AGREEMENT

CONCERNING THE ADOPTION OF UNIFORM TECHNICAL PRESCRIPTIONS FOR WHEELED VEHICLES, EQUIPMENT AND PARTS WHICH CAN BE FITTED AND/OR BE USED ON WHEELED VEHICLES AND THE CONDITIONS FOR RECIPROCAL RECOGNITION OF APPROVALS GRANTED ON THE BASIS OF THESE PRESCRIPTIONS */

(Revision 2, including the amendments which entered into force on 16 October 1995)

Addendum 57: Regulation No. 58

Revision 2

Incorporating all valid text up to:
The 02 series of amendments - Date of entry into force: 11 July 2008

UNIFORM PROVISIONS CONCERNING THE APPROVAL OF:
I. REAR UNDERRUN PROTECTIVE DEVICES (RUPDS)
II. VEHICLES WITH REGARD TO THE INSTALLATION OF AN RUPD OF AN APPROVED TYPE
III. VEHICLES WITH REGARD TO THEIR REAR UNDERRUN PROTECTION (RUP)

UNITED NATIONS

*/ Former title of the Agreement:

GE.08-25440
UNIFORM PROVISIONS CONCERNING THE APPROVAL OF:

I. REAR UNDERRUN PROTECTIVE DEVICES (RUPDs)

II. VEHICLES WITH REGARD TO THE INSTALLATION OF AN RUPD OF AN APPROVED TYPE

III. VEHICLES WITH REGARD TO THEIR REAR UNDERRUN PROTECTION (RUP)

ANNEXES

Annex 1 - Communication (Part I)

Annex 2 - Communication (Part II)

Annex 3 - Communication (Part III)

Annex 4 - Arrangements of approval marks

Annex 5 - Test conditions and procedures
1. SCOPE

1.1. This Regulation applies to:

1.1.1. PART I: the RUPDs which are intended to be fitted to vehicles of categories N₂, N₃, 0₃ and 0₄; ¹/ ¹/

1.1.2. PART II: the installation on vehicles of categories N₂, N₃, 0₃ and 0₄ of RUPDs which have been type approved to Part I of this Regulation;

1.1.3. PART III: vehicles of categories N₂, N₃, 0₃ and 0₄ equipped with an RUPD which has not been separately approved according to Part I of this Regulation or so designed and/or equipped that its component parts can be regarded as totally or partially fulfilling the function of the RUPD.

1.2. This Regulation does not apply to:

1.2.1. Tractive units for articulated vehicles;

1.2.2. Trailers specially designed and constructed for the carriage of very long loads of indivisible length, such as timber, steel bars, etc.;

1.2.3. Vehicles where any RUPD is incompatible with their use.

2. PURPOSE

The purpose of this Regulation is to offer effective protection against underrunning of vehicles mentioned in paragraph 1 of this Regulation in the event of rear collision with vehicles of category M₁ and N₁.

3. DEFINITIONS COMMON TO PARTS I, II and III

3.1. For the purpose of this Regulation:

3.1.1. "Unladen mass" means the mass of the vehicle in running order, unoccupied and unladen but complete with fuel, coolant, lubricant, tools and a spare wheel (if provided as standard equipment by the vehicle manufacturer);

3.1.2. "Maximum mass" means the mass stated by the vehicle manufacturer to be technically permissible (this mass may be higher than the "permissible maximum mass" laid down by the national administration);

¹/ As defined in Annex 7 to the Consolidated Resolution on the Construction of Vehicles (R.E.3), (document TRANS/WP.29/78/Rev.1/Amend.2 as last amended by Amend.4).
3.1.3. An "RUPD" normally consists of a cross-member and links to the chassis side members or other structural members of the vehicle.

PART I. APPROVAL OF RUPDs

4. DEFINITIONS

4.1. For the purpose of Part I of this Regulation:

4.1.1. "Approval of an RUPD" means the approval of such a type of RUPD with respect to the requirements laid down in paragraph 7 below;

4.1.2. "Type of RUPD" means RUPDs which do not differ with respect to the essential characteristics such as shape, dimensions, attachment, materials and the markings cited in paragraph 5.2.2 below.

5. APPLICATION FOR APPROVAL

5.1. The application for approval of an RUPD shall be submitted by the manufacturer of the RUPD or by his duly accredited representative.

5.2. For each type of RUPD the application must be accompanied by:

5.2.1. Documentation in triplicate giving a description of the technical characteristics of the RUPD: its dimensions, lines and constituent materials and the method of its installation;

5.2.2. A sample of the type of RUPD: the sample must be clearly and indelibly marked on all its main components with the applicant's trade name or mark and the type designation.

5.3. An RUPD representative of the type to be approved shall be submitted to the Technical Service responsible for conducting the approval tests.

5.4. The Competent Authority shall verify the existence of satisfactory arrangements for ensuring effective control of the conformity of production before type approval is granted.

6. APPROVAL

6.1. If the RUPD submitted for approval pursuant to this Regulation meets the requirements of paragraph 7 below, approval of that type of RUPD shall be granted.
6.2. An approval number shall be assigned to each type approved. Its first two digits (at present 02 corresponding to the 02 series of amendments) shall indicate the series of amendments incorporating the most recent major technical amendments made to the Regulation at the time of issue of the approval. The same Contracting Party may not assign the same number to another type of rear underrun protective device.

6.3. Notice of approval, or of extension or of refusal of approval of a type of RUPD pursuant to this Regulation shall be communicated to the Parties to the 1958 Agreement which apply this Regulation, by means of a form conforming to the model in Annex 1 to this Regulation.

6.4. There shall be affixed, conspicuously and in a readily accessible place specified on the approval form, to every RUPD conforming to a type of RUPD approved under this Regulation an international approval mark consisting of:

6.4.1. A circle surrounding the letter "E" followed by the distinguishing number of the country which has granted approval; 2/

6.4.2. The number of this Regulation, followed by the letter "R", a dash and the approval number to the right of the circle prescribed in paragraph 6.4.1.

6.5. The approval mark shall be clearly legible and be indelible.

6.6. Annex 4 to this Regulation gives examples of arrangements of approval marks.

2/ 1 for Germany, 2 for France, 3 for Italy, 4 for the Netherlands, 5 for Sweden, 6 for Belgium, 7 for Hungary, 8 for the Czech Republic, 9 for Spain, 10 for Serbia, 11 for the United Kingdom, 12 for Austria, 13 for Luxembourg, 14 for Switzerland, 15 (vacant), 16 for Norway, 17 for Finland, 18 for Denmark, 19 for Romania, 20 for Poland, 21 for Portugal, 22 for the Russian Federation, 23 for Greece, 24 for Ireland, 25 for Croatia, 26 for Slovenia, 27 for Slovakia, 28 for Belarus, 29 for Estonia, 30 (vacant), 31 for Bosnia and Herzegovina, 32 for Latvia, 33 (vacant), 34 for Bulgaria, 35 (vacant), 36 for Lithuania, 37 for Turkey, 38 (vacant), 39 for Azerbaijan, 40 for The former Yugoslav Republic of Macedonia, 41 (vacant), 42 for the European Community (Approvals are granted by its Member States using their respective ECE symbol), 43 for Japan, 44 (vacant), 45 for Australia, 46 for Ukraine, 47 for South Africa, 48 for New Zealand, 49 for Cyprus, 50 for Malta, 51 for the Republic of Korea, 52 for Malaysia, 53 for Thailand, 54 and 55 (vacant), 56 for Montenegro, 57 (vacant) and 58 for Tunisia. Subsequent numbers shall be assigned to other countries in the chronological order in which they ratify or accede to the Agreement Concerning the Adoption of Uniform Technical Prescriptions for Wheeled Vehicles, Equipment and Parts which can be Fitted and/or be Used on Wheeled Vehicles and the Conditions for Reciprocal Recognition of Approvals Granted on the Basis of these Prescriptions, and the numbers thus assigned shall be communicated by the Secretary-General of the United Nations to the Contracting Parties to the Agreement.
7. REQUIREMENTS

7.1. The section height of the cross-member must not be less than 100 mm. The lateral extremities of the cross-member must not bend to the rear or have a sharp outer edge; this condition is fulfilled when the lateral extremities of the cross-member are rounded on the outside and have a radius of curvature of not less than 2.5 mm.

7.2. The RUPD may be so designed to have several positions at the rear of the vehicle. In this event, there must be a guaranteed method of securing it in the service position so that any unintentional change of position is precluded. The force applied by the operator to vary the position of the device must not exceed 40 daN.

7.3. The RUPD must offer adequate resistance to forces applied parallel to the longitudinal axis of the vehicle. (This shall be demonstrated in accordance with the test procedure and test conditions specified in Annex 5 to this Regulation.) The maximum horizontal deflection of the RUPD observed during and after the application of the test forces specified in Annex 5 shall be recorded on the type approval communication (Annex 1, item 8).

7.4. For vehicles fitted with a platform lift at the rear, the underrun device may be interrupted for the purposes of the mechanism. In this case, the following special requirements apply:

7.4.1. The maximum lateral clearance measured between the elements of the underrun device and the elements of the platform lift, which move through the interruption when the lift is operated and which make the interruption necessary, may amount to no more than 2.5 cm.

7.4.2. The individual elements of the underrun protection, including those outboard of the lift mechanism, where provided, must have an effective surface area, in each case, of at least 350 cm$^2$.

However, in the case of vehicles having a width of less than 2,000 mm and where it is impossible to achieve the above requirement, the effective surface may be reduced on the condition that the resistance criteria are met.

8. CONFORMITY OF PRODUCTION

The conformity of production procedures shall comply with those set out in the Agreement, Appendix 2 (E/ECE/324-E/ECE/TRANS/505/Rev.2), with the following requirements:

8.1. Every rear underrun protective device approved under this Regulation shall be so manufactured as to conform to the type approved by meeting the requirements set out in paragraph 7 above.
8.2. The authority that has granted type approval may at any time verify the conformity control methods applied in each production facility. The normal frequency of these verifications shall be one every two years.

9. PENALTIES FOR NON-CONFORMITY OF PRODUCTION

9.1. The approval granted in respect of a type of RUPD pursuant to this Regulation may be withdrawn if the requirements set forth above are not met or if the protective device has failed to pass the test prescribed in Annex 5.

9.2. If a Contracting Party to the Agreement applying this Regulation withdraws an approval it has previously granted, it shall forthwith so notify the other Contracting Parties applying this Regulation, by means of a communication form conforming to the model in Annex 1 to this Regulation.

10. MODIFICATION AND EXTENSION OF APPROVAL OF AN RUPD TYPE

10.1. Every modification of the RUPD type shall be notified to the Administrative Department which approved the RUPD type. The department may then either:

10.1.1. Consider that the modifications made are unlikely to have an appreciable adverse effect and that in any case the RUPD still complies with the requirements; or

10.1.2. Require a further test report from the Technical Service responsible for conducting the tests.

10.2. Confirmation or refusal of approval, specifying the alterations shall be communicated by the procedure specified in paragraph 6.3 above to the Parties to the Agreement applying this Regulation.

10.3. The Competent Authority issuing the extension of approval shall assign a series number of such an extension and inform thereof the other Parties to the 1958 Agreement applying this Regulation by means of a communication form conforming to the model in Annex 1 to this Regulation.

11. PRODUCTION DEFINITELY DISCONTINUED

If the holder of the approval completely ceases to manufacture a type of rear underrun protective device approved in accordance with this Regulation, he shall so inform the authority which granted the approval. Upon receiving the relevant communication that authority shall inform thereof the other Parties to the 1958 Agreement applying this Regulation by means of a communication form conforming to the model in Annex 1 to this Regulation.
12. NAMES AND ADDRESSES OF TECHNICAL SERVICES RESPONSIBLE FOR CONDUCTING APPROVAL TESTS, AND OF ADMINISTRATIVE DEPARTMENTS

The Parties to the 1958 Agreement applying this Regulation shall communicate to the United Nations Secretariat the names and addresses of the Technical Services responsible for conducting approval tests and of the Administrative Departments which grant approval and to which forms certifying approval or extension or refusal or withdrawal of approval, issued in other countries, are to be sent.

PART II. APPROVAL OF A VEHICLE WITH REGARD TO THE INSTALLATION OF AN RUPD OF AN APPROVED TYPE

13. DEFINITIONS

13.1. For the purposes of Part II of this Regulation:

13.1.1. "Approval of a vehicle" means the approval of a vehicle type with regard to the installation of an RUPD of an approved type according to Part I of this Regulation;

13.1.2. "Vehicle type" means vehicles which do not differ in such essential aspects as:

The width of the rear axle,

The structure, the dimensions, the shape and the height from the ground of the rear part of the vehicle and the characteristics of the suspension, in so far as they have a bearing on the requirements specified in paragraph 19 of this Regulation,

The approved RUPDs fitted to the vehicle.

13.2. Other definitions applicable to this Part II are contained in paragraph 3 of this Regulation.

14. APPLICATION FOR APPROVAL

14.1. The application for approval of a vehicle type with regard to the installation of an RUPD(s) of an approved type shall be submitted by the vehicle manufacturer or by his duly accredited representative.

14.2. It shall be accompanied by the under-mentioned documents in triplicate and by the following particulars:
14.2.1. Drawings of the vehicle showing, according to the criteria referred to in paragraph 13.1.2 of this Regulation, the vehicle type in side and rear elevation with the indication of the position of the approved RUPD(s) and design details of its (their) fixing elements to the chassis of the vehicle;

14.2.2. The maximum mass of the vehicle;

14.2.3. A list of the RUPDs intended to be fitted to the vehicle;

14.2.4. At the request of the Competent Authority the type approval communication form (i.e. Annex 1 of this Regulation) of each RUPD shall also be supplied.

14.3. A vehicle representative of the type to be approved and fitted with an approved RUPD shall be submitted to the Technical Service responsible for conducting the approval tests.

14.3.1. A vehicle not comprising all the components proper to the type may be accepted for test provided that it can be shown by the applicant to the satisfaction of the Competent Authority that the absence of the components omitted has no effect on the results of the verifications, so far as the requirements of this Regulation are concerned.

14.4. The Competent Authority shall verify the existence of satisfactory arrangements for ensuring effective checks on conformity of production before type approval is granted.

15. APPROVAL

15.1. If the vehicle submitted for approval pursuant to this Regulation is provided with an approved RUPD and meets the requirements of paragraph 16 below, approval of that vehicle type shall be granted.

15.2. An approval number shall be assigned to each type approved. Its first two digits (at present 02 corresponding to the 02 series of amendments) shall indicate the series of amendments incorporating the most recent major technical amendments made to the Regulation at the time of issue of the approval. The same Contracting Party may not assign the same number to another vehicle type.

15.3. Notice of approval or of extension or of refusal of approval of a vehicle type pursuant to this Regulation shall be communicated to the Parties to the 1958 Agreement which apply this Regulation, by means of a form conforming to the model in Annex 2 to this Regulation.
15.4. There shall be affixed, conspicuously and in a readily accessible place specified on the approval form, to every vehicle conforming to a vehicle type approved under this Regulation an international approval mark consisting of:

15.4.1. A circle surrounding the letter "E" followed by the distinguishing number of the country which has granted approval; 2/

15.4.2. The number of this Regulation, followed by the letter "R", a dash and the approval number to the right of the circle prescribed in paragraph 15.4.1.

15.5. If the vehicle conforms to a vehicle type approved, under one or more other Regulations annexed to the Agreement, in the country which has granted approval under this Regulation, the symbol prescribed in paragraph 15.4.1 need not be repeated; in such a case the Regulation and approval numbers and the additional symbols of all the Regulations under which approval has been granted in the country which has granted approval under this Regulation shall be placed in vertical columns to the right of the symbol prescribed in paragraph 15.4.1.

15.6. The approval mark shall be clearly legible and be indelible.

15.7. The approval mark shall be placed close to or on the vehicle data plate affixed by the manufacturer.

15.8. Annex 4 to this Regulation gives examples of arrangements of approval marks.

16. REQUIREMENTS FOR INSTALLATION OF AN APPROVED RUPD

16.1. The ground clearance with respect to the underside of the protective device, even when the vehicle is unladen, must not exceed 550 mm over its entire width and shall be such that the height above the ground of the points of application of the test forces applied to the device according to Part I of this Regulation and recorded in the type approval communication form (Annex 1, item 7) does not exceed 600 mm.

16.2. The width of the rear protective device must at no point exceed the width of the rear axle measured at the outermost points of the wheels, excluding the bulging of the tyres close to the ground, nor must it be more than 100 mm shorter on either side. Where there is more than one rear axle, the width to be considered is that of the widest rear axle. In addition the requirements of paragraphs 3.1.2 and 3.1.3 of Annex 5 relating the distance of the points of application of the test forces from the outer edges of the rear wheels (Annex 1, item 7) must be verified and recorded in the type approval communication form.
16.3. The device must be so fitted that the horizontal distance between the rear of the device and the rear extremity of the vehicle, including any platform lift mechanism, does not exceed 400 mm diminished by the recorded deformation (paragraph 7.3 of Part I) measured at any of the points where the test forces have been applied (Annex 1, item 8) during the type approval of the rear underrun protective device in conformity with the provisions of Part I of this Regulation and recorded in the type approval communication form. In measuring this distance, any part of the vehicle which is more than 2 m above the ground when the vehicle is unladen shall be excluded.

16.4. The maximum mass of a vehicle type for which approval is requested shall not exceed the value indicated on the type approval communication form of each approved RUPD intended to be installed on that vehicle.

17. CONFORMITY OF PRODUCTION

The conformity of production procedures shall comply with those set out in the Agreement, Appendix 2 (E/ECE/324-E/ECE/TRANS/505/Rev.2), with the following requirements:

17.1. Every vehicle approved under this Regulation shall be so manufactured as to conform to the type approved by meeting the requirements set out in paragraph 16 above.

17.2. The authority that has granted type approval may at any time verify the conformity control methods applied in each production facility. The normal frequency of these verifications shall be one every two years.

18. PENALTIES FOR NON-CONFORMITY OF PRODUCTION

18.1. The approval granted in respect of a vehicle type pursuant to this Regulation may be withdrawn if the requirements set forth above are not met.

18.2. If a Contracting Party to the Agreement applying this Regulation withdraws an approval it has previously granted, it shall forthwith so notify the other Contracting Parties applying this Regulation, by means of a communication form conforming to the model in Annex 2 to this Regulation.

19. MODIFICATION AND EXTENSION OF APPROVAL OF A VEHICLE TYPE

19.1. Every modification of the vehicle type shall be notified to the Administrative Department which approved the vehicle type. The department may then either:

19.1.1. Consider that the modifications made are unlikely to have an appreciable adverse effect and that in any case the vehicle still complies with the requirements; or
19.1.2. Require a further test report from the Technical Service responsible for conducting the tests.

19.2. Confirmation or refusal of approval, specifying the alteration, shall be communicated by the procedure specified in paragraph 15.3 above to the Parties to the Agreement applying this Regulation.

19.3. The Competent Authority issuing the extension of approval shall assign a series number for such an extension and inform thereof the other Parties to the 1958 Agreement applying this Regulation by means of a communication form conforming to the model in Annex 2 to this Regulation.

20. PRODUCTION DEFINITELY DISCONTINUED

If the holder of the approval completely ceases to manufacture a type vehicle approved in accordance with this Regulation, he shall so inform the authority which granted the approval. Upon receiving the relevant communication, that authority shall inform thereof the other Parties to the 1958 Agreement applying this Regulation by means of a communication form conforming to the model in Annex 2 to this Regulation.

21. NAMES AND ADDRESSES OF TECHNICAL SERVICES RESPONSIBLE FOR CONDUCTING APPROVAL TESTS, AND OF ADMINISTRATIVE DEPARTMENTS

The Parties to the 1958 Agreement applying this Regulation shall communicate to the United Nations Secretariat the names and addresses of the Technical Services responsible for conducting approval tests and of the Administrative Departments which grant approval and to which forms certifying approval or extension or refusal or withdrawal of approval, issued in other countries, are to be sent.
PART III. APPROVAL OF A VEHICLE WITH REGARD TO ITS REAR UNDERRUN PROTECTION (RUP)

22. DEFINITIONS

22.1. For the purposes of Part III of this Regulation:

22.1.1. "Approval of a vehicle" means the approval of a vehicle type with regard to its RUP;

22.1.2. "Vehicle type" means a category of vehicles which do not differ with respect to the essential points as the width of the rear axle, the structure, the dimensions, the shape and the materials of the rear part of the vehicle, the characteristics of the suspension in so far as they have a bearing on the requirements specified in paragraph 25 of this Regulation;

22.1.3. "Rear underrun protection (RUP)" means the presence at the rear of the vehicle of either:

22.1.3.1. A special RUPD; or

22.1.3.2. Body work, chassis parts or other components, such that, by virtue of their shape and characteristics, these elements can be regarded as totally or partially fulfilling the function of the RUPD.

22.2. Other definitions applicable to this Part III are contained in paragraph 3 of this Regulation.

23. APPLICATION FOR APPROVAL

23.1. The application for approval of a vehicle type with regard to the protection afforded by the RUP shall be submitted by the vehicle manufacturer or by his duly accredited representative.

23.2. It shall be accompanied by the under-mentioned documents in triplicate and by the following particulars:

23.2.1. A detailed description of the vehicle type with respect to its structure, dimensions, lines and constituent materials in so far as required for the purpose of this Regulation;

23.2.2. Drawings of the vehicle showing the vehicle type in side and rear elevation and design details of the rear parts of the structure;

23.2.3. The maximum mass of the vehicle;
23.2.4. A detailed description of the RUP: its dimensions, lines, constituent materials and position on the vehicle.

23.3. A vehicle representative of the type to be approved shall be submitted to the Technical Service responsible for conducting the approval tests.

23.3.1. A vehicle not comprising all the components proper to the type may be accepted for test provided that it can be shown by the applicant to the satisfaction of the Competent Authority that the absence of the components omitted has no effect on the results of the verification, so far as the requirements of this Regulation are concerned.

23.4. The Competent Authority shall verify the existence of satisfactory arrangements for ensuring effective checks on conformity of production before type approval is granted.

24. APPROVAL

24.1. If the vehicle submitted for approval pursuant to this Regulation meets the requirements of paragraph 25 below, approval of that vehicle type shall be granted.

24.2. An approval number shall be assigned to each type approved. Its first two digits (at present 02 corresponding to the 02 series of amendments) shall indicate the series of amendments incorporating the most recent major technical amendments made to the Regulation at the time of issue of the approval. The same Contracting Party may not assign the same number to another vehicle type.

24.3. Notice of approval or of extension or of refusal of approval of a vehicle type pursuant to this Regulation shall be communicated to the Parties to the 1958 Agreement which apply this Regulation, by means of a form conforming to the model in Annex 3 to this Regulation.

24.4. There shall be affixed, conspicuously and in a readily accessible place specified on the approval form, to every vehicle conforming to a vehicle type approved under this Regulation an international approval mark consisting of:

24.4.1. A circle surrounding the letter "E" followed by the distinguishing number of the country which has granted approval; 

24.4.2. The number of this Regulation, followed by the letter "R", a dash and the approval number to the right of the circle prescribed in paragraph 24.4.1.

24.5. If the vehicle conforms to a vehicle type approved, under one or more other Regulations annexed to the Agreement, in the country which has granted approval under this Regulation, the symbol prescribed in paragraph 24.4.1 need not be repeated; in such a case the Regulation and approval numbers and the additional
symbols of all the Regulations under which approval has been granted in the country which has granted approval under this Regulation shall be placed in vertical columns to the right of the symbol prescribed in paragraph 24.4.1.

24.6. The approval mark shall be clearly legible and be indelible.

24.7. The approval mark shall be placed close to or on the vehicle data plate affixed by the manufacturer.

24.8. Annex 4 to this Regulation gives examples of arrangements of approval marks.

25. REQUIREMENTS FOR RUP

25.1. The ground clearance with respect to the underside of the RUP, even when the vehicle is unladen, must not exceed 550 mm over its entire width.

25.2. The RUP must be situated as close to the rear of the vehicle as possible.

25.3. The width of the RUP must at no point exceed the width of the rear axle measured at the outermost points of the wheels, excluding the bulging of the tyres close to the ground, nor must it be more than 100 mm shorter on either side. Where there is more than one rear axle, the width to be considered is that of the widest rear axle. Where the device is contained in or comprised by the vehicle bodywork which itself extends beyond the width of the rear axle the requirement that the width of the RUP must not exceed that of the rear axle shall not apply.

25.4. The section height of the RUP must not be less than 100 mm. The lateral extremities of the RUP must not bend to the rear or have a sharp outer edge, this condition is fulfilled when the lateral extremities of the RUP are rounded on the outside and have a radius of curvature of not less than 2.5 mm.

25.5. The RUP may be so designed to have several positions at the rear of the vehicle. In this event, there must be a guaranteed method of securing it in the service position so that any unintentional change of position is precluded. The force applied by the operator to vary the position of the RUP must not exceed 40 daN.
25.6. The RUP must offer adequate resistance to forces applied parallel to the longitudinal axis of the vehicle and be connected, when in the service position, with the chassis side-members or whatever replaces them. This requirement will be satisfied if it is shown that both during and after the application of the forces described in Annex 5 the horizontal distance between the rear of the RUP and the rear extremity of the vehicle, including any platform lift mechanism, does not exceed 400 mm at any of the points where the test forces are applied. In measuring this distance, any part of the vehicle which is more than 2 m above the ground when the vehicle is unladen must be excluded.

25.7. A practical test shall not be required where it can be shown by calculation that the requirements of Annex 5, paragraph 3, are met. Where a practical test is carried out, the device must be connected to the chassis side-members of the vehicle or to a significant part of these or to other structural members.

25.8. For vehicles fitted with a platform lift at the rear, the underrun device may be interrupted for the purposes of the mechanism. In this case, the following special requirements apply:

25.8.1. The maximum lateral clearance measured between the elements of the underrun device and the elements of the platform lift, which move through the interruption when the lift is operated and which make the interruption necessary, may amount to no more than 2.5 cm.

25.8.2. The individual elements of the underrun protection, including those outboard of the lift mechanism, where provided, must have an effective surface area, in each case, of at least 350 cm$^2$.

However, in the case of vehicles having a width of less than 2,000 mm and where it is impossible to achieve the above requirement, the effective surface may be reduced on the condition that the resistance criteria are met.

26. CONFORMITY OF PRODUCTION

The conformity of production procedures shall comply with those set out in the Agreement, Appendix 2 (E/ECE/324-E/ECE/TRANS/505/Rev.2), with the following requirements:

26.1. Every vehicle approved under this Regulation shall be so manufactured as to conform to the type approved by meeting the requirements set out in paragraph 25 above.

26.2. The authority that has granted type approval may at any time verify the conformity control methods applied in each production facility. The normal frequency of these verifications shall be one every two years.
27. PENALTIES FOR NON-CONFORMITY OF PRODUCTION

27.1. The approval granted in respect of a vehicle type pursuant to this Regulation may be withdrawn if the requirements set forth above are not met or if the vehicle has failed to pass the test prescribed in Annex 5.

27.2. If a Contracting Party to the Agreement applying this Regulation withdraws an approval it has previously granted, it shall forthwith so notify the other Contracting Parties applying this Regulation, by means of a communication form conforming to the model in Annex 3 to this Regulation.

28. MODIFICATION AND EXTENSION OF APPROVAL OF A VEHICLE TYPE

28.1. Every modification of the vehicle type shall be notified to the Administrative Department which approved the vehicle type. The department may then either:

28.1.1. Consider that the modifications made are unlikely to have an appreciable adverse effect and that in any case the vehicle still complies with the requirements; or

28.1.2. Require a further test report from the Technical Service responsible for conducting the tests.

28.2. Confirmation or refusal of approval, specifying the alterations shall be communicated by the procedure specified in paragraph 24.3 above to the Parties to the Agreement applying this Regulation.

28.3. The Competent Authority issuing the extension of approval shall assign a series number for such an extension and inform thereof the other Parties to the 1958 Agreement applying this Regulation by means of a communication form conforming to the model in Annex 3 to this Regulation.

29. PRODUCTION DEFINITELY DISCONTINUED

If the holder of the approval completely ceases to manufacture a vehicle type approved in accordance with this Regulation, he shall so inform the authority which granted the approval. Upon receiving the relevant communication that authority shall inform thereof the other Parties to the 1958 Agreement applying this Regulation by means of a communication form conforming to the model in Annex 3 to this Regulation.

30. NAMES AND ADDRESSES OF TECHNICAL SERVICES RESPONSIBLE FOR CONDUCTING APPROVAL TESTS, AND OF ADMINISTRATIVE DEPARTMENTS
The Parties to the 1958 Agreement applying this Regulation shall communicate to the United Nations Secretariat the names and addresses of the Technical Services responsible for conducting approval tests and of the Administrative Departments which grant approval and to which forms certifying approval or extension or refusal or withdrawal of approval, issued in other countries, are to be sent.

PART IV. TRANSITIONAL PROVISIONS

31. TRANSITIONAL PROVISIONS

31.1. As from the official date of entry into force of the 02 series of amendments, no Contracting Party applying this Regulation shall:
   (a) refuse to grant approval under Parts I, II and III of this Regulation as amended by the 02 series of amendments;
   (b) refuse a type of component or separate technical unit approved under Part I of this Regulation as amended by the 02 series of amendments;
   (c) prohibit the fitting on a vehicle of a component or separate technical unit approved under Parts I and II of this Regulation as amended by the 02 series of amendments.

31.2. Until 18 months after the date of entry into force of this Regulation as amended by the 02 series of amendments, Contracting Parties applying this Regulation shall:
   (a) not refuse a type of component or separate technical unit approved under Part I of this Regulation as amended by the 01 series of amendments;
   (b) not refuse to grant approvals to those types of component or separate technical unit which comply with the requirements of Part I of this Regulation as amended by the 01 series of amendments;
   (c) not refuse to grant extensions of approval for components or separate technical units which comply with Part I of this Regulation as amended by the 01 series of amendments;
   (d) continue to allow the fitting on a vehicle of a component or separate technical unit approved under Parts I and II of this Regulation as amended by the 01 series of amendments.

31.3. Starting 18 months after the date of entry into force of this Regulation as amended by the 02 series of amendments, Contracting Parties applying this Regulation shall:
   (a) refuse a type of component or separate technical unit which does not meet the requirements of Part I of this Regulation as amended by the 02 series of amendments;
   (b) grant approvals only if the type of component or separate technical unit to be approved meets the requirements of Part I of this Regulation as amended by the 02 series of amendments;
   (c) prohibit the fitting of a component or separate technical unit which does not meet the requirements of Parts I and II of this Regulation as amended by the 02 series of amendments;
(d) consider approvals in the case of types of component or separate technical unit to be invalid, except where they comply with the requirements of Part I of this Regulation as amended by the 02 series of amendments.

31.4. Until 48 months following the date of entry into force of this Regulation as amended by the 02 series of amendments Contracting Parties applying this Regulation shall:
   (a) continue to grant approvals to those types of vehicles which comply with the requirements of Part III of this Regulation as amended by the 01 series of amendments;
   (b) continue to accept national or regional type-approval of a vehicle type-approved under Part III of this Regulation as amended by the 01 series of amendments.

31.5. As from 48 months after the date of entry into force of this Regulation as amended by the 02 series of amendments, Contracting Parties applying this Regulation shall:
   (a) grant approvals only if the vehicle type to be approved meets the requirements of Part III of this Regulation as amended by the 02 series of amendments;
   (b) refuse national or regional type-approval and shall refuse first national or regional registration (first entry into service) of a vehicle which does not meet the requirements of Part III of this Regulation as amended by the 02 series of amendments;
   (c) consider approvals to this Regulation to be invalid, except in the case of vehicle types which comply with the requirements of Part III of this Regulation as amended by the 02 series of amendments.

31.6. Notwithstanding the transitional provisions above, Contracting Parties whose application of this Regulation comes into force after the date of entry into force of the most recent series of amendments are not obliged to accept approvals which were granted in accordance with any of the preceding series of amendments to this Regulation.
Annex 1

COMMUNICATION

(Maximum format: A4 (210 x 297 mm))

issued by: Name of administration:

..............................................................................................................................................

concerning: APPROVAL GRANTED

ARRANGEMENTS OF APPROVAL MARKS

Model A

(see paragraphs 6.4, 15.4, 24.4 of this Regulation)

The above approval mark affixed to a vehicle or to an RUPD shows that the vehicle type or RUPD type concerned has, with regard to the rear underrun protection in the event of a collision, been approved in the Netherlands (E 4) pursuant to Regulation No. 58 under approval number 022439. The first two digits of the approval number indicate that the approval was granted in accordance with the requirements of Regulation No. 58 as amended by the 02 series of amendments.

Model B

(see paragraphs 6.5, 15.5, 24.5 of this Regulation)

The above approval mark affixed to a vehicle shows that the vehicle type concerned has been approved in the Netherlands (E 4) pursuant to Regulations Nos. 58 and 31. The approval numbers indicate that, at the dates when the respective approvals were given, Regulation No. 58 included the 02 series of amendments and Regulation No. 31 was still in its original form.

1/ The latter number is given as an example only.
Annex 5

TEST CONDITIONS AND PROCEDURES

1. TEST CONDITIONS FOR RUPDs

1.1. At the request of the manufacturer the test may be conducted either:

1.1.1. On a vehicle of the type for which RUPD is intended; in this case the conditions set out in paragraph 2 shall be observed; or

1.1.2. On a part of the chassis of the vehicle type for which the RUPD is intended; this part shall be representative of the vehicle type(s) in question; or

1.1.3. On a rigid test bench.

1.2. In the case of paragraphs 1.1.2 and 1.1.3 the parts used to connect the RUPD to part of the vehicle chassis or to the rigid test bench shall be equivalent to those which are used to secure the RUPD when it is installed on the vehicle.

1.3. At the request of the manufacturer and with the consent of the Technical Service the test procedure described in paragraph 3 may be simulated by calculation.

2. TEST CONDITIONS FOR VEHICLES

2.1. The vehicle shall be at rest on a level, flat, rigid and smooth surface.

2.2. The front wheels shall be in the straight-ahead position.

2.3. The tyres shall be inflated to the pressure recommended by the vehicle manufacturer.

2.4. The vehicle may, if necessary to achieve the test forces required in paragraph 3.1 below, be restrained by any method, this method to be specified by the vehicle manufacturer.

2.5. Vehicles equipped with hydropneumatic, hydraulic or pneumatic suspension or a device for automatic levelling according to load shall be tested with the suspension or device in the normal running condition specified by the manufacturer.
3. TEST PROCEDURE

3.1. The requirements of paragraphs 7.3 and 25.6 of this Regulation shall be verified by means of suitable test mandrels; the forces for tests prescribed in paragraphs 3.1.1 and 3.1.2 below shall be applied separately and consecutively, via a surface not more than 250 mm in height (the exact height must be indicated by the manufacturer) and 200 mm wide, with a radius of curvature of $5 \pm 1$ mm at the vertical edges. The height above the ground of the centre of the surface must be defined by the manufacturer within the lines that bound the device horizontally. When the test is carried out on a vehicle the height must not, however, exceed 600 mm when the vehicle is unladen. The order in which the forces are applied may be specified by the manufacturer.

3.1.1. A horizontal force of 100 kN or 50 per cent of the force generated by the maximum mass of the vehicle, whichever is the lesser, shall be applied consecutively to two points situated symmetrically about the centre line of the device or of the vehicle whichever is applicable at a minimum distance apart of 700 mm and a maximum of 1 m. The exact location of the points of application shall be specified by the manufacturer.

3.1.2. In the cases defined in paragraphs 1.1.1 and 1.1.2 of this annex a horizontal force of 50 kN or 25 per cent of the force generated by the maximum mass of the vehicle, whichever is the lesser, shall be applied consecutively to two points located 300 $\pm$ 25 mm from the longitudinal planes tangential to the outer edges of the wheels on the rear axle and to a third point located on the line joining these two points, in the median vertical plane of the vehicle.

3.1.3. In the cases defined in paragraph 1.1.3 of this annex a horizontal force of 50 kN or 25 per cent of the force generated by the maximum mass of the vehicle for which the device is intended, whichever is the lesser, shall be applied consecutively to two points located at the discretion of the manufacturer of the rear underrun protective device and to a third point located on the line joining these two points, in the median vertical plane of the device.

3.2. Replacement force application points

If any point defined under paragraph 3.1 is located within the interruption area of the underrun protection device as mentioned in paragraphs 7.4 or 25.8 of this Regulation, the test forces shall be applied at replacement points located:

3.2.1. for the requirement under paragraph 3.1.1, on the horizontal centerline and within 50 mm of each vertical edge closest to the intended points of force application, as defined in that paragraph, and
3.2.2. for the requirement under paragraph 3.1.2, at the intersection of the horizontal and vertical centerlines of each element furthest from the vertical centerline of the device or of the vehicle, whichever is applicable. These points should be a maximum of 325 mm from the longitudinal planes tangential to the outer edges of the wheels on the rear axle.
