

An aerial photograph of a river delta, showing a complex network of dark water channels winding through a dense grid of green agricultural fields. The fields are separated by thin, light-colored lines, likely roads or irrigation canals. The overall scene is a vibrant green, with the dark water providing a stark contrast.

The Value of Data as a Driver to Mobilize Methane Action

Antonia Gawel, March 2024

Our mission is supported by three pillars

Empowering individuals

Empowering the billions of people who use our products with better information when they're looking to make sustainable decisions.

Working Together

Providing our partners with information on reducing their own emissions, and advancing transformative technology towards sustainable operations.

Operating sustainably

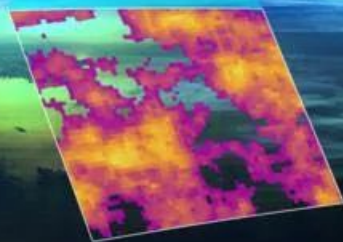

Building on a legacy of leadership in clean energy by setting ambitious goals to reduce our own emissions and accelerate the global transition to a net-zero future.
