

<Principle of ECE Regulation >

(1) Social Demand

Existence of social necessity for Safety and/or Environmental issue

→Main issues are safety and CO2 reduction

(2) Minimum Requirement

Regulation has to be reasonable from Cost/Benefit point of view

→It is necessary to confirm Cost/Benefit

(3) Performance Requirement

“Performance requirement” as much as possible not to prevent technical progress (design flexibility)

→It is necessary to make the requirement with this philosophy

(4) Globally Harmonized Regulation

Avoid the Technical Barriers to Trade.

→FMVSS138 will be appropriate as the base document
