The system of feedback from statistical surveys in BiH

Meeting of the Group of Experts on Business Registers organized jointly by UNECE, Eurostat and OECD

Brussels, 21-23 September 2015

Dženita Mustafić
Bosnia and Herzegovina (BiH) is administratively divided into two entities and one district: Federation of Bosnia and Herzegovina (F BiH), Republika Srpska (RS) and Brčko District.
Statistical System in BiH

Agency for Statistics of Bosnia and Herzegovina, Dženita Mustafić
Statistical Business Register in BiH

- kept and maintained by the Agency for Statistics of BiH in cooperation with two entity statistical institutes on the basis of administrative registers, other administrative sources and statistical surveys
Legal unit and enterprise – one enterprise is created for each legal unit
- Legal unit and the local legal unit
- Enterprise and local units - link between the enterprise and the main local unit and the enterprise and other local units
- Local legal units and local units of enterprise – one local unit may be created of several local legal units
Updating of SBR

Updating process of SBR is organized according to the complex administrative structure of Bosnia and Herzegovina:

• Updating of SBR, with data from administrative sources and feedback from statistical surveys, is done at the entities level and Brčko District.
• Regular quarterly updating SBR from administrative registers.
• Annually updating SBR with data from annual balance sheet (employment and turnover data).
• Updating SBR with data from the Central bank of BiH - active/inactive transaction accounts - twice a year.
• Updating SBR with data from statistical surveys.
• Start to update SBR with data obtained through special SBR survey.

Agency for Statistics of Bosnia and Herzegovina, Dženita Mustafić
Survey coordination

- Statistical surveys are carried out at the entities levels and Brčko District
- All changes in the SBR, must be performed in accordance with previously agreed procedures by the SBR team all three statistical institutions and may not be doing independently
Three major parts of the SBR model:

1. **Legal units and local legal units** – data from the administrative sources
2. **Enterprises and local units** - data on statistical units in line with the EU regulation
3. **Response units and observation units** - survey units

Data model
Survey side of SBR

- Search right is given to SBR and statistical surveys departments
- The monitoring of statistical activities that are based on response units
- For each statistical survey special list of units is designed that will suit the needs of specific statistics
- The right of the manual updates on the response units and observation units is allocated to the department in charge of the statistical survey the specific data belongs to
- The SBR team would ultimately decide who will make corrections on the enterprises and local units in the SBR
The survey system

SURVEY

RESPONSE UNIT

OBSERVATION UNIT

SURVEY INSTANCE

RESPONSE UNIT INSTANCE

OBSERVATION UNIT INSTANCE
Benefits...

Creating two-way information flows among the register and statistical surveys as well as between surveys in all three statistical institutions.

The data sharing among surveys and the register will be done in a consistent and systematic manner.

Collecting information centrally in order to get better statistical production.

Marking of burden on statistical units through surveys.
