

LIST OF MAIN TBFRA-2000 TABLES

<i>Table</i>	<i>Page</i>
CHAPTER I. Area of forest and other wooded land: status and changes	
1 Overall land classification and population.....	62
2. Forest and other wooded land: comparative data	63
3. Forest and other wooded land by species groups	64
4. Forest and other wooded land by species groups: comparative data	65
5. Forest available for wood supply by species groups and silvicultural categories.....	66
6. Forest not available for wood supply by species groups, silvicultural categories and reasons for non-availability	67
7. Changes over time in area of forest and other wooded land	68
8. Changes over time in area of forest available and not available for wood supply.....	69
 CHAPTER II. Ownership and management status of forest and other wooded land	
9. Ownership and management of forest and other wooded land in total.....	107
10. Ownership and management of forest and other wooded land in total: comparative data.....	108
11. Ownership of forest and of other wooded land.....	109
12. Ownership of forest available for wood supply	110
13. Ownership of forest and of forest available for wood supply: comparative data	111
14. Managed forest and other wooded land by ownership categories.....	112
15. Managed forest available for wood supply by ownership categories	113
16. Managed forest (total) and FAWS by ownership categories: comparative data	114
17. Ownership and management of forest not available for wood supply.....	115
18. Areas and number of holdings of forest and other wooded land.....	116
19. Area of holdings of forest and other wooded land in public ownership by size classes.....	117
20. Area of holdings of forest and other wooded land in private ownership by size classes	118
21. Area of holdings of forest in public ownership by size classes.....	119
22. Area of holdings of forest in private ownership by size classes.....	120
23. Number of holdings of forest and other wooded land in public ownership by size classes ...	121
24. Number of holdings of forest and other wooded land in private ownership by size classes ..	122
 CHAPTER III: Wood supply and carbon sequestration: status and changes	
25. Uneven-aged and even-aged high forest available for wood supply: total of all species groups.....	172
26. Uneven-aged and even-aged high forest available for wood supply: predominantly coniferous.....	173
27. Uneven-aged and even-aged high forest available for wood supply: predominantly broadleaved.....	174
28. Uneven-aged and even-aged high forest available for wood supply: mixed	175
29. Age-class distribution of even-aged high forest available for wood supply: total of all species groups.....	176
30. Age-class distribution of even-aged high forest available for wood supply: predominantly coniferous.....	177
31. Age-class distribution of even-aged high forest available for wood supply: predominantly broadleaved.....	178
32. Age-class distribution of even-aged high forest available for wood supply: mixed.....	179
33. Standing volume of trees (growing stock and dead trees).....	180
34. Growing stock.....	181

35.	Growing stock on forest by species groups	182
36.	Growing stock on forest available for wood supply: comparative data.....	183
37.	Changes over time in growing stock on forest and forest available for wood supply	184
38.	Changes over time in growing stock on forest available for wood supply by species groups.	185
39.	Volume of dead trees in standing volume	186
40.	Total woody biomass	187
41.	Above-stump woody biomass of trees on forest.....	188
42.	Gross and net annual increment: general data	189
43.	Gross annual increment on forest by species groups.....	190
44.	Natural losses (annual) on forest.....	191
45.	Net annual increment on forest by species groups	192
46.	Net annual increment on forest available for wood supply: comparative data.....	193
47.	Annual fellings overbark	194
48.	Annual fellings overbark on forest by species groups.....	195
49.	Annual removals overbark on forest.....	196
50.	Annual removals underbark, total	197
51.	Annual removals underbark on forest by species groups.....	198
52.	Fellings and removals on forest available for wood supply: comparative data.....	199

CHAPTER IV. Biological diversity and environmental protection

53.	Forest and other wooded land by categories of “naturalness”	244
54.	Forest and other wooded land by categories of “naturalness”: comparative data	245
55.	Protection status: Forest and other wooded land in IUCN protection categories I to VI and forest not available for wood supply for conservation/protection reasons.....	246
56.	Reported number of species (total and forest-occurring), of which endangered: Trees	247
57.	Reported number of species (total and forest-occurring), of which endangered: Vascular plants other than trees	248
58.	Reported number of species (total and forest-occurring), of which endangered: Ferns.....	249
59.	Reported number of species (total and forest-occurring), of which endangered: Mosses.....	250
60.	Reported number of species (total and forest-occurring), of which endangered: Lichens	251
61.	Reported number of species (total and forest-occurring), of which endangered: Mammals.....	252
62.	Reported number of species (total and forest-occurring), of which endangered: Birds	253
63.	Reported number of species (total and forest-occurring), of which endangered: Other vertebrates (fish, amphibians and reptiles).....	254
64.	Reported number of species (total and forest-occurring), of which endangered: butterflies & moths.....	255
65.	Annual averages of area of regeneration and extension of forest and natural colonization of other wooded land over ten-year period	256
66.	Forest regenerated by natural regeneration, natural regeneration enhanced by planting coppice sprouting, and planting or seeding over ten-year period	257
67.	Extension of forest (afforestation and reforestation of other wooded land).....	258
68.	Types of regeneration and extension of forest (share of annual average area over ten-year period)	259
69.	Origin of planting material used in the forest	260

CHAPTER V: Forest condition and damage to forest and other wooded land

70.	Area of damage to forest and other wooded land.....	316
71.	The heaviest annual damage by known causes which occurred in most recent ten-year period	317
72.	Forest fires: number.....	318
73.	Forest fires: total area burned.....	319
74.	Forest fires: area of forest burned.....	320
75.	Forest fires: area of other wooded land burned	321

<i>Table</i>	<i>Page</i>
76. Forest condition: percentage of all tree species showing defoliation of 25 per cent or more (classes 2, 3 and 4).....	322
77. Forest condition: percentage of coniferous species showing defoliation of 25 per cent or more (classes 2, 3 and 4)	323
78. Forest condition: percentage of broadleaved species showing defoliation of 25 per cent or more (classes 2, 3 and 4)	324

CHAPTER VI: Protective and Socio-economic Functions

79. Areas where forest and other wooded land is managed primarily for soil protection	358
80. Changes over time in areas where forest and other wooded land is managed primarily for soil protection	359
81. Area of forest and other wooded land where access to public is legally allowed and not allowed.....	360
