Challenges in Modernising Statistical Production

Making it happen: Implementing the Strategy

Brian Pink
3 October 2012
Overview

1. Transform the vision to reality
2. What should the governance be?
3. How do we mobilise experts for joint projects?
4. How do we set the priorities?
5. Next Steps - Finalise GSIM
   - Plug and Play architecture
Transform the vision to reality

- Harness existing collaborations
- Small steps to reach big goals
- Spread the word
- Key messages
What’s the governance?

- Layered, co-ordinated, aligned with purpose
- Principles and operating guidance
- Stakeholder roles & responsibilities
Mobilise the experts

✓ Leadership is key

✓ Support the release of staff

✓ Facilitation and expert skills
Sprints

• Multidisciplinary, multiagency team of experts co-located

• Accelerated progress

• Professional input

• Promotion of GSIM

• Higher degree of acceptance
Setting priorities

• An annual list of key priorities, with timeframes

• Assign these to expert groups

• Monitor progress
What are the priorities?

• Greater use of International standards

• Accelerate work to develop common business models and frameworks

• Rationalised processes
  • Finalise GSIM
  • Plug and play architecture
“Plug and Play”

- Common architectural standards

- Standardised designs & solutions that are re-usable

- Flexibility and re-use of software components for statistical processes
