Working and living conditions in inland navigation in the European region

Hyunsoo Yoon

Technical Officer, Maritime and Transport
International Labour Organization

UNECE Working Party on the Standardization of Technical & Safety Requirement in Inland Navigation
Geneva, 25 June 2014
About the ILO

• Specialized agency of the UN

• Main aim
  - Promoting worker’s rights at work
  - Encouraging decent employment
  - Enhancing social protection
  - Strengthening social dialogue

• Tripartite structure
About the ILO

• Long history of work in the maritime and transport sectors
• Maritime Labour Convention, 2006
• Work in Fishing Convention, 2007 (No. 188)
What is Maritime Labour Convention, 2006?

• “Bill of Rights for seafarers”

  Comprehensive instruments establishing comprehensive minimum requirements for almost all aspects of working conditions for seafarers

• Successful entry into force (20 Aug. 2013) with ratifications by 56 Members & more than 80% of world fleet volume

• 1st STC was held to adopt two amendments in May
Main structure of the MLC, 2006

• Minimum requirements (minimum wage, medical certificate, training and qualifications, recruitment & placement)

• Conditions of employment (employment agreements, wages, hours of work and rest, leave, repatriation, compensation, manning levels, career and skill dev’t)

• Accommodation, recreational facilities, food and catering

• Health protection, medical care, welfare & social security protection (w/ shipowner’s liability)

• Compliance & enforcement (maritime labour certificate, Port State responsibilities, inspection and complaint, etc.)
History of ILO work in inland navigation

• Hours of Work (Inland Navigation) Recommendation, 1920 (No. 8)

• Special Tripartite Conference concerning Rhine Boatmen, 1949

• Sectoral Activities Programme 2012-13 (GB 310th Session)

• Launch of the ILO study on inland navigation in 2013
Outline of the ILO study

• **Aim**
  - Overview of current regulatory frameworks
  - Highlight gaps in the protection of crews among them
  - Search for ways to improve working and living conditions

• **Scope**
  - European region (UNECE member states)
  - International (UNECE), regional (EU, CCNR, DC), national level

• **Issues**
  - Minimum requirements
  - Conditions of service
  - Safety, health & well-being
  - Social security
  - Enforcement
Labour market in inland navigation

Structure of the IWT labour market

• Fluctuation in transport performance, but general trend of decrease due to impact of global economic crisis

• Small companies vs Large companies
  Rise in the number of the self-employed owner-operators, mainly the consequences of economic recess, such as, dwindling interest, fiercer competition, raising labour cost, etc.
Labour market in inland navigation

Employment trends

• Key labour supply states
  • Netherlands, Germany, France, Luxembourg, Italy

• General decrease in the levels of employment
  • Relatively lower demand for mobile workers
  • Increasing number of the self-employed

• Exceptional case of Luxembourg
  • Increase in vessel registrations and employment (433 to 2,500)
  • Lower labour and social security costs, advantageous tax regime
Labour market in inland navigation

Employment trends (overall figure)

Development of the total IWT employment from 2005 to 2011 in EU-28, broken down by mobile workers and self-employed from 2008 to 2011
Labour market in inland navigation

Employment trend (Foreign crews figure)

Distribution of nationalities of mobile workers in the Netherlands in 2008
Minimum requirements

Minimum age

• General minimum entry level; 16 yrs
• Minimum age for boastmaster slightly varying; CCNR 21, EC 18/21, DC 21, UNECE 18/21
• UNECE Res. 31 (2009 rev.) recognizes diversity of existing various requirements on minimum age
• Effort to harmonize crew qualifications already in place, but only for the mutual recognition of formal qualifications
Minimum requirements

Medical examination & fitness

• Requirements for physical fitness and regularity of health certification vary among regulatory frameworks and countries

ex) No mental fitness in ISRBC

Renewal of health certificates for boamasters by age; 1 year vs 3 – 5 years vs 5 years vs 10 years

• CCNR imposing comprehensive and stringent set, whereas the others with more simplified set and procedure
Physical fitness requirement

<table>

<tr>
<td><strong>I. Eyesight</strong>&lt;br&gt;1. Eyesight at daylight: with or without visual aids, at least 0,8 with both eyes or with the best eye. Seeing with one eye only is allowed.&lt;br&gt;2. Night blindness: to be investigated only in case of doubt. Mesotest without blinding at an intensity level of 0,032 cd/m², result: contract 1:2.7.&lt;br&gt;3. Adaptation to darkness: to be investigated in case of doubt only. The result may not deviate more than one log unit of the normal curve.&lt;br&gt;4. Sight range: anomalies in the sight range of the best eye are not allowed. In case of doubt, a perimetric investigation is to be carried out.&lt;br&gt;5. Colour distinction: the colour distinction capacity shall be considered sufficient when the candidate meets the Farnsworth Panel D15 test or a recognised test with colour panels. In case of doubt, to be tested with an anomaloscope, where the Anomal quotient at a normal trichromasy must be between 0.7 and 1.4 or with another equivalent test. Recognised tests are: Ishihara according to panels 12 till 14, Stilling/Verhagen, Boström, HRR (result at least “mild”, TMC (result at least “second degree”, Holmer-Wright B (result 8 failures at most at “small”).&lt;br&gt;6. Motility: unrestricted agility of both eyes, no cross-eyedness.</td>
<td><strong>The applicant shall provide proof of physical and mental fitness by passing a medical examination carried out by a doctor recognised by the competent authority. That examination shall cover in particular visual and auditory acuity, colour vision, motricity of the upper and lower limbs and the neuro-psychiatric state and cardiovascular condition of the applicant.</strong>&lt;br&gt;<strong>Applicant must satisfy the requirements on physical and mental fitness, including eyesight, hearing and the ability to distinguish colours, and present a medical certificate issued by a doctor, appointed by a competent body.</strong>&lt;br&gt;<strong>Proof of physical fitness by passing a medical examination which tests amongst other things eyesight, hearing and the ability to distinguish colours.</strong></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
Minimum requirements

*Education, training and recruitment*

- Lack of harmonized requirements for level of education, training & general qualifications
  
  Causing difficulty in mutual recognition and problems in communication, etc.

- Current improvement and growing regional efforts is expected to narrow the gaps in a great deal
  
  EDINNA has introduced STCIN, PLATINA for NAIADDES action programmes
Minimum requirements

Certificates & qualifications

• Importance in creating fair condition for competition

• Despite considerable achievements, still some gaps

✓ NAIADIES I & II for policy harmonization
✓ Varying requirements for professional experiences (2 – 4 yrs)
  Varying definition of a “year” (180 days / 250 days / no specification)
  Local knowledge requirement (CCNR / DC)
  Discrepancies in considering past infraction history, etc.
Minimum requirements

Professional experience requirements

| CCNR | (a) 4 years, including at least 2 years of inland navigation as rating or engine-minder, or at least 1 year as leading crewman.  
(b) The navigation time must be done on a self-propelled vessel for which a Rhine Patent is required.  
(c) The navigation time is calculated as 180 days of navigation per calendar year.  
(d) The required 4-year experience may be reduced as follows: – By a maximum of 3 years for the time spent in a training programme – By a maximum of 2 years for the maritime experience (minimum 250 days of navigation needed per calendar year) – The experience must be proved by a service record delivered by the Rhine authorities or a valid administrative document as described in article 2.09 of the Rhine Patent Regulation. |
| DC | (e) 4 years as a crew member, including at least 1 year as rating or helmsman on a self-propelled vessel.  
(f) Maritime experience counts for a maximum of 2 years. Professional training counts as professional experience.  
(g) Definition of navigation time  
(h) The requirement is considered to be satisfied if candidates have a certificate confirming their nautical knowledge and skills, delivered by the DC member states or other Danube countries |
| EC | (i) 4 years’ professional experience as a member of the deck crew on an inland waterway vessel.  
(j) Must be validated by the competent authority of the Member State by being entered in a personal service record.  
(k) May be reduced by a maximum of 3 years: – Where the applicant has a diploma recognized by the competent authority which confirms specialized training in inland navigation comprising practical navigation work; – Professional experience acquired on a sea-going vessel as a member of the deck crew (reduction of 3 years requires 4 years’ experience in maritime navigation) – Passing a practical examination in sailing a vessel; the certificate shall in that case cover only vessels with nautical characteristics similar to those of the vessel which underwent the practical examination. |
| UNECE | (l) 2 years’ professional experience, acquired in the deck department on board an inland navigation vessel, at least as a rating.  
(m) Must be validated and/or approved by the Administration.  
(n) The minimum duration may be reduced if:  
– The Administration requires special training considered as equivalent  
– The candidate possesses a diploma of specialized inland navigation training, comprising a period of mandatory on-board service  
– The Administration decides to take into account the maritime experience. |

Conditions of service

*Work agreements*

- Primarily governed by domestic legal frameworks, thus no authority for the international org. to regulate.

  cf) 1954 Agr’t on Working Conditions of the Rhine Boatmen (working hours, rest time, fair wage, annual leave, special allowance, etc)

- Applicability of collective agreements varies, items dealt by agreement also are different among the regions and countries.

- Enforceability of work agreements varies.
Conditions of service

Work agreements

Collective Agreements in Europe

Legend
- Collective agreement applies
- No collective agreement applies
- No EU Member State
- Not relevant
- Unknown

Source: Ecorys 2013
Conditions of service

Wages

• Primarily domestic issue with very little harmonization

• Differences in the wage between;

  Domestically recruited crews and those from abroad (EU/non-EU)
  Directly recruited crews and those recruited through manning agencies

• No int’l / regional rule or regulation or semi-binding recommendation on the basic minimum wage, wage-setting process, wage calculation method, etc.
Conditions of service

Gross wages per month for various posts

Source: Eurostat
Conditions of service

Monthly wage comparison in inland navigation

Source: CCNR
Conditions of service

Working time

• EU Directive (2003/88/EC), but on the whole, suffer from fragmented definition and regulations

  General average working time is mostly 48 hours, but, still confusion due to different reference period or maximum weekly working time (50 – 112 hours)

• 2012 Agreement on working time in EU Social Dialogue Committee

</tbody>
</table>

*AT: (Austrian) employers are accountable for violations of working time regulations and unless enforcement regulations provide otherwise, only for perpetrations in Austria.

** BE: Belgian law applies to Belgian employers and employers operating in Belgium.

*** BG: The flag of the vessel is the criterion and operators are required to fly the national flag.

**** FI: Applies to Finnish vessels in Finnish waters, where Finnish operators must fly the national flag.

***** SK: Applicability only to the territory of the Slovak Republic and the operators established in Slovakia

Conditions of service

Manning levels

• Highly harmonized regulations in place internationally/regionally
• Slight difference among the regions but no substantial one
• Different manning levels according to the vessel size
Safety, health & well-being

*Occupational safety, accidents and health*

- Regulated by a set of sufficiently harmonized regimes
- CEVNI supplies core uniform rules on technical & safety requirements
- Need to unify the way for analysis and reporting on accidents
Safety, health & well-being

Medical care, accommodation and food

• No elaborate provision on medical care or first-aid kit on vessel in UNECE Resolution .61

• Food, accommodation, heating, cooking, etc. regulated in Chapters 12, 13, 14

• Similar rules & regulations applied among the River Commissions, but still left to the national authorities for implementation
Social security

- Uncertainties and fragmentation in regional/int’l level
  Mainly under the auspices of domestic legislations

- But, criticism on their impracticability by their insufficient consideration on the cross-border, trans-national character

- Impact of the increase in self-employed and owner-operators / influence of increasing use of manning agencies
Social security

Proportion (values in %) of foreigners among workers covered by social security in the German inland navigation

Source: CCNR
Enforcement

• Enforcement in an irregular manner with checks and inspection depending on national practices and arbitration

• River police by the River Commissions, but lacks unified inspection manual and procedure

• Inspection mainly focused on the safety & technical requirements

• Insufficient harmonization due to non-binding legislations and wide discretion afforded to national authorities
Registration of vessels

• Importance of registration for working and living conditions

• Effect of open registries on the regulation of conditions

  Considered to be good way to circumvent obligations on workers
  Complicating variety of employment regulations even further

• Impacts on fair competition for vessel owners and operators

• Cases of Malta and Cyprus
Conclusions

- Overall, fragmented regulation with some remarkable harmonization improvements, but still quite large amount of disparities.

- Many elements with complicated consequences on working conditions;

  economic crisis, worker mobility increase trend, increase in vessel size, open registries, manning agencies, enforcement in irregular manner

- Decent work for all inland navigation personnel and Future work of the ILO
