E-TIR International Center

E-TIR Returns
E2: Registration Results
E4: Cancellation results
E6: Query Results
The diagram illustrates the processes involved in the PILOT e-TIR SYSTEM. Here is a breakdown of the key points:

- **Holder** can use the TIR EPD module to declare his declarations, which include the E9: Advance Cargo Information Message data.
- IRU sends the Holder's Declaration to the eTIR system via EDI or web Services, which include the E9: Advance Cargo Information Message.
- Customs sends the I7: Record Advanced Cargo Information Message.
- Customs can use the Customs Declaration Module which includes the E9: Advance Cargo Information Message data.
- Holder can use the eTIR Web Interface to send Declarations to the eTIR system via EDI or web Services or use the eTIR Web Interface.
- I3: Get Holder information.

The diagram also indicates that B2C, C2C, and B2B routes are either out of scope or not decided yet.
