STATISTICAL COMMISSION and ECONOMIC COMMISSION FOR EUROPE

CONFERENCE OF EUROPEAN STATISTICIANS

Meeting on the Management of Statistical Information Technology  
(Geneva, Switzerland, 15-17 February 1999)

Topic (i): The impact of Internet on the statistical production and dissemination process

**THE USE OF INTERNET AT STATISTICS SWEDEN  
TO COLLECT AND DISSEMINATE STATISTICAL DATA**

Submitted by Statistics Sweden<sup>1</sup>

**SUMMARY**

1. Statistics Sweden (SCB) started to use the Internet for dissemination of data in 1995 and to collect data over Internet some years before that. Ever since, the use of Internet and Internet techniques is increasing and improving. The policy of SCB is to use the Internet, keep to standards or de facto standards, and to avoid special solutions for communication.
2. The paper will describe our efforts on the input side, briefly describing the processes starting with input and ending with output functionality. The infrastructure and future plans will also be mentioned.
