**Sub-Committee of Experts on the  
Transport of Dangerous Goods**  
(Nineteenth session,  
2-6 July 2001, agenda item 2)

**Additional provisions for the transport of gases**

**Business plans of ISO technical committees open to public review**

The business plans drawn up by the technical committees which develop ISO standards can be accessed from the following location :

<http://isotc.iso.ch/livelink/livelink/>

ISO invites members of the public and special interest groups to review any of these plans on business sectors or technological areas they are interested in and to provide their comments. This input can be given directly to the secretary of the technical committee concerned by clicking on Send e-mail. All comments received will be considered by the committee.

ISO standards are developed within nearly 190 technical committees, each of which deals with a specific area of technology. ISO has requested each committee to develop a business plan to guide its work programme. The objectives are to require the technical committee to analyse conditions and trends in the market sector which it serves and explicitly to link its work programme with the sector's requirements. This exercise is expected to generate clear priorities for which standards are needed, the target dates for their completion and what resources are needed to do the job, as well as identifying the benefits that the standards will provide. Since the general public and special interest groups may not have the opportunity - or the desire - to participate directly in the development of standards, reviewing the business plans nevertheless allows them to contribute and to help ensure the broadest possible input into ISO's standardization work.

The business plans of the following ISO technical committees have been posted on this site and are now available for public review :

**ISO/TC 58 *Gas cylinders***  
**ISO/TC 197 *Hydrogen technologies***  
**ISO/TC 220 *Cryogenic vessels***

Experts of CETDG might like to submit comments to the responsible ISO/TC secretary with a copy to the ISO Central Secretariat at one of the following addresses :

François Abram <[abram@iso.ch](mailto:abram@iso.ch)>      Phone    : + 41 22 749 72 69  
ISO Central Secretariat      Telefax : + 41 22 749 73 49    (in case of TC 58 and 220)

or

Alain Samné <samne@iso.ch>  
ISO Central Secretariat

Phone : + 41 22 749 72 76  
Telefax : + 41 22 749 73 49 (in case of TC 197)
