This proposal has been prepared by the experts from the European Commission in order to update the requirements of UNECE Regulation No. 85

A. PROPOSAL

Proposal for Supplement 5 to ECE Regulation No. 85

Content – Annexes, amend to read:

"Annex 1 - Essential characteristics of the internal combustion engine and information concerning the conduct of tests .................................................................
Annex 2 - Essential characteristics of the electric drive train and information concerning the conduct of tests .................................................................
Annex 3a - Communication concerning the approval or extension or refusal or withdrawal of approval or production definitely discontinued of a drive train type pursuant to Regulation No. 85
Annex 3b - Communication concerning the approval or extension or refusal or withdrawal of approval or production definitely discontinued of a vehicle type with regard to the drive train type pursuant to Regulation No. 85
Annex 4 - Arrangements of approval marks .................................................................
Annex 5 - Method for measuring internal combustion engine net power ......................
Annex 6 - Method for measuring net power and the maximum 30 minutes power of electric drive trains .................................................................
Annex 7 - Checks on conformity of production"

Paragraph 1.2., amend to read:

"1.2. The internal combustion engines belong to one of the following categories:

Reciprocating piston engines (positive-ignition or compression-ignition), but excluding free piston engines;

Rotary piston engines (positive-ignition or compression ignition).

Naturally aspirated or supercharged engines."

Insert new paragraph 2.4., to read:

"2.4. "Maximum net power" means the maximum value of the net power measured at full engine load."

Paragraphs 2.4. to 2.5.3. (former), renumber as paragraphs 2.5 to 2.6.3

Insert new paragraph 2.7., to read:
"2.7. "Standard-production equipment" means equipment provided by the manufacturer for a particular application."

Paragraph 4.3., amend to read:

"4.3. Notice of approval or of extension or of refusal of approval of a drive train type pursuant to this Regulation shall be communicated to the Parties to the 1958 Agreement applying this Regulation by means of a form conforming to the model in annex 3a to this Regulation."

Insert new paragraph 4.4., to read:

"4.4. Notice of approval or of extension or of refusal of approval of vehicle type with regard to the drive train type pursuant to this Regulation shall be communicated to the Parties to the 1958 Agreement applying this Regulation by means of a form conforming to the model in annex 3b to this Regulation."

Paragraphs 4.4. to 4.8. (former), renumber as paragraphs 4.5. to 4.9.

Paragraph 5.2.2., amend to read:

"5.2.2. Measurements shall be taken at a sufficient number of engine speeds to define correctly the power curve between the lowest and the highest engine speeds recommended by the manufacturer. This range of speeds must include the speeds of revolution at which the engine produces its maximum power and its maximum torque. For each speed, the average of at least two stabilized measurements is to be determined."

Paragraph 5.2.3.3.2., amend to read:

"5.2.3.3.2. In the case of an engine without self-adaptive fuelling:

The fuel used shall be the one available on the market with a Wobbe index at least 52.6 MJm\(^{-3}\) (0°C, 101.3 kPa). In case of dispute the fuel used shall be the reference fuel G20 specified in annex 8, i.e. the fuel with the highest Wobbe Index, or"

Paragraph 5.2.3.3.3., amend to read:

"5.2.3.3.3. In the case of an engine labelled for a specific range of fuels:

The fuel used shall be the one available on the market with a Wobbe index at least 52.6 MJm\(^{-3}\) (0°C, 101.3 kPa) if the engine is labelled for the H-range of gases, or at least 47.2 MJm\(^{-3}\) (0°C, 101.3 kPa) if the engine is labelled for the L-range of gases. In case of dispute the fuel used shall be the reference fuel G20 if the engine is labelled for the H-range of gases, or the reference fuel G23 if the engine is labelled for the L-range of gases, i.e. the fuel with the highest Wobbe Index for the relevant range, or"

Insert new paragraph 5.2.3.5., to read:
"5.2.3.5 Positive ignition engines of vehicles that can run either on petrol or on a gaseous fuel, are to be tested with both fuels, in accordance with the provisions in items 5.2.3.1 to 5.2.3.3. The vehicles that can be fuelled with both petrol and a gaseous fuel, but where the petrol system is fitted for emergency purposes or starting only and of which the petrol tank cannot contain more than 15 litres of petrol will be regarded for the test as vehicles that can only run a gaseous fuel."

Paragraph 5.2.5., amend to read:

"5.2.5. The test report shall contain the results and all the calculations required to find the net power, as listed in the appendix to annex 5 to this Regulation together with the characteristics of the engine listed in annex 1 to this Regulation. In order to draw up this document, the competent authority may use the report prepared by an approved or recognized laboratory pursuant to the provisions of this Regulation."

Annex 1, amend to read:

"Annex 1

The following information, if applicable, must be supplied in triplicate and include a list of contents. Any drawings must be supplied in appropriate scale and in sufficient detail on size A4 or on a folder of A4 format. Photographs, if any, must show sufficient detail.

If the systems, components or separate technical units have electronic controls, information concerning their performance must be supplied.

B. JUSTIFICATION

In order to simplify the legislative framework and to reduce the administrative burden and the cost of approvals for manufacturers, the European Commission, following the recommendations of the High Level Group on the CARS21 (Competitive Automotive Regulatory System for the 21st century) program, is repealing a number of Directives by making reference to the technical provisions in the equivalent Regulations in the UNECE framework.

In that context, Directive 80/1269/EEC will be repealed and their main provisions incorporated in the new legislation regarding pollutant emissions from passenger cars and light duty vehicles (stages Euro 5 & 6) and heavy duty vehicles (stage Euro VI). Therefore, it is necessary to update the technical provisions and requirements of ECE Regulation No. 85 in order to align them with the corresponding to the above mentioned directive.
