

Informal document N° 15
(80th GRSG, 2-6 April 2001
agenda items 8 and 10)

OICA PROPOSED AMENDMENTS TO
DRAFT REGULATION: PROTECTION OF MOTOR VEHICLES
AGAINST UNAUTHORIZED USE
and
REGULATION N° 97: VEHICLE ALARM SYSTEMS

Proposed amendment

"The VAS/AS shall undergo the basic test. It shall be subjected to testing for immunity against electrostatic discharge as described in either EN 61000-4-2 or ISO/TR 10605-1993, at the manufacturer's choice."

The above text is proposed for:

- a) TRANS/WP29/GRSG/2000/15, page 4, under headline "Electrical disturbance from electrostatic discharges"
- b) TRANS/WP29/2000/3, Annex 9, page 63, under the same headline

Justification

OICA recommends that manufacturers would be authorized to test according to either of the two standards.
