Proposal for Supplement 8 to the 04 series of amendments to Regulation No. 19 (Front fog lamps)

Submitted by the Working Party on Lighting and Light-Signalling

The text reproduced below was adopted by the Working Party on Lighting and Light-Signalling (GRE) at its seventy-second session (ECE/TRANS/WP.29/GRE/72, para. 39). It is based on ECE/TRANS/WP.29/GRE/2014/18, not amended. It is submitted to the World Forum for Harmonization of Vehicle Regulations (WP.29) and to the Administrative Committee AC.1 for consideration.

* In accordance with the programme of work of the Inland Transport Committee for 2012–2016 (ECE/TRANS/224, para. 94 and ECE/TRANS/2012/12, programme activity 02.4), the World Forum will develop, harmonize and update Regulations in order to enhance the performance of vehicles. The present document is submitted in conformity with that mandate.
Insert a new paragraph 3.5.3., to read:

"3.5.3. If the LED module(s) are non-replaceable, the markings for LED module(s) are not required."

Annex 1, item 10.3., amend to read:

"10.3. LED module(s): yes/no \(^2\) and for each LED module a statement whether it is replaceable or not: yes/no \(^2\)."

Annex 5, paragraph 1.2.1.1., amend to read:

"1.2.1.1. Test mixture

1.2.1.1.1. For front fog lamps with the outside lens in glass:

The mixture of water and a polluting agent to be applied to the front fog lamp shall be composed of:

(a) 9 parts by weight of silica sand with a particle size of 0-100 µm,
(b) 1 part by weight of vegetal carbon dust produced from beech wood with a particle size of 0-100 µm,
(c) 0.2 part by weight of NaCMC\(^4\),
(d) 5 parts by weight of sodium chloride (pure at 99 per cent), and
(e) An appropriate quantity of distilled water with a conductivity of \(S < 1 \mu S/m\).

The mixture must not be more than 14 days old.

1.2.1.1.2. For front fog lamp with outside lens in plastic material:

The mixture of water and polluting agent to be applied to the front fog lamp shall be composed of:

(a) 9 parts by weight of silica sand with a particle size of 0-100 µm,
(b) 1 part by weight of vegetal carbon dust produced from beech wood with a particle size of 0-100 µm,
(c) 0.2 part by weight of NaCMC\(^4\),
(d) 5 parts by weight of sodium chloride (pure at 99 per cent),
(e) 13 parts by weight of distilled water with a conductivity of \(S < 1 \mu S/m\), and
(f) \(2 \pm 1\) parts by weight of surface-actant. \(^{5}\)

The mixture must not be more than 14 days old."

Annex 12, paragraph 4.6., amend to read:

"4.6. UV-radiation

The UV-radiation of a low-UV-type LED module or light-generator shall be such that:

………………

(For definitions of the other symbols see paragraph 4.5.1. above)
This value shall be calculated using intervals of one nanometre. The UV-radiation shall be weighted according to the values as indicated in the UV table below.

**UV Table**

Values according to ....................... other values should be interpolated.

Annex 12, paragraph 4.7.2., amend to read:

"4.7.2. Colour

The colour of the light emitted, measured after 1 minute and measured after photometric stability has been obtained, as described in paragraph 4.7.1.3. of this annex, shall be within the required colour boundaries in both instances."
