THE CREATION OF AN EFFECTIVE SYSTEM
OF STATE CONTROL (SURVEILLANCE)

Vyacheslav Burmistrov
Deputy Director
Department for Technical Regulation and Accreditation
Eurasian Economic Commission
MAIN OBJECTIVES

I. Elimination of technical barriers to trade

II. Protection of the market from unsafe products

III. Improving the quality and competitiveness of products
THE MAIN TASKS OF STATE CONTROL

1. **TO UNIFY** THE PRINCIPLES OF RECALLING THE NON-COMPLIANT PRODUCTS

2. **TO CREATE** THE MECHANISM OF INTERACTION OF SURVEILLANCE BODIES THROUGH THE INTEGRATED INFORMATION SYSTEM OF THE UNION

3. **TO APPLY** A RISK-BASED APPROACH IN THE UNION

4. **TO DECREASE** UNREASONABLE EXCESS OF POWERS OF STATE SURVEILLANCE AUTHORITIES

5. **TO CONSIDER** THE RESULTS OF STATE SURVEILLANCE FOR PLANNING AND TAKING MEASURES
The State control (surveillance) shall be carried out in accordance with the legislation of the Member-States.

Agreement (draft)

«On Harmonization of State Control (Surveillance)»
(EEC Board Decision of March 14, 2017 No. 21)

- Procedure for cooperation between state control (surveillance) bodies
- Procedure for resolving disputes between bodies (authorities)
- Applying a risk-based approach in organizing of state control
- Alerting system for unsafe (non-compliant) products
- General principles of recalling of unsafe (non-compliant) products

National state control (surveillance) procedures

Based on international norms and best practices
Agreement «On Harmonization of State Control (Surveillance)»

1. The functionality of the control/surveillance based on common approaches and rules
2. Prohibition of release and circulation, as well as recall of non-compliant products from the EAEU market
3. Implementation of a risk-based approach
4. Alerting system for unsafe products
5. Analytical data
ALERTING SYSTEM FOR UNSAFE PRODUCTS (EAEU PILOT PROJECT)

EEC Board Decision of May 10, 2018 № 74

EAEU INTEGRATED INFORMATION SYSTEM

Alerting system for unsafe products

National part of the information on unsafe products

National part of the information on unsafe products

«On Safety of Low Voltage Equipment» (CU TR 004/2011)
«On Safety of Products for Children and Adolescents» (CU TR 007/2011)
«On Safety of Toys» (CU TR 008/2011)
«On Safety of Wheeled Vehicles» (CU TR 018/2011)
«On Safety of Milk and Dairy Products» (CU TR 033/2013)
«On Safety of Meat and Meat products» (CU TR 034/2013)
The draft technological documents for information exchange between state control (surveillance) bodies through the Union integrated information system are developed.

Software components of basic implementation of the pilot project are developed (for application in the national segments of the Member States in the integrated system).

Additional services of the pilot project in the segment of the Commission are being designed.
IMPLEMENTATION STAGES OF THE EAEU PILOT PROJECT

1. Regulatory support of the pilot project
   - Development and coordination of the master structure
     - EEC Board Decision of November 12, 2018 № 182 “On approval of the temporary procedure of interaction between the authorized bodies of the Eurasian Economic Union Member States and the Eurasian Economic Commission in the implementation of the pilot project on the forming of a system of information about products that do not meet the requirements of the technical regulations of the Eurasian Economic Union”

2. Technological and technical support
   - Revision of the process model taking into account the master structure
     - a) process documents (GP 37)
     - b) development of Commission services;
     - c) development of software components

3. Test operation
   - d) transfer of software components;
   - d) development (revision) of the information systems of the authorized bodies

4. Summing up of the pilot project results
   - (a) Integrated testing
   - b) Test operation

Timeframe:
- November 2018 - March 2019
- March 2019
- April 2019
- May 2019
- June 2019
- July 2019
- September 2019
Опасная продукция

С 2018 года запущен проект по формированию системы информирования о продукции, не соответствующей требованиям технических регламентов Евразийского экономического союза. Данная система позволяет странам ЕАЭС оперативно обмениваться информацией о тоннах, причинах для приостановления, ограничения реализации или использования продукции, представляющей серьезный риск для здоровья и безопасности потребителей.

Выявленная опасная продукция за последние 7 дней

Перечень технических регламентов

- TP TC 004/2011 О безопасности низковольтного оборудования
- TP TC 007/2011 О безопасности продукции, предназначенной для детей и подростков
- TP TC 008/2011 О безопасности детских игрушек
- TP TC 018/2011 О безопасности колесных транспортных средств
The General interface of the data card of GP 37, 40, 57 is used.

The information will vary depending on the data.
✓ From the data card on dangerous products, you can navigate to other related registries.

After a click you go to the document entry card in the unified register of the issued or approved documents on conformity assessment.

After a click you go to the entry card about the organization, which issued the document on conformity assessment.
