

# Report to GRPE 77

IWVTA-GRPE Ambassador

(Bill Coleman – OICA)

# 1958 Agreement:

## 1) Rules on application of supplements:

IWVTA IWG noted concerns by OICA that the new rules result in retroactive application of new (and potentially also of previous) supplements when extending previous approvals.

OICA recently noticed that a recent supplement to UNR 83 to amend the calculation process for coastdown testing could fall into this group.

Very few supplements from GRPE have been identified as problematic:

are we very good or did we miss something?

# 1958 Agreement:

## 2) Schedule 4 “numbering of UN type approvals”:

Concerns have been raised regarding type approval numbering systems

To date no UNRs under the responsibility of GRPE have been identified as problematic

# IWVTA:

## 1) Timing:

Create roadmap towards full IWVTA by November 2018

May contain intermediate targets for inclusion of individual UNRs into Annex 4

The content of Annex 4 shall be reviewed annually at the November session of WP.29

## 2) DETA:

Ongoing discussions regarding e.g. access rights (e.g. read only for CPs who are not CPs to individual Regulations)
