

75th Jubilee Session

INLAND TRANSPORT COMMITTEE, UNECE

Road Safety : Vision and actions

Ms. Luciana Iorio

ROAD SAFETY FORUM CHAIRPERSON

26/02/2013

GA RES A/66/260

- Call to act focusing on the ambitious targets of the Decade Action Plan
- UNECE commitment in the Global road Safety Week: action will roll on through 4 different topics

Youth

Vehicles

Insurance

Alcohol policies

Road safety urges extra time

- WP1 wishes to see endorsed the request of the additional session in New Delhi, to be held in coordination with Institute of Road Traffic Education and UNESCAP
- Hindsight synchronised analysis and building capacity, visibility, in a wider challenging horizon, proving initiative, fostering cascading involvement, defining a vision within the Conventions .

Road Signs and Signals - Getting them straightforwardly clear

- Many signs are scattered all round mis -matching, mis - interpreting or in contradiction with 1968 Convention.
- WP1 exemplify the Committee of the quintessential importance of this issue and by inference of having a Formal Expert Group.
- Indeed at this stage- to make most of the time- the Committee is requested to endorse - **in principle** - this proposal.
- ..since the Tor are indeed only just about endorsed soon at WP1 and then submitted for approval by EXCOM in due time

The LC / Road Momentum

- The WP1 expects to have its Expert Group on road Safety at Level Crossing stepping in soon to start dealing with a crucial cumbersome challenge
- - ruling the interaction of two modes and two infrastructures to save lives.
- - by upgrading mobility options
- - identify and evaluate key factors leading to unsafe conditions at level crossings, by bridging several factors such as the infrastructure, legislation, user behaviour, management, education and enforcement.

Thank you for your attention
