NOTE

The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country, territory, city or area, or of its authorities, or concerning the delimitation of its frontiers or boundaries. Material in this publication may be freely quoted or reprinted, but acknowledgement is requested, together with a reference to the document number.

Any data provided under the heading "Yugoslavia" relate to the Federal Republic of Yugoslavia which, in accordance with General Assembly resolutions 47/1 and 47/229, cannot continue automatically the membership of the former Socialist Federal Republic of Yugoslavia.

ABSTRACT

The Report Forest Resources of Europe, CIS, North America, Australia, Japan and New Zealand (TBFRA-2000) presents the most recent and the best possible information on the forest resources of the fifty-five industrialized temperate/boreal countries, covering practically all aspects and functions of the forest. It presents validated national statistical data, adjusted to the TBFRA standards, graphs, tabular and textual information and analysis in the following specific thematic areas: areas of forest and other wooded land, ownership and management status, wood supply and carbon sequestration, biological diversity and environmental protection, forest condition and damage, and protective and socio-economic functions.

It also includes a section with an analysis of the reliability and comparability of the TBFRA data, an Executive Summary, as well as the methodological components of the study, including the enquiry, and terms and definitions.

ACKNOWLEDGEMENTS

The TBFRA-2000 work has been an immense team effort involving the co-operation of hundreds of people, and co-ordinated by the UN-ECE/FAO secretariat in Geneva. The secretariat would like to warmly acknowledge the indispensable contribution of the following major groups:

- The TBFRA National Correspondents and their staff and colleagues, listed in Appendix III of this Report;
- The members of the team of specialists on TBFRA-2000, led by Professor Michael Köhl (listed in Appendix IV), and the participants in the “Kotka III” Expert Consultation;
- The FAO Forestry Department, especially the global FRA team, led by Robert Davis and Peter Holmgren;
- Those who contributed resources, in money or in kind, to the Geneva secretariat work, including the Governments of Finland, Norway, Portugal, Sweden, Switzerland and United States of America;
- Partner organisations, including the European Environment Agency, the European Commission, the ICP Forests, WWF, JRC Ispra, the secretariats of the Conventions on Climate Change and Biodiversity, WCMC.
- The consultants who prepared the first drafts of the chapters and the data base: Nigel Dudley, John Innes, Pekka Kauppi, Kari Korhonen, Michael Köhl, Linda Langner, Jari Liski and Erkki Tomppo (see Appendix V). Particular thanks are due to Ines Costa Luz (Portugal) and Tuomas Hallenberg (Finland) who were both seconded by their governments to be full members of the secretariat team for a time. Several external experts also reviewed the draft chapters of the TBFRA-2000 Main Report.
- Peter Csoka, who designed the data base and developed it;
- Tim Peck, who contributed enormously to all stages of the project, questionnaire design, data validation, analysis and final presentation.

The UN-ECE/FAO team, led by Kit Prins, is responsible for the final quality of TBFRA-2000:

- Romi Chopra managed the TBFRA-2000 data base and produced the output with skill, precision and patience.
- Jari Varjo, whose post was funded by the Government of Finland, joined the team only in summer 1999, but nevertheless made a major contribution to the finalization of TBFRA and the launch of the follow-up.
- Alexander V. Korotkov led the whole TBFRA-2000 project with exemplary determination, patience and energy.
