II. Single Window Development: Case of Chile

Single Window (SEW) Development

- **Foreign Trade SEW**

System that allows to export and import goods through a single electronic portal, at any time and from any place.

- **Goal**

To position each country in a better competitiveness level within international markets, improving processing times and decreasing costs of foreign trade operations.

Current Scope and functionalities

SICEX CHILE

Non-mandatory use

Free of charge

The diagram features a central laptop with the text "Export Import" on its screen. The laptop is positioned over a stylized world map. To the left of the laptop, three red circles are connected by lines to the laptop's screen. These circles contain icons: a hand cursor, a pencil, and a cloud with a checkmark. To the right of the laptop, two red circles are connected by lines to the screen. These circles contain icons: a person at a computer and a lightbulb. Above the laptop, the text "SICEX CHILE" is centered. On either side of this text, a red downward-pointing arrow points towards the laptop. Further out, on the left and right sides, are two red rectangular boxes. The left box contains the text "Non-mandatory use" and the right box contains the text "Free of charge".

**Export
Import**

**Single web access point | Single Data Registry | Online
Payment | Real-time Tracking | Enquiries | User Support |
Training | Information Exchange Mechanisms**

Single Window Development

III. Regional Integration for Trade Facilitation: Pacific Alliance Agreement

Regional Integration for trade facilitation

**The Pacific Alliance Agreement
subscribed by Colombia, Mexico, Peru
and Chile.**

**It establishes the obligation to
implement and integrate SEWs**

Interoperability

Interoperability as an ICT tool

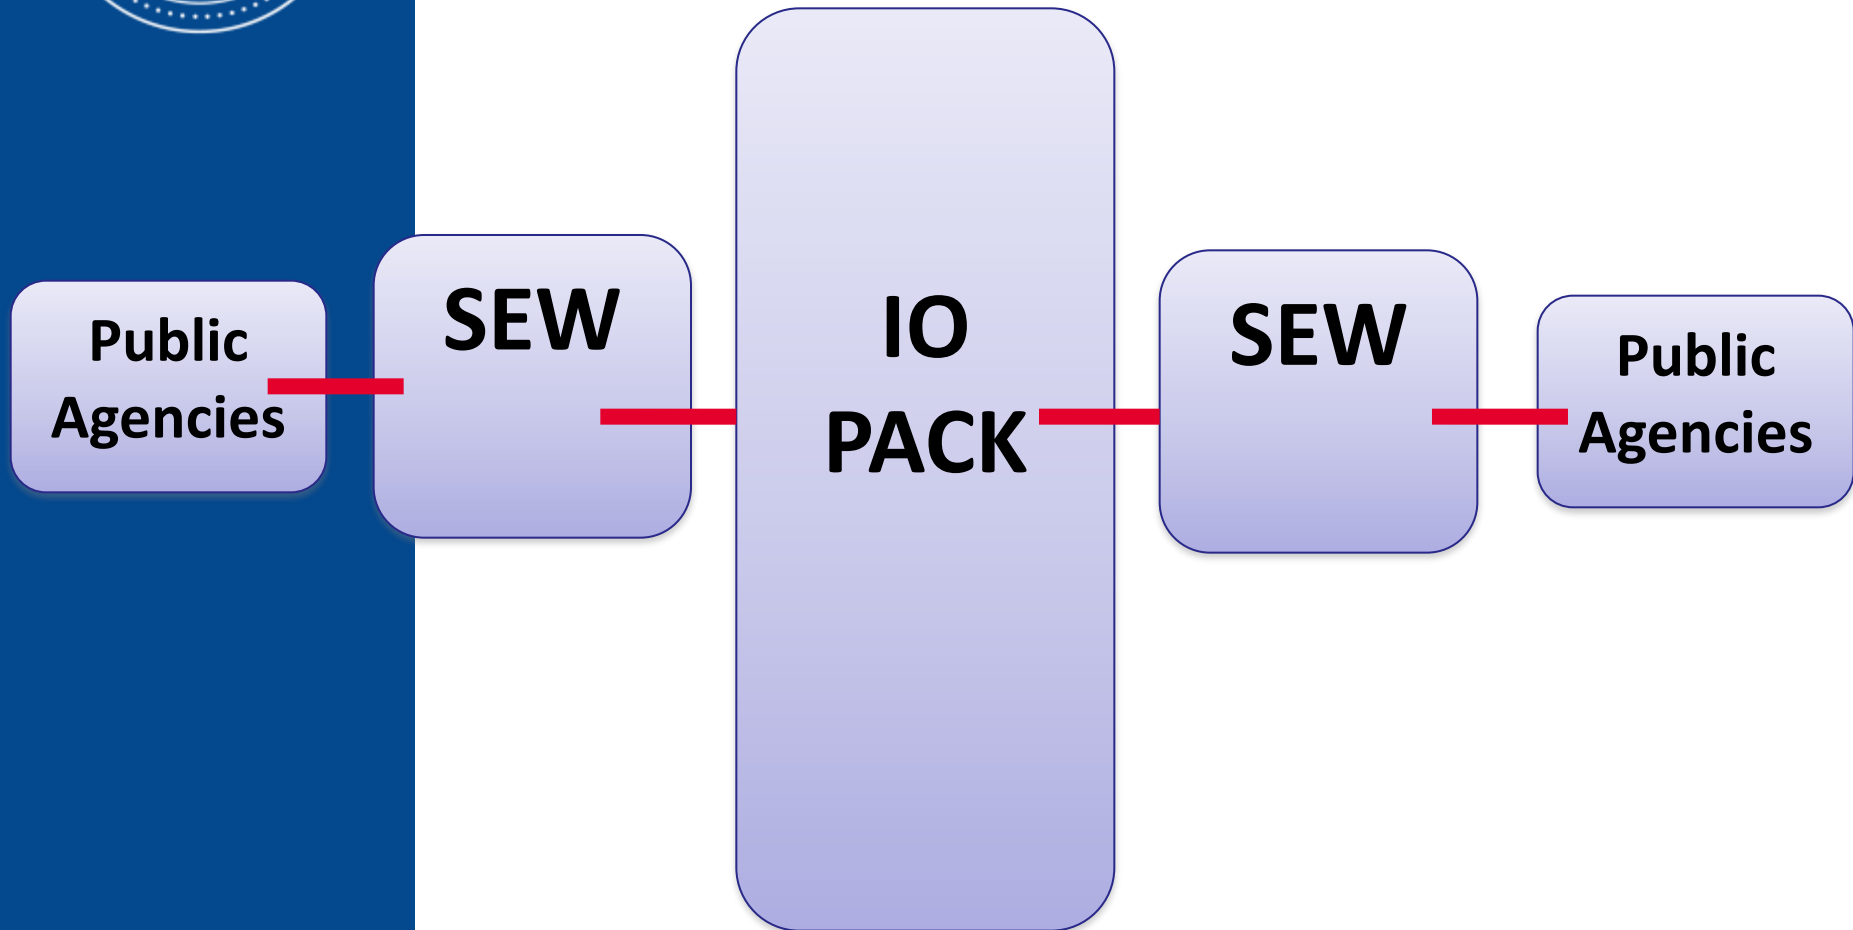

“The ability of organizations and diverse systems to interact with consensual and common objectives with the aim of obtaining mutual benefits.

The interaction implies that the involved organizations share information and knowledge through business processes, by means of data exchange among their respective ICT systems”.

Solution

The Pacific Alliance

Achievements

The Pacific Alliance

Phytosanitary certificate interoperability
among the SEWs of Colombia, Peru,
Mexico and Chile

June 2016.

Establishment of guidelines for process, normative and technological gaps of the countries to incorporate standards under UN/CEFACT standard version D13B, in order to generate common flows to achieve the certificate exchange among the respective SEWs.

Achievements

The Pacific Alliance

Phytosanitary certificate interoperability among the SEWs of Colombia, Peru, Mexico and Chile until June 2016.

Establishment of guidelines for process, normative and technological gaps of the countries to incorporate standards under UN/CEFACT standard version D13B, in order to generate common flows to achieve the certificate exchange among the respective SEWs.

IV. Next Steps ...

Next Steps

The Pacific Alliance

I. Dec 2016

Certificate of Origin Interoperability between the SEWs of Colombia, Peru, Mexico and Chile.

As per the provisions of the Paracas Mandate, annex 1, letter A), during the second semester of 2016, the certificate of origin will be able to be electronically sent and received through the foreign trade SEWs of each country—the work carried out since 2015 has been oriented towards this goal.

Next Steps

The Pacific Alliance

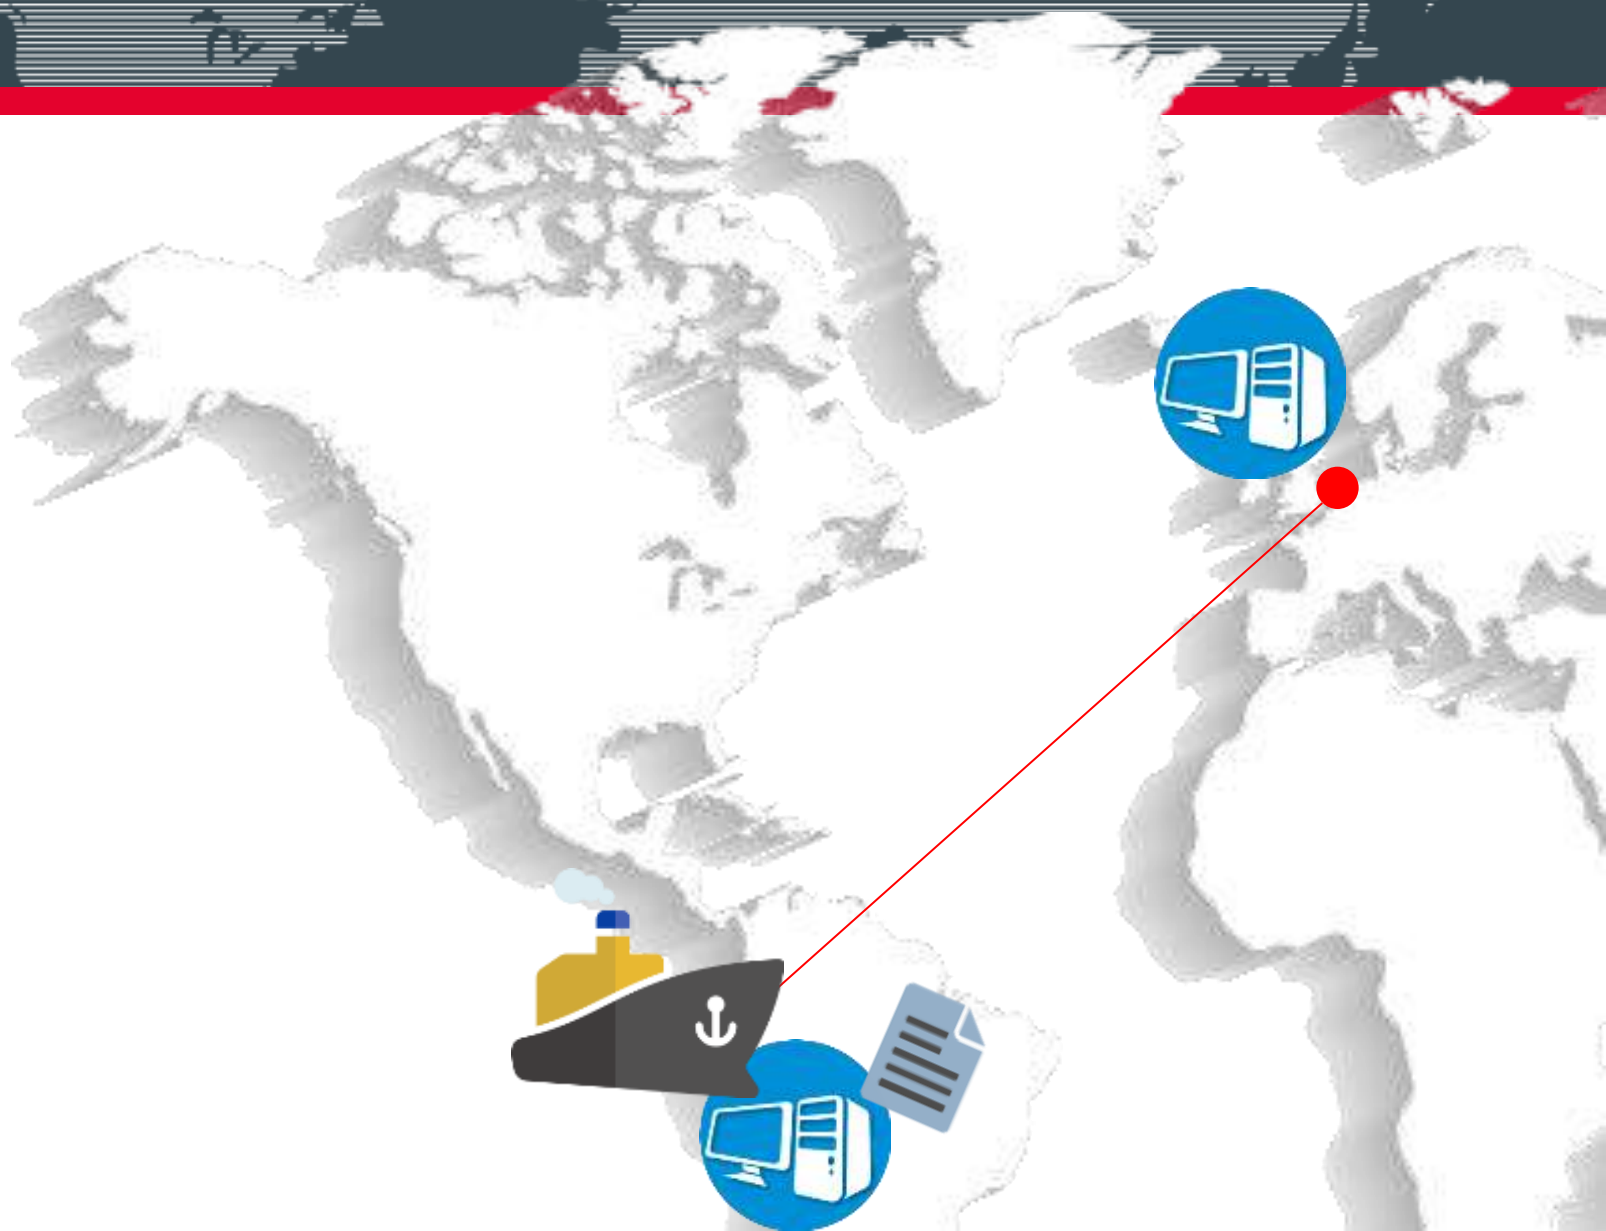

II. 2017-2018

**Customs Declaration data
interoperability between the SEWs
of Colombia, Peru, Mexico and Chile**

Main definitions 2017

Final Implementation 2018
