## **Working Party on Inland Water Transport**

### **Sixty-second session**

Geneva, 3-5 October 2018

Item 4 of the provisional agenda

### **Follow-up of the International Ministerial**

**Conference “Connecting by Inland Navigation”**

## **Comments to the draft resolution of the Inland Transport Committee**

### **Transmitted by the Government of Slovakia**

The Slovak Republic proposes to delete the twelfth paragraph from the draft resolution of the Inland Transport Committee (Annex to ECE/TRANS/SC.3/2018/2):

Invites member States to develop national action plans for the implementation of the objectives and strategic actions set out by the Wroclaw declaration and inform regularly the Working Party on Inland Water Transport about progress,

due to a certain duplicity with the strategic and conceptual materials, which have already adopted at the national level. A report about implementation of the results from the Wroclaw declaration is also possible to realize without creating an action plan.

For example, the Ministry of Transport and Construction of the Slovak Republic is currently preparing a new Concept of Development of Water Transport of the Slovak Republic from 2030 until 2050, where all purposes of policies of the river commissions and international organizations in inland waterway transport will be taken into account. Therefore, it should be retained to each Member State how it will reach the purposes of the Declaration.
