Definitions

The Working Party on Technical Harmonization and Standardization Policies,

Recognizing that internationally agreed general terms and their definitions are indispensable for developing international cooperation in standardization and related activities;

Recalling that the international work on definitions has been initiated at the UNECE;

Noting also that ISO/IEC Guide 2:2004 and ISO/IEC standard 17000:2004 “were prepared in close cooperation and with contribution from standards-setting bodies of the UNECE member States;

Emphasising that the World Trade Organization Agreement on Technical Barriers to Trade makes an explicit reference to the ISO Guide 2:1991 as a basis for definitions to be used by Governments, thus necessitating regular updating of legal and other documents making reference to international documents on definitions;

Considering that the said Guide and standard well meet the requirements of the UNECE Governments and other United Nations Governments for an international terminology for standardization and related activities;

Has agreed to recommend that:

J.3 UNECE Governments and other United Nations Governments should promote the use of the terms in ISO/IEC Guide 2:2004 and in standard ISO/IEC 17000 and as defined in national legislation, standardization and related activities as well as in relevant international cooperation.

---

1 Recommendation adopted in 1988 and revised in 2006.

2 The work on definitions started at the beginning of the 1970s under the auspices of the ECE Group of experts (“Government Officials Responsible for Standardization” – a predecessor body of the Working Party on Regulatory Cooperation and Standardization Policies (WP6)). It continued later on as a joint activity with ISO (and then it was finally transferred to ISO) to be published in 1976 as the first guide on definitions - ISO Guide 2 “General terms and their definitions concerning standardization and related activities”.
