**Marking of Top Tether Anchorage Locations**

GRSP, 41st session, 7-11 May 2007  
Ronald Vroman
Top tether anchorage points

Current situation
- Often no information present
- Top tether anchorages come in different shapes
- Top tether anchorages are found at different locations in cars

- Some examples:

Top tether anchorage points

- Top tether maximises protection from universal Isofix CRS
- Requires consumer to find top tether during installation
- New feature: consumer needs clear information
  - Permanently in the vehicle
  - Identify anchorage
  - Differentiate from luggage loops
Confusion over tether anchorage point

Tether anchorage point appears unmarked
Marking on tether visible from low down

Top tether and luggage loop
Limited clearance around tether...

Only one orientation.....
Car B

.....allows tether to be fastened

Confusion over tether anchorage point
Car F

Actual tether anchorage but unmarked

Car G

Top tether anchorage, contrasting pictogram on hinged cover in roof line
Car G

*Top tether anchorage exposed*

Car F

*Top tether anchorage point in parcel shelf*
Summing up

Top tether anchorage points:
- Different locations in cars
- Different shapes
- Confusion with luggage straps etc
- Adequate marking needed
