

Proposal to amend the proposal for Supplement 7 to the 01 series of amendments to Regulation No. 113 (Headlamps emitting a symmetrical passing-beam), as contained in ECE/TRANS/WP.29/2017/39

I. Proposal

ECE/TRANS/WP.29/2017/39, page 3, amendments to Annex 4, paragraph 2.2. and to Annex 5, paragraph 1.4., to be deleted.

II. Justification

1. The above proposal was prepared by the representative of the European Union with a view to amending ECE/TRANS/WP.29/2017/39. The amendment concerns the heat test cycle requirement relating to the movement of the passing beam. Given that the requirement, based on ECE/TRANS/WP.29/GRE/2016/32, is not a simple clarification of the exiting test procedures in Regulation No. 113, but rather a substantial and new requirement, possibly affecting the performance of the headlamp, the European Union agrees with the GRE Proposal for Supplement 7 to the 01 series of amendments to Regulation No. 113 (Headlamps emitting a symmetrical passing-beam) only on condition that the requirement concerning the heat test cycle is removed from the proposal ECE/TRANS/WP.29/2017/39.

2. This proposal is submitted to the World Forum for Harmonization of Vehicle Regulations (WP.29) and to the Administrative Committee AC.1 for consideration and vote at their March 2017 sessions.
