DYNAMIC OF NATIONAL STANDARDS UPDATING IN RUSSIA
Russian Federation Minister M. Abyzov, Russian Minpromtorg (D. Manturov), Rosstandart (G. Elkin) together with interested federal authorities and with the participation of the all-Russian employers' organizations discuss with members of the Expert Council under the Government of the Russian Federation provide the discussing of the draft of Federal law “On Standardization" in the Russian Federation and develop the draft of the roadmap for its realization.

To report on the results to the Government of the Russian Federation until February 1, 2013
1. Documents for standardization must apply directly or by linking to them in the legislative and normative legal acts of the Russian Federation and other normative instruments.

2. Compliance with the requirements of documents for standardization or their individual provisions should become obligatory:

   - for all economic entities, if this is set into the legislative and normative legal acts of the Russian Federation, normative documents of executive federal bodies and technical regulations;

   - for the parties to the agreement (contract) for the development, production or supply of goods, delivery of services, if the reference is made to the documents for standardization;

   - for a manufacturer or supplier of goods (works, services) when it adopted Declaration of the conformity of products (works, services) that references to documents for standardization applied to the marking or other documentation;

   - for a manufacturer or supplier if the products (works, services) are certificated for compliance with standardized documents.
1. Recognition of results of conformity assessment procedures carried out in any WTO member countries without concluding mutual recognition agreements.

2. The creation of the single national accreditation body and its membership in ILAC and IAF targeting to mutual recognition of Russian conformity assessment results.
INTERACTION OF INTERNATIONAL AND NATIONAL ORGANIZATIONS FOR STANDARDIZATION

RSPP Committee for technical regulation, standardization and conformity assessment actively engages with international and national standardization organizations.
THE CREATION OF TF 8 “TECHNICAL REGULATION”

Objective of the Task Force 8:
Formulate Industry’s Requirements and Priorities in EU - RF harmonized Technical Regulation to …

1. Future cooperation on the harmonization of technical requirements and decreasing of technical barriers.
2. Strive for EU-RF common market space.

Dr. Hans-Jörg Grundmann, Siemens AG
Sherpa: M. Reigl, for regulatory subjects coverable by Siemens

Dr. Dmitry Pumpyianskiy, TMK
Sherpa: A. Lotsmanov, RSPP

IRT/TF 8 RESULTS

In 2012 year by IRT/TF 8 was done the following work:

• Were prepared recommendations on the approximation of regulatory systems of Russia and the EU on **16 industry and common areas**. 
• The recommendations were for **230 pages**.

• In the drafting of recommendations participated **90 experts** from Russia and the EU countries.
• More than 40 documents have been translated from Russian to English and from English to Russian.

• Total sum of translations is amounted more than **3500 pages**.
• **40 bilateral** meetings were held between Russian and European experts..
The Recommendations on the approximation of technical legislation of Russia, the Customs Union and the EU have been done taking into account the interests of the industry.

The Mutual recognition Agreement between CEN/CENELEC and Rosstandart has been prepared taking into account the proposals of the Russian and European industries and opening the way for joint work on standards.

Union of industrialists and entrepreneurs of Russia, Kazakhstan and Belarus were supported by European industry to establish jointly with ORGALIME Council for standardization.

IRT/TF 8 Recommendations were downloaded in UN/ECE WP 6 web-site: http://www.unece.org/trade/wp6/welcome.html
September 17, 2013 in St. Petersburg hosted the signing of a cooperation agreement between CEN/CENELEC and Rosstandart.

The new agreement will allow to:

1. Russian and European industry jointly develop standards that take into account climatic, geographical conditions and technological features.
2. Make European standards more useful by Russian industry, which will facilitate the access of European companies on the domestic Russian market.
3. Use European standards upon their acceptance as national in Russia as evidence of technical regulations of the Customs Union.
Initiative by SIEMENS AG and Schneider Electric to establish a Council on technical regulation in order to continue the work begun within IRT/TF 8 and expansion of the initiative to the territory of the Customs Union, was supported by the RSPP BELAPP and Union Atameken.
THE CREATION OF THE COUNCIL BETWEEN “BUSINESS DIALOGUE” AND ORGALIME ENABLES:

1. To continue work on harmonizing of the legislation of the Customs Union and EU begun under IRT/TF 8.

2. Establish new ties and expand cooperation on the development, coordination and harmonization of standards and conformity assessment procedures.

3. To ensure the participation of industry in the implementation of the CEN/CENELEC-Rosstandard agreement.

1. Synchronization and simplification of the procedures for exports and imports of goods between the two economic unions.
From 16 to 21 September, 2013 in Sankt-Parkesburg were held the events of 36th General Assembly of International Standardization Organization (ISO) organized by Rosstandart.
04.10.2013
