Reference to names of firms and commercial products and processes, whether or not these have been patented, does not imply their endorsement by UNECE or FAO, and any failure to mention a particular firm, commercial product or process is not a sign of disapproval.

This work is copublished by the United Nations (UNECE) and FAO.

ABSTRACT

This publication is the statistical supplement to the official statement by the Committee on Forests and the Forest Industry about the current and next year's forest products markets. The tables in the publication show detailed forest products production and trade forecasts by country for 2021 and 2022. The tables are generated based on submissions by more than 30 member States from Europe, North America and Eastern Europe, Caucasus and Central Asia. The tables presented cover roundwood (logs, pulpwood and fuel wood), sawnwood (coniferous and non-coniferous), wood-based panels (plywood, particle board, OSB and fibreboard), pulp, paper and wood pellets. The Committee collects data on over 30 individual products for many countries in the UNECE region.

KEYWORDS

forecast, fibreboard, forest products, lumber, logs, OSB, particleboard, plywood, panels, pulp and paper, roundwood, sawnwood, veneer, wood energy, wood particles, wood pellets production, imports, exports, consumption

INTRODUCTION

This publication includes forecasts for the current and next year's forest products markets submitted ahead of the annual Market Discussions of the Committee on Forests and the Forest Industry (COFFI). It provides the forward looking data to go along with the analysis contained in the Market Statement, which is issued at the COFFI meeting. The forecasted data covers the major forest products of the three subregions of the UNECE Region (Europe, Eastern Europe, Caucasus and Central Asia and North America). This PDF format, Excel data tables and the COFFI Market Statement are available from the COFFI Market Forecast website at:

<https://unece.org/forests/coffi-market-forecasts>

NOTES

Data are shown only for countries providing forecasts. Sub-regional totals thus reflect only the reporting countries of the subregion.

Austrian removals data do not include trees outside the forest. Wood chip trade includes recovered post-consumer wood.

German estimates of removals for 2021 and 2022 are highly sensitive to assumptions of beetle damage and drought, and significant inventory swings. Actual consumption in 2021 is higher than indicated due to use of stocks built up in 2018-2020. Actual consumption of pellets in 2020 should be approximately 300,000 mt less than the indicated figure as this amount was stored by new market participants.

Italy MDF/HDF production data include only MDF.

Montenegro removal figures are from Directorate of Forests, other figures are based on Statistical Office information.

Slovenia trade figures are lower than actual as they do not include estimates for non-recorded trade with other EU countries.

Polish trade data exclude non-reporters (estimated at 1-3% of total). Residues exclude recovered wood. Polish sawnwood data exclude shop lumber. Wood pulp production is in metric tonnes, not air-dried, and excludes recovered fibre pulp. Wood pellets production data includes briquettes and non-wood based material.

United Kingdom production figures for OSB and wood pulp are secretariat estimates.

Data on wood chips and residues for Turkey include those from secondary processing.

For tables 1-13, data in italics are secretariat estimates or repeated data. All other data are from national sources and are of course estimates for the current and future year.

Countries with nil, missing or confidential data for all years on a table are not shown.

Consumption figures are the sum of production and national imports minus national exports. Softwood = coniferous, hardwood = non-coniferous.

Terms and definitions used

...	not available
0	less than half the unit
m ³	cubic metre (solid volume of roundwood and processed products)
mt	metric tonne
shaded area	not applicable
italics	secretariat estimate

Data as of November 26, 2021

^a Pulpwood, round and split, as well as chips and particles produced directly
 therefrom and used as pulpwood
^b Pulpwood, poles, piling, posts etc.
^c Including chips and particles produced from wood in the rough and
 used for energy purposes
^a Bois de trituration, rondins et quartiers, ainsi que plaquettes et particules fabriquées
 directement à partir des rondins et quartiers et utilisées comme bois de trituration
^b Bois de mine, poteaux, pilotis, piquets etc.
^c Y compris plaquettes et particules fabriquées à partir du bois brut et utilisées
 à des fins énergétiques

Annex 2

Some facts about the European Forestry Commission

The European Forestry Commission (EFC), which was created in 1947, is one of six regional forestry commissions established by FAO to provide a policy and technical forum for countries to discuss and address forest issues on a regional basis.

The purpose of the EFC is to advise on the formulation of forest policies and to review and coordinate their implementation at the regional level; exchange information; advise on suitable practices and actions to address technical and economic problems (generally through special subsidiary bodies); and make appropriate recommendations in relation to the foregoing. The EFC meets every two years and its official languages are English, French and Spanish.

The EFC has a number of associated subsidiary bodies, including the Working Party on the Management of Mountain Watersheds; the UNECE/FAO Working Party on Forest Statistics, Economics and Management; and seven UNECE/FAO Teams of Specialists. The Committee on Mediterranean Forestry Issues (*Silva Mediterranea*) informs the EFC.

FAO encourages the wide participation of government officials from forestry and other sectors as well as representatives of international, regional and subregional organizations that deal with forest-related issues in the region, including non-governmental organizations and the private sector. Accordingly, the EFC is open to all members and associate members whose territories are situated wholly or in part in the European Region or who are responsible for the international relations of any non-self-governing territory in that region. Membership comprises such eligible member nations as have notified the Director-General of their desire to be considered as members.

The EFC is one of the technical commissions serving the FAO Regional Office for Europe and Central Asia (REU), and the EFC Secretary is based in Geneva. EFC work is regulated by its Rules of Procedures, which were adopted by the FAO Conference in 1961 and amended at the Eighteenth Session of the EFC in 1977.

Annex 3

Some facts about the Committee on Forests and the Forest Industry

The UNECE Committee on Forests and the Forest Industry (COFFI) is a principal subsidiary body of the UNECE based in Geneva. It constitutes a forum for cooperation and consultation between member countries on forestry, the forest industry and forest product matters. All countries of Europe and the EECCA, as well as the United States, Canada and Israel, are members of the UNECE and participate in its work.

The UNECE Committee on Forests and the Forest Industry shall, within the context of sustainable development, provide member countries with the information and services needed for policymaking and decision-making with regard to their forest and forest industry sectors, including the trade and use of forest products and, where appropriate, it will formulate recommendations addressed to member governments and interested organizations. To this end, it shall:

1. with the active participation of member countries, undertake short-, medium- and long-term analyses of developments in, and having an impact on, the sector, including those developments offering possibilities for facilitating international trade and for enhancing the protection of the environment;
2. in support of these analyses, collect, store and disseminate statistics relating to the sector, and carry out activities to improve their quality and comparability;
3. provide a framework for cooperation, for example by organizing seminars, workshops and ad hoc meetings and setting up time-limited ad hoc groups, for the exchange of economic, environmental and technical information between governments and other institutions of member countries required for the development and implementation of policies leading to the sustainable development of the sector and the protection of the environment in their respective countries;
4. carry out tasks identified by the UNECE or the Committee on Forests and the Forest Industry as being of priority, including the facilitation of subregional cooperation and activities in support of the economies in transition of central and eastern Europe and of the countries of the region that are developing from an economic perspective; and
5. keep under review its structure and priorities and cooperate with other international and intergovernmental organizations active in the sector, particularly FAO and its European Forestry Commission and the International Labour Organization, in order to ensure complementarity and avoid duplication, thereby optimizing the use of resources.

Forecast of the Committee on Forests and the Forest Industry: Forest Products Production and Trade 2020-2022

This publication is the statistical supplement to the official statement by the Committee on Forests and the Forest Industry about the current and next year's forest products markets. The tables in the publication show detailed forest products production and trade forecasts by country for 2021 and 2022.

The tables are generated based on submissions by more than 30 member States from Europe, North America and Eastern Europe, Caucasus and Central Asia. The tables presented cover roundwood (logs, pulpwood and fuel wood), sawnwood (coniferous and nonconiferous), wood-based panels (plywood, particle board, OSB and fibreboard), pulp, paper and wood pellets. The Committee collects data on over 30 individual products for many countries in the UNECE region.
