Aqueous liquid waste from oil regeneration
05 08 99 Wastes not otherwise specified

06 WASTES FROM INORGANIC CHEMICAL PROCESSES

06 01 Waste acidic solutions
06 01 01* Sulphuric acid and sulphurous acid
06 01 02* Hydrochloric acid
06 01 03* Hydrofluoric acid
06 01 04* Phosphoric and phosphorous acid
06 01 05* Nitric acid and nitrous acid
06 01 99* Wastes not otherwise specified
06 02 Waste alkaline solutions
06 02 01* Calcium hydroxide
06 02 02* Soda
06 02 03* Ammonia
06 02 99* Waste salts and their solutions
06 03 Waste salts and their solutions
06 03 01 Carbonates (except 02 04 02)
06 03 02 Saline solutions containing sulphates, sulphites or sulphides
06 03 03 Solid salts containing sulphates, sulphites or sulphides
06 03 04 Saline solutions containing chlorides, fluorides and halides
06 03 05 Solid salts containing chlorides, fluorides and other halogenated solid salts
06 03 06 Saline solutions containing phosphates and related solid salts
06 03 07 Phosphates and related solid salts
06 03 08 Saline solutions containing nitrates and related compounds
06 03 09 Solid salts containing nitrates (nitrometallic)
06 03 10 Solid salts containing ammonium
06 03 11* Salts and solutions containing cyanides
06 03 12 Salts and solutions containing organic compounds
06 03 99 Wastes not otherwise specified

06 04 Metal-containing wastes
06 04 01 Metallic oxides
06 04 02* Metallic salts (except 06 03)
06 04 03* Waste containing arsenic
06 04 04* Waste containing mercury
06 04 05* Waste containing other heavy metals
06 04 99 Wastes not otherwise specified
06 05 Sludges from on-site effluent treatment
06 05 02* Sludges from on-site effluent treatment containing dangerous substances
06 05 03 Sludges from on-site effluent treatment other than those mentioned in 06 05 02
06 06 Wastes from sulphur chemical processes (production and transformation) and desulphurization processes
06 06 01 Waste containing sulphur
06 06 99 Wastes not otherwise specified
06 07 Wastes from halogen chemical processes
06 07 01* Waste containing asbestos from electrolysis
06 07 02* Activated carbon from chlorine production
06 07 99 Wastes not otherwise specified
06 08 Waste from production of silicon and silicon derivatives
06 08 01 Waste from production of silicon and silicon derivatives
06 09 Wastes from phosphorus chemical processes
06 09 01 Phosphogypsum
06 09 02 Phosphorous slag
06 09 99 Wastes not otherwise specified
06 10 Waste from nitrogen chemical processes and fertiliser manufacture
06 10 01 Waste from nitrogen chemical processes and fertiliser manufacture
06 11 Waste from the manufacture of inorganic pigments and opacifiers
06 11 01 Gypsum from titanium dioxide production
06 11 99 Wastes not otherwise specified
06 13 Wastes from other inorganic chemical processes
06 13 01* Inorganic pesticides, biocides and wood preserving agents
06 13 02* Spent activated carbon (except 06 07 02)
06 13 03 Carbon black
06 13 04* Waste from asbestos processing
06 13 99 Wastes not otherwise specified

07 WASTES FROM ORGANIC CHEMICAL PROCESSES

07 01 Wastes from the manufacture, formulation, supply and use (MFSU) of basic organic chemicals
07 01 01* Aqueous washing liquids and mother liquors
07 01 03* Organic halogenated solvents, washing liquids and mother liquors
07 01 04* Other organic solvents, washing liquids and mother liquors
07 01 07* Halogenated still bottoms and reaction residues
07 01 08* Other still bottoms and reaction residues
07 01 09* Halogenated filter cakes, spent absorbents
07 01 10* Other filter cakes, spent absorbents
07 01 11* Sludges from on-site effluent treatment containing dangerous substances
07 01 12 Sludges from on-site effluent treatment other than those mentioned in 07 01 11
07 01 99 Wastes not otherwise specified

07 02 Wastes from the MFSU of plastics, synthetic rubber and man-made fibres
07 02 01* Aqueous washing liquids and mother liquors
07 02 03* Organic halogenated solvents, washing liquids and mother liquors
07 02 04* Other organic solvents, washing liquids and mother liquors
07 02 07* Halogenated still bottoms and reaction residues
07 02 08* Other still bottoms and reaction residues
07 02 09* Halogenated filter cakes, spent absorbents
07 02 10* Other filter cakes, spent absorbents
07 02 11* Sludges from on-site effluent treatment containing dangerous substances
07 02 12 Sludges from on-site effluent treatment other than those mentioned in 07 02 11
07 02 13 Waste plastic
07 02 99 Wastes not otherwise specified

07 03 Wastes from the MFSU of organic dyes and pigments (except 06 11)
07 03 01* Aqueous washing liquids and mother liquors
07 03 03* Organic halogenated solvents, washing liquids and mother liquors
07 03 04* Other organic solvents, washing liquids and mother liquors
07 03 07* Halogenated still bottoms and reaction residues
07 03 08* Other still bottoms and reaction residues
07 03 09* Halogenated filter cakes, spent absorbents
07 03 10* Other filter cakes, spent absorbents
07 03 11* Sludges from on-site effluent treatment containing dangerous substances
07 03 12 Sludges from on-site effluent treatment other than those mentioned in 07 03 11
07 03 99 Wastes not otherwise specified

07 04 Wastes from the MFSU of organic pesticides (except 02 01 05)
07 04 01* Aqueous washing liquids and mother liquors
07 04 03* Organic halogenated solvents, washing liquids and mother liquors
07 04 04* Other organic solvents, washing liquids and mother liquors
07 04 07* Halogenated still bottoms and reaction residues
07 04 08* Other still bottoms and reaction residues
07 04 09* Halogenated filter cakes, spent absorbents
07 04 10* Other filter cakes, spent absorbents
07 04 11* Sludges from on-site effluent treatment containing dangerous substances
07 04 12 Sludges from on-site effluent treatment other than those mentioned in 07 04 11
07 04 99 Wastes not otherwise specified
07 05 Wastes from the MFSU of pharmaceuticals
07 05 01* Aqueous washing liquids and mother liquors
07 05 03* Organic halogenated solvents, washing liquids and mother liquors
07 05 04* Other organic solvents, washing liquids and mother liquors
07 05 07* Halogenated still bottoms and reaction residues
07 05 08* Other still bottoms and reaction residues
07 05 09* Halogenated filter cakes, spent absorbents
07 05 10* Other filter cakes, spent absorbents
07 05 11* Sludges from on-site effluent treatment containing dangerous substances
07 05 12 Sludges from on-site effluent treatment other than those mentioned in 07 05 11
07 05 99 Wastes not otherwise specified
07 06 Wastes from the MFSU of fats, grease, soaps, detergents disinfectants and cosmetics
07 06 01* Aqueous washing liquids and mother liquors
07 06 03* Organic halogenated solvents, washing liquids and mother liquors
07 06 04* Other organic solvents, washing liquids and mother liquors
07 06 07* Halogenated still bottoms and reaction residues
07 06 08* Other still bottoms and reaction residues
07 06 09* Halogenated filter cakes, spent absorbents
07 06 10* Other filter cakes, spent absorbents
07 06 11* Sludges from on-site effluent treatment containing dangerous substances
07 06 12 Sludges from on-site effluent treatment other than those mentioned in 07 06 11
07 06 99 Wastes not otherwise specified
07 07 Wastes from the MFSU of fine chemicals and chemical products not otherwise specified
07 07 01* Aqueous washing liquids and mother liquors
07 07 03* Organic halogenated solvents, washing liquids and mother liquors
07 07 04* Other organic solvents, washing liquids and mother liquors
07 07 07* Halogenated still bottoms and reaction residues
07 07 08* Other still bottoms and reaction residues
07 07 09* Halogenated filter cakes, spent absorbents
07 07 10* Other filter cakes, spent absorbents
07 07 11* Sludges from on-site effluent treatment containing dangerous substances
07 07 12 Sludges from on-site effluent treatment other than those mentioned in 07 07 11
07 07 99 Wastes not otherwise specified
08 Wastes from the manufacture, formulation, supply and use (MFSU) of coatings (paints, varnishes and vitreous enamels), adhesives, sealants and printing inks
08 01 Wastes from MFSU and removal of paint and varnish
08 01 11* Waste paint and varnish containing organic solvents or other dangerous substances
08 01 12 Waste paint and varnish other than those mentioned in 08 01 11

13 05 02* Oil/water separator sludges
13 05 03* Interceptor sludges
13 05 04* Desalter sludges or emulsions
13 05 05* Other emulsions
6.9.2000 EN Official Journal of the European Communities L 226/19
13 06 Oil waste not otherwise specified
13 06 01* Oil waste not otherwise specified

14 WASTES FROM ORGANIC SUBSTANCES USED AS SOLVENTS (except 07 and 08)

14 01 Wastes from metal degreasing and machinery maintenance
14 01 01* chlorofluorocarbons
14 01 02* other halogenated solvents and solvent mixes
14 01 03* Other solvents and solvent mixes
14 01 04* Aqueous solvent mixes containing halogens
14 01 05* Aqueous solvent mixes free of halogens
14 01 06* Sludges or solid wastes containing halogenated solvents
14 01 07* Sludges or solid wastes free of halogenated solvents
14 02 Wastes from textile cleaning and degreasing of natural products
14 02 01* Halogenated solvents and solvent mixes
14 02 02* Solvent mixes or organic liquids free of halogenated solvents
14 02 03* Sludges or solid waste containing halogenated solvents
14 02 04* Sludges or solid waste containing other solvents
14 03 Wastes from the electronic industry
14 03 01* Chlorofluorocarbons
14 03 02* Other halogenated solvents
14 03 03* Solvents and solvent mixes free of halogenated solvents
14 03 04* Sludges or solid wastes containing halogenated solvents
14 03 05* Sludges or solid wastes containing other solvents
14 04 Wastes from coolants, foam/aerosol propellents
14 04 01* Chlorofluorocarbons
14 04 02* Other halogenated solvents and solvent mixes
14 04 03* Other solvents and solvent mixes
14 04 04* Sludges or solid waste containing halogenated solvents
14 04 05* Sludges or solid waste containing other solvents
14 05 Wastes from solvent and coolant recovery (still bottoms)
14 05 01* Chlorofluorocarbons
14 05 02* Halogenated solvents and solvent mixes
14 05 03* Other solvents and solvent mixes
14 05 04* Sludges containing halogenated solvents
14 05 05* Sludges containing other solvents

15 WASTE PACKAGING; ABSORBENTS, WIPING CLOTHS, FILTER MATERIALS AND PROTECTIVE CLOTHING NOT OTHERWISE SPECIFIED

15 01 Packaging
15 01 01 Paper and cardboard packaging
15 01 02 Plastic packaging
15 01 03 Wooden packaging
15 01 04 Metallic packaging
15 01 05 Composite packaging
15 01 06 Mixed packaging
15 01 07 Glass packaging
15 01 08 Packaging containing residues of or contaminated by dangerous substances
15 02 Absorbents, filter materials, wiping cloths and protective clothing
15 02 02* Absorbents, filter materials, wiping cloths, protective clothing contaminated by dangerous substances
15 02 03 Absorbents, filter materials, wiping cloths and protective clothing other than those mentioned in 15 02 02

16 WASTES NOT OTHERWISE SPECIFIED IN THE LIST

16 01 End-of-life vehicles and their components
16 01 03 End-of-life tyres
16 01 04 Discarded vehicles
16 01 06 End-of-life vehicles, drained of liquids and emptied of other hazardous components
16 01 99 Wastes not otherwise specified
16 02 Discarded equipment and its components
16 02 09* Transformers and capacitors containing PCBs or PCTs
16 02 10* Discarded equipment containing or contaminated by PCBs or PCTs other than those mentioned in 16 02 09
16 02 11* Discarded equipment containing chlorofluorocarbons
16 02 12* Discarded equipment containing free asbestos
16 02 13* Discarded equipment containing hazardous components other than those mentioned in 16 02 09 to 16 02 12
16 02 14 Discarded equipment other than those mentioned in 16 02 09 to 16 02 13
16 02 15* Hazardous components removed from discarded equipment
16 02 16 Components removed from discarded equipment other than those mentioned in 16 02 15
16 03 Off-specification batches
16 03 01 Inorganic off-specification batches
16 03 02 Organic off-specification batches
16 04 Waste explosives
16 04 01* Waste ammunition
16 04 02* Fireworks waste
16 04 03* Other waste explosives
16 05 Chemicals and gases in containers
16 05 01 Industrial gases in high pressure cylinders, LPG containers and industrial aerosol containers (including halons)
16 05 02 Other waste containing inorganic chemicals, e.g. lab chemicals not otherwise specified, fire extinguishing powders
16 05 03 Other waste containing organic chemicals, e.g. lab chemicals not otherwise specified
16 06 Batteries and accumulators
16 06 01* Lead batteries
16 06 02* Ni-Cd batteries
16 06 03* Mercury-containing batteries
16 06 04 Alkaline batteries (except 16 06 03)
16 06 05 Other batteries and accumulators
16 06 06* Electrolyte from batteries and accumulators
16 07 Wastes from transport and storage tank cleaning (except 05 and 12)
16 07 01* Waste from marine transport tank cleaning, containing chemicals
16 07 02* Waste from marine transport tank cleaning, containing oil
16 07 03* Waste from railway and road transport tank cleaning, containing oil
16 07 04* Waste from railway and road transport tank cleaning, containing chemicals
16 07 05* Waste from storage tank cleaning, containing chemicals
16 07 06* Waste from storage tank cleaning, containing oil
16 07 07 Solid waste from ship cargoes
16 07 99 Wastes not otherwise specified
6.9.2000 EN Official Journal of the European Communities L 226/21
16 08 Spent catalysts
16 08 01 Spent catalysts containing gold, silver, rhenium, rhodium, palladium, iridium or platinum (except 16 08 07)
16 08 02* Spent catalysts containing dangerous transition metals (1) or transition metal compounds
16 08 03 Spent catalysts containing other transition metals (2) or transition metal compounds (except 16 08 07)
16 08 04 Spent fluid catalytic cracking catalysts
16 08 05* Spent catalysts containing phosphoric acid
16 08 06* Spent liquids used as catalysts
16 08 07* Spent catalysts contaminated with dangerous substances
17 CONSTRUCTION AND DEMOLITION WASTES (INCLUDING ROAD CONSTRUCTION)

17 01 Concrete, bricks, tiles, ceramics, and gypsum-based materials
17 01 01 Concrete
17 01 02 Bricks
17 01 03 Tiles and ceramics
17 01 04 Gypsum-based construction materials
17 01 05 Asbestos-based construction materials
17 02 Wood, glass and plastic
17 02 01 Wood
17 02 02 Glass
17 02 03 Plastic
17 03 Asphalt, tar and tarry products
17 03 01 Asphalt containing tar
17 03 02 Asphalt not containing tar
17 03 03 Tar and tarry products
17 04 Metals (including their alloys)
17 04 01 Copper, bronze, brass
17 04 02 Aluminium
17 04 03 Lead
17 04 04 Zinc
17 04 05 Iron and steel
17 04 06 Tin
17 04 07 Mixed metals
17 04 08 Cables
17 05 Soil and dredging spoil
17 05 03* Soil and stones containing dangerous substances
17 05 04 Soil and stones other than those mentioned in 17 05 03
17 05 05* Dredging spoil containing dangerous substances
17 05 06 Dredging spoil other than those mentioned in 17 05 05
17 06 Insulation materials
17 06 01* Insulation materials containing asbestos
17 06 02 Other insulation materials
17 07 Mixed construction and demolition waste
17 07 02* Mixed construction and demolition waste or separated fractions containing dangerous substances
17 07 03 Mixed construction and demolition waste other than those mentioned in 17 07 02

18 WASTES FROM HUMAN OR ANIMAL HEALTH CARE AND/OR RELATED RESEARCH (except kitchen and restaurant wastes not arising from immediate health care)

18 01 Wastes from natal care, diagnosis, treatment or prevention of disease in humans
18 01 01 Sharps (except 18 01 03)
18 01 02 Body parts and organs including blood bags and blood preserves (except 18 01 03)
18 01 03* Waste whose collection and disposal is subject to special requirements in view of the prevention of infection
18 01 04 Waste whose collection and disposal is not subject to special requirements in view of the prevention of infection, (e.g. dressings, plaster casts, linen, disposable clothing, diapers)
18 01 06* Chemicals consisting of or containing dangerous substances
18 01 07 Chemicals other than those mentioned in 18 01 06
18 01 08* Cytotoxic and cytostatic medicines
18 01 09 Medicines other than those mentioned in 18 01 08
18 01 10* Amalgam waste from dental care
18 02 Wastes from research, diagnosis, treatment or prevention of disease involving animals
18 02 01 Sharps (except 18 02 02)
18 02 02* Waste whose collection and disposal is subject to special requirements in view of the prevention of infection
18 02 03 Waste whose collection and disposal is not subject to special requirements in view of the prevention of infection
18 02 05* Chemicals consisting of or containing dangerous substances
18 02 06 Chemicals other than those mentioned in 18 02 05
18 02 07* Cytotoxic and cytostatic medicines
18 02 08 Medicines other than those mentioned in 18 02 07
19 WASTES FROM WASTE TREATMENT FACILITIES, OFF-SITE WASTE WATER TREATMENT PLANTS AND THE WATER INDUSTRY

19 01 Wastes from incineration or pyrolysis of waste
19 01 02 Ferrous materials removed from bottom ash
19 01 05* Filter cake from gas treatment
19 01 06* Aqueous liquid waste from gas treatment and other aqueous liquid waste
19 01 07* Solid waste from gas treatment
19 01 10* Spent activated carbon from flue gas treatment
19 01 11* Bottom ash and slag containing dangerous substances
19 01 12 Bottom ash and slag other than those mentioned in 19 01 11
19 01 13* Fly ash containing dangerous substances
19 01 14 Fly ash other than those mentioned in 19 01 13
19 01 15* Boiler dust containing dangerous substances
19 01 16 Boiler dust other than those mentioned in 19 01 15
19 01 17* Pyrolysis waste containing dangerous substances
19 01 18 Pyrolysis waste other than those mentioned in 19 01 17
19 01 99 Wastes not otherwise specified

19 02 Wastes from specific physico/chemical treatments of industrial waste, (e.g. dechromatation, decyanidation, neutralisation)
19 02 01* Metal hydroxide sludges and other sludges from metal insolubilisation treatment
19 02 03 Premixed waste composed only of wastes not marked as hazardous
19 02 04* Premixed waste composed of at least one waste marked as hazardous

19 03 Stabilised/solidified wastes
19 03 04* Waste marked as hazardous, partly stabilised
19 03 05 Stabilised waste other than those mentioned in 19 03 04
19 03 06* Waste marked as hazardous, solidified
19 03 07 Solidified waste other than those mentioned in 19 03 06

19 04 Vitrified waste and wastes from vitrification
19 04 01 Vitrified waste
19 04 02* Fly ash and other flue gas treatment waste
19 04 03* Non-vitrified solid phase
19 04 04 Aqueous liquid waste from vitrified waste tempering

19 05 Wastes from aerobic treatment of solid wastes
19 05 01 Non-composted fraction of municipal and similar waste
19 05 02 Non-composted fraction of animal and vegetable waste
19 05 03 Off-specification compost
19 05 99 Wastes not otherwise specified

19 06 Wastes from anaerobic treatment of waste
19 06 01 Anaerobic treatment sludges of municipal and similar waste
19 06 02 Anaerobic treatment sludges of animal and vegetal waste
19 06 99 Wastes not otherwise specified

19 07 Landfill leachate
19 07 01 Landfill leachate

19 08 Wastes from waste water treatment plants not otherwise specified
19 08 01 Screenings
19 08 02 Waste from desanding
19 08 03* Grease and oil mixture from oil/waste water separation
19 08 04 Sludges from the treatment of industrial waste water
19 08 05 Sludges from treatment of urban waste water
19 08 06* Saturated or spent ion exchange resins
19 08 07* Solutions and sludges from regeneration of ion exchangers
19 08 99 Wastes not otherwise specified

19 09 Wastes from the preparation of drinking water or water for industrial use
19 09 01 Solid waste from primary filtration and screenings
19 09 02 Sludges from water clarification
19 09 03 Sludges from decarbonation
19 09 04 Spent activated carbon
19 09 05 Saturated or spent ion exchange resins
19 09 06 Solutions and sludges from regeneration of ion exchangers
19 09 99 Wastes not otherwise specified
19 10 Wastes from shredding of metal-containing waste
19 10 01 Iron and steel waste
19 10 02 Non-ferrous waste
19 10 03* Fluff — light fraction containing dangerous substances
19 10 04 Fluff — light fraction other than those mentioned in 19 10 03
19 10 05* Dust and other fractions containing dangerous substances
19 10 06 Dust and other fractions other than those mentioned in 19 10 05

20 MUNICIPAL WASTES AND SIMILAR COMMERCIAL, INDUSTRIAL AND INSTITUTIONAL WASTES INCLUDING SEPARATELY COLLECTED FRACTIONS

20 01 Separately collected fractions
20 01 01 Paper and cardboard
20 01 02 Glass
20 01 03 Small plastics
20 01 04 Other plastics
20 01 05 Small metals (cans, etc.)
20 01 06 Other metals
20 01 07 Wood
20 01 08 Organic kitchen waste
20 01 10 Clothes
20 01 11 Textiles
20 01 13* Solvents
20 01 14* Acids
20 01 15* Alkalines
20 01 17* Photochemicals
20 01 19* Pesticides
20 01 21* Fluorescent tubes and other mercury-containing waste
20 01 22 Aerosols
20 01 23* Discarded equipment containing chlorofluorocarbons
20 01 25 Edible oil and fat
20 01 26* Oil and fat other than those mentioned in 20 04 25
20 01 27* Paint, inks, adhesives and resins containing dangerous substances
20 01 28 Paint, inks, adhesives and resins other than those mentioned in 20 01 27
20 01 29* Detergents containing dangerous substances
20 01 30 Detergents other than those mentioned in 20 01 29
20 01 31* Cytotoxic and cytostatic medicines
20 01 32 Medicines other than those mentioned in 20 01 31
20 01 33* Mixed batteries and accumulators containing batteries or accumulators included in 16 06 01, 16 06 02 or 16 06 03
20 01 34 Batteries and accumulators other than those mentioned in 20 01 33
20 01 35* Discarded equipment other than those mentioned in 20 01 21 and 20 01 23 containing hazardous components
20 01 36 Discarded equipment other than those mentioned in 20 01 21, 20 01 23 and 20 01 35
20 02 Garden and park wastes (including cemetery waste)
20 02 01 Compostable waste
20 02 02 Soil and stones
20 02 03 Other non-compostable wastes
20 03 Other municipal wastes
20 03 01 Mixed municipal waste
20 03 02 Waste from markets
20 03 03 Street cleaning residues
20 03 04 Septic tank sludge

(1) Transition metals are: scandium, vanadium, manganese, cobalt, copper, yttrium, niobium, hafnium, tungsten, titanium, chromium, iron, nickel, zinc, zirconium, molybdenum, tantalum, rhenium.
(2) See footnote 1.
(3) Stabilisation processes change the dangerousness of the constituents in the waste and thus transform hazardous waste into non-hazardous waste. Solidification processes only change the physical state of the waste by using additives, (e.g. liquid into solid) without changing the chemical properties of the waste.
(4) A waste is considered as partly stabilised if after the stabilisation process dangerous constituents which have not been changed completely into non-dangerous constituents could be released into the environment in short, middle or long term.
Annex: III

Properties of Waste which Render it Hazardous

Note: This Annex is taken from Directive 2008/98/EC of the European Parliament and of the Council of 19 November 2008 (see Annex III of the Directive). The numbering system reflects the EU numbering system and can be changed in accordance with ENPI East country requirements.
PROPERTIES OF WASTE WHICH RENDER IT HAZARDOUS

H 1 ‘Explosive’: substances and preparations which may explode under the effect of flame or which are more sensitive to shocks or friction than dinitrobenzene.

H 2 ‘Oxidizing’: substances and preparations which exhibit highly exothermic reactions when in contact with other substances, particularly flammable substances.

H 3-A ‘Highly flammable’
- liquid substances and preparations having a flash point below 21 °C (including extremely flammable liquids); or
- substances and preparations which may become hot and finally catch fire in contact with air at ambient temperature without any application of energy; or
- solid substances and preparations which may readily catch fire after brief contact with a source of ignition and which continue to burn or to be consumed after removal of the source of ignition; or
- gaseous substances and preparations which are flammable in air at normal pressure, or
- substances and preparations which, in contact with water or damp air, evolve highly flammable gases in dangerous quantities.

H 3-B ‘Flammable’: liquid substances and preparations having a flash point equal to or greater than 21 °C and less than or equal to 55 °C.

H 4 ‘Irritant’: non-corrosive substances and preparations which, through immediate, prolonged or repeated contact with the skin or mucous membrane, can cause inflammation.

H 5 ‘Harmful’: substances and preparations which, if they are inhaled or ingested or if they penetrate the skin, may involve limited health risks.

H 6 ‘Toxic’: substances and preparations (including very toxic substances and preparations) which, if they are inhaled or ingested or if they penetrate the skin, may involve serious, acute or chronic health risks and even death.

H 7 ‘Carcinogenic’: substances and preparations which, if they are inhaled or ingested or if they penetrate the skin, may induce cancer or increase its incidence.

H 8 ‘Corrosive’: substances and preparations which may destroy living tissue on contact.

H 9 ‘Infectious’: substances and preparations containing viable micro-organisms or their toxins which are known or reliably believed to cause disease in man or other living organisms.

H 10 ‘Toxic for reproduction’: substances and preparations which, if they are inhaled or ingested or if they penetrate the skin, may induce non-hereditary congenital malformations or increase their incidence.

H 11 ‘Mutagenic’: substances and preparations which, if they are inhaled or ingested or if they penetrate the skin, may induce hereditary genetic defects or increase their incidence.

H 12 Waste which releases toxic or very toxic gases in contact with water, air or an acid.

H 13 (*) ‘Sensitizing’: substances and preparations which, if they are inhaled or if they penetrate the skin, are capable of eliciting a reaction of hypersensitization such that on further exposure to the substance or preparation characteristic adverse effects are produced (as far as these can be determined by available testing methods).

H 14 ‘Ecotoxic’: waste which presents or may present immediate or delayed risks for one or more sectors of the environment.

H 15 Waste capable by any means, after disposal, of yielding another substance, e.g. a leachate, which possesses any of the characteristics listed above.

Notes
1. Attribution of the hazardous properties ‘toxic’ (and ‘very toxic’), ‘harmful’, ‘corrosive’, ‘irritant’, ‘carcinogenic’, ‘toxic to reproduction’, ‘mutagenic’ and ‘eco-toxic’ is made on the basis of the criteria laid

Test methods
The methods to be used are described in Annex V to Directive 67/548/EEC and in other relevant CEN-notes.
