

## Specialized Section on Standardization of Fresh Fruit and Vegetables

Sixty-first session

Geneva, 30 April – 3 May 2013

Item 4(a) of the provisional agenda

**Revision of UNECE standards**

### UNECE Standard for Apples (FFV-50) (2011)

#### Proposal by Germany

The delegation of Germany has submitted the following proposal to revise the list of varieties in the UNECE Standard for Apples (2011):

In 2011, the provision on labelling the variety was amended to read:

“The name of the variety can be replaced by a synonym. The name of the mutant or a trade name can only be given in addition to the variety or the synonym.”

With respect to this provision, it is necessary to restructure the list of varieties:

Mutants having the status of a variety should be moved from the column “mutant” to the column “variety” and add the correct colour group.

Mutants that do not have the status of a variety should be deleted.

The provision on labelling mutants is for those mutants only that do not have the status of a variety and are not known. Thus, the column “mutants” can be deleted.

If this is agreed, as shown in the table below, the list of varieties must be reorganised in the correct alphabetical order.

In addition, it is proposed to accept some new varieties and new trademarks.

Variety	Mutants	Synonyms	Trademarks	Colour group	Russeting
African Red			African Carmine <sup>TM</sup>	B	
Akane		Tohoku 3, Pri-merouge		B	
Alborz Seedling				C
