NELTI Web Site

IRU Projects on revitalisation of the Great Silk Road

This web site carries information on the implementation of the project to develop international freight by road transport along the Great Silk Road, an ancient international transport route which over the centuries connected Europe and Asia.

The revival has become possible in the 21st century owing to the progress achieved in road transport technology, development of the network of modern highways, and the measures taken by international organisations and national governments to simplify border-crossing procedures.
