A. PROPOSALS

A.1 Paragraph 6.10.5., amend to read:

“6.10.5. Conducted Emission of transient conducted disturbances generated by ESAs on 12/24 V supply lines.

ESAs that are not switched, contain no switches or do not include inductive loads need not be tested for transient conducted disturbances and shall be deemed to comply with paragraph 6.9.

A.2. Annex 13, Paragraph 3.3

3.3 The test set-up for the connection of the vehicle in configuration “RESS charging mode coupled to the power grid” is shown in figure 2-I of Appendix 1 to this annex.

B. Justifications

B.1 Appropriate terminology “-----transient conducted disturbances ----” in line with the proposed amendment in the title of paragraph to be included in the text of paragraph.

B.2 Correct reference of the figure.
