## Geographic Disclaimer

The designations employed and the presentation of material in this publication do not imply the expression of any opinion whatsoever on the part of the secretariat of the United Nations concerning the legal status of any country, territory, city or area, or of its authorities, or concerning the delimitation of its frontiers or boundaries.

## Note

Trade in secondary processed wood products is becoming ever more important. As globalisation progresses, supply chains between the forest and the final consumer are becoming more complex, involving many intermediaries and long transport distances. Thus in order to have a proper understanding of sector trends it is essential to take into consideration the trade in secondary processed wood and paper products. This information has been collected in the context of the Joint Forest Sector Questionnaire for the past several years and data were published for the first time in 2004. We hope to publish available data from earlier years in a subsequent edition of this publication. We welcome your comments, which should be sent to the address below.

Although the data have been reviewed and controlled for incorrect or unusual values, the quality of the data is limited by the fact that some countries did not provide any data or provided only partial data, and by our decision that publishing the information we do have is preferable to keeping it unavailable while trying to perfect it.

## Definitions

The definitions and the associated Harmonised System (HS) trade classification codes are available below and a copy of the questionnaire can be found at the end of this publication. Further definitions can be found in the *Forest Products Statistics*.

## Data source

Data are provided through national correspondents who reply to the Joint Forest Sector Questionnaire, issued by ECE/FAO/Eurostat and ITTO. With the approval of national correspondents some data were also drawn from Eurostat's COMEXT database. The data on some paper products (items 12.2, 12.6 and subitems) have been strongly affected by the change from the HS 1996 classification, used in earlier years, to the HS 2002 classification used starting in 2002. The data before 2002 are not calculated on the same basis as the data after 2001.

In some cases, repeated data (identified with an R) are not identical to data from the preceding year. This is due to repeated national currency figures being converted using different exchange rate figures.

Data aggregation and processing was finalized in January 2006.

## Symbols and Abbreviations used

US \$ = US Dollar  
... = not available  
E = estimate by the secretariat  
R = figure repeated from the previous year  
C = automatic calculation

## Acknowledgements

We would like to thank the correspondents who provided data through the Joint Forest Sector Questionnaire as well as the members of the Intersecretariat Working Group on Forest Sector Statistics. These data would simply not be available without their contribution. A list of correspondents, along with contact details, can be found in the *Forest Products Statistics* publication. This publication could not have been produced without the enthusiastic work by Mr. Florian Steierer in reviewing and preparing the data for publication. His internship was made possible by support from the German Academic Exchange Service's Carlo Schmid Programme.

**Notes:**

The term "ex" means that there is not a complete correlation between the two codes and that only a part of the HS96/HS2002 or SITC Rev.3 code is applicable.

For instance "ex 811.00" under "Prefabricated buildings - of which made of wood" means that only a part of SITC code 811.00 refers to buildings prefabricated from wood, as that code does not distinguish between the materials buildings were prefabricated from.

In HS96/HS2002, 0 in the final (fourth or sixth) position means that all sub-headings are included: 49.00 includes all positions from 49.01 to 49.11.

In SITC Rev.3, if only 4 digits are shown, then all subheadings at lower degrees of aggregation are included: 892.2 includes 892.21 and 892.29
