

## Provide information on the necessity of displacement alternative to gap limit

- It is preferable to provide alternative requirements equivalent to para. 5.9 and 5.11 of ECE R17 in order to preserve the **rear view** broadening possibility while ensuring **rear seat** functionality

- 5.9. In the case of head restraints adjustable for height one or more gaps, which regardless of their shape can show a distance "a" of more than 60 mm when measured as described in paragraph 6.7. below, are permitted on the part of the device serving as a head restraint provided that, after the additional test under paragraph 6.4.3.3.2. below, the requirements of paragraph 5.11. below are still met.
- 5.11. The head restraint and its anchorage shall be such that the maximum backward displacement  $X$  of the head permitted by the head restraint and measured in conformity with the static procedure laid down in paragraph 6.4.3. below, is less than 102 mm.
