

PROPOSAL FOR DRAFT AMENDMENTS TO REGULATION No. 110

Note: The text reproduced below was prepared by the experts from ENGVA in order to amend ECE/TRANS/WP.29/GRPE/2006/6.

A. PROPOSAL

Annex 4F, paragraph 1.1., amend to read:

"1.1. The refuelling connector (receptacle) for light duty vehicles (classes M1 and N1 vehicles), designed for service ..."

B. JUSTIFICATION

The amendment eliminates any confusion about to which categories of vehicles the fuelling connector proposed is suited, as the definition "for light-duty vehicles" is not completely clear and precise.
