

## Dynamic Test

### Next steps

#### Definition static/non-static

- if static, backset  $\leq$  [55] mm
- if non-static, backset  $\leq$  [80] mm

- Need definition for static or non static seat – OICA (late Jan 2007)
- Need Status of current research/Action plan for Phase 2- Japan (late Jan for first draft)
- Need justification for non-static backset limit – France (Feb 2007)

## Backset

### Next Steps

#### Inclusion of R-point method submitted by OICA (HR-8-2)

- Editing of test procedure – OICA (Dec 2006)
- Validating Test Procedure – OICA/JASIC
  - will use same test procedure
- (JASIC will provide timeline by Dec 2006)
- (OICA to provide timeline by Jan 2007)
- (US to provide estimate for number of tests needed for a good statistical analysis – Dec 2006)
  - Repeatability/Reproducibility
  - Data to include backset measured from R-point and H-point
- Analysis of data – US (2-weeks after receipt of data)

## Contact Surface of Head Restraint

- NL to provide definition, requirements, how to test (Jan 2007)
