PPP’s, can you do without?

Public-Private Partnerships (PPP):

- involves a contract between a public sector authority and a private party, in which the private party provides a public service or project and assumes substantial financial, technical and operational risk in the project.

...............And 56 other definitions and descriptions are available!

Public-Private Partnerships (PPP):

PPP will be there to professionalise the government by:

- aim at better service (or the same service) to the public
- for the same (or less) money

System of having a public tasks handled by the private sector. PPP will ensure that the private sector will be responsible for the life time of the provided services, both by partnership as well by the sound risk allocation and financial mechanism.
PPP’s, can you do without?

PPP’s, can you do without?

Infrastructural Needs versus Recourses

- **Asian-Pacific (ADsB)**
  - Until 2025 demand of US$ 5 trillion in infra
- **Africa (AfDB)**
  - Each year US$ 6 billion in Health
- **Worldwide (OECD)**
  - US$ 45 trillion until 2040 to mitigate climate change effects

- **Asian-Pacific (IMF)**
  - Until 2025: US$ 1,2 trillion available
- **Africa (IMF)**
  - Foreign Aid: US$ 0,5 Billion
  - Own resources: US$ 0,01 B
- **Worldwide (WB Data)**
  - About WW GDP 2011 (68Tr)

**Fact:** Private Investment essential for development and poverty reduction
PPPs, you cannot do without!

Necessary impulse to economic growth and/or essential services for all.
Not by privatisation and not for the rich only.

- Access to clean and sufficient water, but water resources stay in the hands of the government
- Health and Healthcare, but not private clinics; healthcare accessible to all
- Implementation of ILO standards and for the development of the country
- International standards, to fight corruption and ill performance
PPP: EMERGING OPPORTUNITIES IN RAILWAYS

- Development of rail infrastructure capacity by supplementing public financial resources
- Growing freight volumes despite competition from road transport
- Property Development opportunities near Rail Lines
- Demand for rail based transport in suburban rails systems, connectivity to ports,
- Additional capacity to some crucial routes
- Substantial reduction in O&M costs and higher efficiency in railway projects
  Increased viability due to spreading & sharing business risks
Rail: very complex projects

- Tunnel Construction
- Viaduct Construction
- Track Works
- Vehicle Testing

Suggestion

Only steady improvement of the PPP environment will ensure a safe and sound PPP pipeline, survive financial pressure and political changes:

Its for the long run with long term commitment

Therefore

Exchange information and best practices, build capacity

Efficient

Work together and develop a clear PPP Rail environment

Aim: Create a Center on PPP in Rail
