Guidance to Work Area 1
Forest Products Marketing
No significant changes to the format and structure of the Review

Special chapter will be on trade barriers

The aim is to have copies printed for LAS2017, but given the early meeting date, it is going to be very tight

Almost impossible to get an early start without getting JFSQ data and secured funding earlier

French translation continues to be very late

Thank you to:
  - the Russian Federation for providing (funding)
  - the ToS on Sustainable Forest Products (proofing and referral)
  - Helsinki University (Finnterns)
  - JFSQ correspondents
  - Authors and partners
Key questions on data assessment for guidance and discussion

The Working Party is invited to:

- Comments on the quality and timeliness of the *Forest Products Annual Market Review*
- Make suggestions regarding the coverage of forest products markets, e.g. are there any topics where coverage is too light, or emerging topics that are being ignored
Thank you!

Matthew Fonseca
