Item 3(e) of the provisional agenda

**Committee on Forests and the Forest Industry matters:
programme of Work and publications 2018-2019****Food and Agriculture Organization****European Forestry Commission****Thirty-ninth session**

Warsaw, 9-13 October 2017

**Programme of work of the subprogramme for
2018-2019****Note by the Secretariat****I. Introduction**

1. The present document sets out the draft programme of work of the Forestry and Timber subprogramme (“the subprogramme”) for 2018–2019. The Committee on Forests and the Forest Industry (“the Committee”) is invited to adopt it and recommend to the Executive Committee of the United Nations Economic Commission for Europe (UNECE EXCOM) for approval. Any subsequent additional, discontinued or carried over outputs will be reflected in the Integrated Monitoring and Document Information System (IMDIS) used by the Secretariat for the planning, monitoring and reporting on the implementation of the subprogramme. The results of the implementation of the programme of work will be submitted to the Committee in the Programme Performance report for the biennium 2018–2019.

2. The draft programme of work applies a results-based management (RBM) approach, a broad management approach which establishes a logical relationship between the hierarchical results (outputs – outcomes – impact) known as ‘results chain’, the resources (human and financial) known as ‘inputs’ and the external factors (strategic, governance, operational, financial) which can prevent from achieving the objective.

3. The outputs/activities in the draft programme of work correspond to those contained in the ECE proposed programme budget for 2018–2019. They fall into the following main categories: (a) meetings and related parliamentary documentation; (b) other substantive activities; and (c) technical cooperation, including advisory services, training courses, seminars, workshops, and field projects.

4. The outcomes/expected accomplishments, with corresponding indicators of achievement and performance measures are presented in Annex I in the form of a logical framework.

5. The details of the proposed publications are provided in Annex II. The overall ECE legislative mandates and those specific for the subprogramme are listed in Annex III.

II. Objective, strategy and external factors

6. The objective of the subprogramme is to strengthen sustainable management of forests in the ECE region.

7. The responsibility for the subprogramme is vested in the Forests, Land and Housing Division. The subprogramme develops and applies analytical and monitoring tools to support evidence-based policymaking on sustainable forest management and the sustainability of forest industry. The subprogramme collects, validates and disseminates information and the results of research and analysis; facilitates the exchange of national experiences and best practices and monitors progress on key forest-sector indicators. The subprogramme provides a platform for policy dialogue on related issues while taking into account a rapidly changing policy environment, notably in climate change and bioenergy. Implementation of the Action Plan for the Forest Sector in a Green Economy will contribute to promoting the role of the forest sector in a green economy and in mitigation and adaptation to climate change.

8. The subprogramme promotes the sustainable management of forests and the sound and legal use of forest products (including raw material, energy, and forest ecosystem services), based on appropriate policies and institutions. Priorities for 2018-2019 will be guided primarily by the outcomes of the joint session of the ECE Committee on Forests and the Forest Industry and the FAO European Forestry Commission (Las2017). The subprogramme supports the implementation in the ECE region of the UN Strategic Plan for Forests (2017-2030) and the related Global Forest Goals approved by the General Assembly in April 2017 (see A/RES/71/285). The subprogramme also supports the development of cross-sectoral and cross-institutional policies promoting sustainable forest management, and enhanced forest governance in line with the 2030 Agenda for Sustainable Development, by supporting sustainable management of forests and the sustainability of the forest industry, by monitoring the status of forests and forest products and their effect on climate change mitigation, biodiversity conservation, provision of sustainable energy and fibres, etc.

9. As part of the implementation strategy of the subprogramme, ECE carries out its work in partnership with FAO, and in cooperation with the European Forest Institute, Forest Europe and other relevant regional organizations. The subprogramme provides regular input to the United Nations Forum on Forests and the FAO Committee on Forestry.

10. To support forest management, including the provision of forest services and the use of wood and forest products which are ecologically, economically and socially sustainable, the subprogramme: (a) encourages all relevant stakeholders to participate in and implement the activities of the subprogramme and (b) takes a cross-sectoral approach to ensure that the strategy is well integrated into the policy framework of other sectors. Achieving sustainable forest management is primarily a national responsibility, so the subprogramme and its partners support national-level efforts by: (a) developing and disseminating concepts, information and specific studies, (b) sharing experiences and capacity-building and (c) by defining measurement standards and policy tools.

11. External factors on which the supprogramme relies on are the (a) active country and stakeholder participation; (b) partnership with the Food and Agriculture Organization of the United Nations (FAO), including the provision of staff and non-staff resources, to implement the integrated ECE/FAO programme in this field; and (c) in kind and cash support from member States to the implementation of planned activities.
