Torso angles in vehicles*

- approximately 88% of the vehicle fleet has a torso angle between 20° and 30°
- from vehicles with torso angle between 10° and 19° 75% (9% in total) are from category 1-1 (passenger car) and 25% (3% in total) are from category 2 (carriage of goods)

* based on sales data from 2009 and a total number of 20 million vehicles in total
