Session 2A: Climate Change-Relevant Data for Agriculture, Forestry and Land Use

Part II

Chair: Francesco N. Tubiello
Panelists: Mirella Salvatore, Felix Teillard, Julian Fox, Selvaraju Ramasamy
FAO

Expert Forum for producers and users of climate change-related statistics
FAO, Rome Oct 3-5 2017

Session 2A: Climate Change-Relevant Data for Agriculture, Forestry and Land Use

Part I:

- Present the relevant international reporting processes
- Hear examples of country work, challenges
- Identify challenges and opportunities for the new data frameworks needed under the Paris Agreement, and connections to the SDGs
Session 2A: Climate Change-Relevant Data for Agriculture, Forestry and Land Use

A view from FAO. PART I: FAOSTAT

PART II: DATA AND TOOLS FOR CD

- Present FAO Processes, data and tools in support of climate change analyses in crops, livestock, forestry and land use
Session 2A: Climate Change-Relevant Data for Agriculture, Forestry and Land Use

Discussion Points:

- What are the main data gaps for developing climate change statistics in AFOLU and where is support most needed

- Role of NSOs: How to improve national data coordination and facilitate climate change analysis and reporting

Thank You!
