# TRANSPORT SECURITY ENSURING IN THE RUSSIAN FEDERATION

4 September 2019

Working Party on Transport Trends and Economics (WP.5)

Geneva

**Transport security** means to ensure transport infrastructure and vehicles protection from acts of unlawful interference, including terrorist attacks

In order to implement Federal law “On Transport security” a number of regulatory legal acts have developed and adopted in the Russian Federation.

These regulatory legal acts approved:

- list of potential threats of acts of unlawful interference to the transport sector;
- procedure for declaring transport security levels;
- procedure for establishing and categorizing criteria for transport infrastructure and vehicles;
- vulnerability assessment procedure;
- requirements for ensuring transport security on transport modes;
- procedure for developing transport security ensuring plans;
- procedure for transport security forces training and certification.

According to the Russian Federation's  
legislation **transport infrastructure and  
vehicles security shall be ensure** by  
transport infrastructure operators and  
carriers

Приглашение об информации  
участников
