

SAE Exterior Sound Level Committee

D. Moore

August 20, 2009

Minimum Noise

- SAE J2889-1 draft has reached the point where the technical issues are clear and the standard is not expected to change in any significant way.
- Further work on editorial revisions and informational annex

ISO 10844

- GM and Honda expressed some interest in participation. Will prepare project plan.
- ISO 10844 itself will submit a draft for DIS ballot at the November ISO TC43 plenary meeting.
 - Remaining issue is texture specification
 - May consider certification using SRTT sound intensity.

EPA CFR 205

- Will support technical amendments to CFR 205 to allow SAE J2805 and ISO 10844 as acceptable procedures and surface.
- Both of these provisions are needed to account for technical developments.

Sound Intensity

- Draft ready for SAE J number
- Harmonized with AASHTO
- Use of SI (potentially) in ISO 10844

Regulatory Action

- Minimum Noise
- Passby
- Stationary
- Interior
