Importance and necessity of the next Global assessment of the statistical system in Kazakhstan in 2016 - 2017
Results of the Global Assessment of the statistical system of Kazakhstan in 2008

"... Statistical system in Kazakhstan today has very high standards and adheres to many international recommendations. All important international statistical classifications are in use... National statistical office of Kazakhstan is an example of good working standards, commitment to the basic principles of official statistics and international cooperation."

Report on the Global Assessment of the statistical system of Kazakhstan (UNECE, UNESCAP, 2008)
The main recommendations of the Global Assessment 2008

- Review of all laws regulating statistical activities in Kazakhstan
- Creating Statistical Council as an advisory body on state level
- Ensuring the confidentiality of statistical data
- Development of policy of statistical information dissemination
- Strengthening the coordinating role and obligations of Statistics of Kazakhstan
- Development of information system of classifications for maintenance and use of classifiers
Development of state statistics in the Republic of Kazakhstan.
2009 - 2014

• New law "On State Statistics" was adopted in 2010
• Since 2009 83 techniques have been improved (developed)
• All statistical tools have been reviewed, updated annually
• An integrated information system "e-statistics" was created
• Project KAZSTAT was launched in 2012
• Active international cooperation in the context of improving state statistics of Kazakhstan
Evaluation of the authorized body - Committee on Statistics

**Evaluation of the effectiveness of the Committee on Statistics**

- 2010 г. – 67,84 points
- 2011 г. – 75,88 points
- 2012 г. – 77,29 points
- 2013 г. – 83,9 points

Activities rated as highly effective

**An independent evaluation of the Center for Public Opinion Research**

(May, 2014)

High level of satisfaction of users of statistical information and activity statistics

**Mid-Term Evaluation of the Project KAZSTAT by independent international consultant**

(August, 2014 г)

Implementation and achievement of the objectives of the Project is estimated as:

fully satisfactory
Recommendations given in the evaluation for further improvement of the state statistics.

- Reduction of the differences between preliminary and reporting data
- Further automation of the processes of interaction with administrative sources
- Increased confidence to government statistics

These recommendations were taken into account when developing Strategic Plan for 2014-2018
Expected results of the project KAZSTAT

Adoption in the framework of the Project of more than 70 improved and new methods in different areas of statistics

Ensuring user satisfaction with quality statistics at least 80% level

Reduction of at least 15% of the total number of statistical reports provided by respondents

Reducing the time spent by enterprises to fill the forms of statistical reporting, by 15%
• **Why did we decide to ask for a new Global Assessment in 2016 - 2017?**

The decision to hold a Global Assessment in 2016 - 2017 made in connection with the terms of the Project KAZSTAT. It is planned to obtain a global assessment of the statistical system in Kazakhstan, taking into account the work done and achievements of the objectives of the Project.

• **How these results can be used?**

Recommendations resulting from the Global Assessment will be used to improve further the national statistics of the country, to improve the quality of statistics, introduce international practices and new methodological approaches.
THANK YOU FOR ATTENTION!
