

Final transitional provisions to "freeze" UN Regulations Nos. 3, 4, 6, 7, 19, 23, 27, 38, 50, 69, 70, 77, 87, 91, 98, 104, 112, 113, 119 and 123 in the course of simplification of lighting and light-signalling UN Regulations

I. Background

1. At the June 2018 session of WP.29, the Chair of GRE reported on the finalization of an extensive package of amendment proposals in the framework of simplification of lighting and light-signalling UN Regulations. WP.29 noted that the only pending issue for the simplification package was a transitional provision regarding the validity of type approvals granted under the existing UN Regulations to be "frozen". GRE decided to put this transitional provision in square brackets and to revert to this issue at its October 2018 session (ECE/TRANS/WP.29/1139, paras. 48 and 49).

2. In August 2018, the amendment proposals with square brackets were published as WP.29 documents. At its October 2018 session, GRE decided to delete the above transitional provision and requested the secretariat to submit this modification for consideration of the November 2018 session of WP.29. The present informal document contains the final text of transitional provisions for the UN Regulations to be "frozen" for the purposes of simplification of lighting and light-signalling UN Regulations.
